Modi meets Trump, raises safety of Indian seafarers

PM commends Trump for his efforts to restore peace in West Asia, stresses importance of keeping the Strait of Hormuz open; Trump praises Modi, says U.S. and India 'very close' to trade agreement

Sriram Lakshman
LONDON

Prime Minister Narendra Modi on Wednesday raised the issue, in broad terms, of the safety of seafarers with U.S. President Trump during their bilateral meeting in Evian, France, on the fringes of the G7 Summit.

"Mr. President, you are aware across the world, Indian seafarers in the hundreds of thousands are working and performing their duties across global maritime trade routes, including the Strait of Hormuz, and their safety is of utmost importance to us," Mr. Modi said, referring to the killing of three Indian seafarers in a U.S. strike last week off the coast of Oman.

Holding hands: PM Narendra Modi with U.S. President Donald Trump on the sidelines of the G7 meet in France on Wednesday. AP

"I'm confident that the issue of seafarers will receive the highest priority during the implementation of this agreement," Mr. Modi said. The Prime Minister "commended" Mr. Trump for his efforts to restore peace in West Asia and said he was confident this would lead to a long-term peace in the region. The Prime Minister told the President that they both agreed that keeping the Strait of Hormuz open was vital for the world economy.

Mr. Trump was asked by a pressperson if he had words of condolence for the grieving families of the sailors. "I heard about that. It is a rough profession. There is no question about it," he said, adding, "this has been happening throughout time, but we work together. We love all of those people."

Mr. Trump said Iran would not have a nuclear weapon and that Mr. Modi felt "very strongly" about that as well. Mr. Trump said the U.S. and India were "very close" to finalising a trade deal, calling Mr. Modi a "very tough" negotiator. The two countries announced the finalisation of a deal in February this year but it is yet to be signed, held up partly over changes to U.S. tariff policies and some gaps in the finer details.

Iran-U.S. framework deal outlines nuclear pledge, financial relief

Stanly Johny

The U.S. has agreed to facilitate the release of frozen Iranian assets, contingent on progress in negotiations towards a final agreement, and create a plan for Iran's economic development, involving $300 billion, according to a text of the 14-point framework agreement reached between Tehran and Washington which was published by Saudi Arabia's *Al Arabiya* network and the Bloomberg news agency on Wednesday.

The memorandum of understanding is expected to be signed in Geneva on Friday. The draft stated that Iran has pledged never to produce nuclear weapons and, pending a final agreement, maintain a status quo on its nuclear programme. However, the *AP* reported later that unnamed U.S. officials read out the draft to pressper-

11 deaths in Mysuru Jayadeva sets off alarm

The Hindu Bureau
MYSURU

Eleven deaths reported in the Mysuru unit of the Sri Jayadeva Institute of Cardiovascular Sciences and Research, allegedly within a span of 24 hours, led to panic on Wednesday.

Institute Director B. Dinesh rushed to Mysuru to ascertain the reasons behind the fatalities, following allegations of negligence and shortage of doctors. He said that all people who died were admitted in critical condition after suffering heart attacks and beyond the "golden hour." Medical Education Minister Sharan Prakash Patil said the hospital's mortality rate remains well below the national average and that there was no evidence of negligence or any unusual incident.

Deepti rediscovering her mojo augurs well for the Women in Blue

One of India's trusted performers for many years, the off-spinner has vaulted back as the world's highest wicket-taker in T20Is, thanks to her match-winning five-wicket haul against Pakistan

GETTY IMAGES

P.K. Ajith Kumar
LEEDS

Deepti Sharma had gone five T20Is in a row without taking a wicket on India's tours of Australia and South Africa. With the format's World Cup around the corner, that wasn't a good sign. But it is unlikely that the Indian team management would have been overly worried.

Deepti was bound to be among the wickets soon. It was only in December that she had gone past Australian quick Megan Schutt to become the world's highest wicket-taker in T20Is. She had done that against Sri Lanka in Thiruvananthapuram, where India completed a 5-0 whitewash.

She, however, lost that spot. When the T20I World Cup got underway in England last week, an unfamiliar name headed the all-time wicket-takers' list: Thipatcha Putthawong. The young left-arm spinner has not faced the challenge of bowling to the world's best batters on too many occasions as Thailand is not a full member.

Deepti got back the all-time No. 1 slot during India's opening match in the Women's T20 World Cup at Edgbaston. She took five for 10 to help her team score a thumping 64-run victory. Those figures are the best by an Indian at the World Cup. That was also the third best spell in the tournament's history – after West Indies' Deandra Dottin (five for five against Bangladesh in 2018) and Sune Luus of South Africa (five for eight against Ireland in 2016).

Dottin and Luus are also playing at this World Cup, and Deepti is due to come up against the latter, as South Africa is in the same 'Group of Death'. India needs Deepti continues to come up with more shows like that.

Straight second five-for

It was the off-spinning all-rounder's second straight five-wicket haul in an ICC World Cup match. She had taken five for 39 in the ODI World Cup final against South Africa in Mumbai to play a big role on what was the greatest day for Indian women's cricket. She had done her bit with the bat as well, making 58.

Against Pakistan here too she played a crucial knock. Her 12 not out was priceless actually, as it was her sixth-wicket partnership with Richa Ghosh that saved the Indian innings from a precarious position. She played the perfect foil to her younger partner, who once again played her role as finisher perfectly.

After the match, Deepti was all praise for Richa's brilliant knock (34 off 17 balls). "Sometimes the start is good, sometimes the middle overs are very good, but it is equally important how you finish and Richa batted very well," she said. "If you have a thirty, forty or fifty partnership in the last five to six overs it helps a lot; it sets you up to reach a good total. Richa was striking every ball well, no matter which bowler was coming up against her."

Deepti said Smriti Mandhana's half century at the top of the order was important as well. "I think it was unbelievable batting by Smriti and her partnership with Harmanpreet helped us get back the momentum, after losing early wickets," she said. "We have always thought we have a good batting line-up and it is commendable that we could contribute."

Self-belief

About her match-winning spell, she said her plan was simple. "I just have the self-belief that whenever such situations arise, I will have to step up," said Deepti. "And since the wicket was slightly turning, I was landing the balls well. It was just about bowling back-to-back in the good areas."

About her back-to-back five-wicket hauls in ICC World Cup matches, though in different formats, she said she thrived on pressure. "I like pressure and the ICC tournaments," she said with a smile. "I feel I have started (at this World Cup) from where I had finished off (at the ODI World Cup). It feels good."

Deepti's first World Cup was in England – the ODI variety in 2017. After shocking Australia in the semifinals, thanks, of course, to that unreal innings from Harmanpreet Kaur, India faltered in the final against England at Lord's.

It wasn't a memorable final for the 19-year-old Deepti, as she was the ninth wicket to fall, in the penultimate over. The Indian innings folded up in that over, in fact, and fell just nine runs short.

"I think when you look at young Deepti and now senior Deepti, it feels very good," she said. "Looking back at the earlier matches and the 2017 World Cup, if I look at that, I learned a lot from that World Cup. I learn from every match. I learn from the errors and see in which areas I can be better."

She has good support, too. "I regularly talk to Aavishkar Salvi and that always helps me," she said. "I watch my videos, so I think there is always something to learn from every game. It doesn't matter whether you are winning or not. You are considered a good player only when you think about how to improve (even your good qualities), and every match is important to me. And I am just enjoying it."

> You are considered a good player only when you think about how to improve

That is pretty obvious when she is out on the field. She makes her presence felt even when she is not batting or fielding. In addition to her five wickets against Pakistan, she had also effected a run-out with a direct hit.

Combative

And she is a very combative player, who just doesn't shy away from going that extra mile within the rules. Remember how she reduced England Charlie Dean to tears at Lord's in a tense finish in the third ODI at Lord's in 2022, by 'Mankading'.

India doesn't play Pakistan as often as other teams like England or Australia. She said there was nothing special about it. "I don't think we felt anything different in this game," she said. "We always play every game in a different way. But the first game is always special; you get momentum from there. So I can only say that it was a good win (against Pakistan) and a good start for the team. We don't think about the opponent, we just try to play our best cricket."

Great support

She said the whole team was enjoying playing the World Cup in England, with so many Indian fans turning out to support the Women in Blue. "Actually I didn't feel like that we are playing in the UK, to be very honest," she said. "We have got so much support from the crowd. The fans are cheering for us. It feels like home conditions. It is a good thing. Fans will come and support, and we will do our best and play our best cricket."

And Deepti will have a vital role to play in this Indian team that is trying to win its second ICC World Cup within a space of a few months. One of India's trusted servants for many years, she is a woman for all seasons.

Her numbers tell us how significant her contribution has been ever since making her India debut in 2014. She has scored 2771 ODI runs at an average close to 36 and struck 18 fifties and a hundred in 124 matches.

And that hundred was special. She made 188 against Ireland in South Africa in 2017 and added 320 for the opening wicket with Punam Raut, a record that remains unbeaten. She also has 166 ODI wickets.

After Wednesday's match against the Netherlands at Leeds, she has 1232 runs in 146 T20Is and that world record tally of 167 wickets. She has also notched up four fifties and a five-wicket haul in six Tests.

And she continues to show why she is regarded as one of the best all-rounders in the women's game, and why her captain has so much faith in her. It may be no exaggeration to say that she is the go-to woman of this Indian team.

THE GIST

- It was the off-spinner's second straight five-wicket haul in an ICC World Cup match after the five for 39 in the ODI World Cup final against South Africa
- In 146 T20Is, Deepti has taken a world record 167 wickets and notched up 1232 runs
- The impactful all-rounder has scalped 166 wickets and scored 2771 runs in 124 ODIs since making her India debut in 2014
- She made a massive 188 against Ireland in South Africa in 2017 and added a world record 320 for the opening wicket with Punam Raut

Citizens eye maintenance push under new Bengaluru Minister

They expect better coordination between the GBA and rural administration to improve connectivity and everyday life

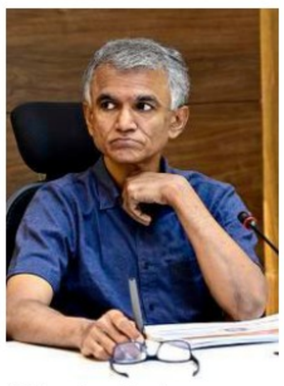
Chetan B.C.
BENGALURU

As Krishna Byre Gowda took charge as Bengaluru Development Minister, citizens and resident welfare associations are expecting a shift from project-centric governance to maintenance-centric governance, with a focus on improving the quality of roads and drains and the commuting experience, rather than pursuing unplanned expansion with new projects.

Another major change that citizens are expecting is better coordination between the Greater Bengaluru Authority (GBA) and the rural administration to improve connectivity and everyday life.

Karunakar Reddy, a resident of Electronic City Phase 2, which falls under panchayat limits, explained that development in the city's fringes has been rapid, but transport infrastructure has remained stagnant, leaving commuters struggling on a daily basis.

"There are many people who work in the city centre and eastern parts of the city while residing on the outskirts due to affordable housing. They mostly rely on the metro. However, road connectivity and last-mile connectivity remain significantly poor and should be prioritised," he said.



Krishna Byre Gowda

Mr. Reddy stressed that the new Minister should ensure that departments communicate with one another regularly and that a separate platform be created to address issues that cut across multiple departments.

For example, the Bengaluru Traffic Police (BTP), BMRCL, and BMTC must work together to address last-mile connectivity issues.

Santanam, a resident of Ananth Nagar in Electronics City, explained that interior roads within panchayat limits are in a miserable condition, while the quality improves somewhat once commuters reach city roads.

Most civic activists and groups focused their demands on improving basic infrastructure

Paradigm shift

R. Rajagopalan, convener of Bengaluru Coalition, a collective of civil society organisations, stressed that systemic issues must be addressed through a "root cause" approach. He noted that Mr. Gowda must develop a culture of spot inspections at problem sites and hold officials accountable by conducting random location visits, which could help address civic issues across the city.

"We need transparency at the ward level, work allocation with all the requisite project details, and an intense focus on accountability for non-performance. The officials' ward-level contact list needs to be published along with updated performance records, field inspection reports, scorecards, and proceedings of weekly grievance redressal meetings," he noted.

Establishing a public platform, a one-stop guide to all GBA contacts, to improve transparency and create a more effective work-management model has been a longstanding demand from citizens, and RWAs are now pushing for it more strongly.

Zibi Jamal, a member of Whitefield Rising, stressed the importance of transparency and citizen participation. "Residents should have access to real-time public dashboards on budgets, works, and expenditures because accountability begins with visibility. Bengaluru does not need more announcements; it needs consistent delivery, maintenance, and governance that works," she said. Rajkumar Dugar, convener of Citizens for Citizen, a civic advocacy group, said that the government should adopt a sponge city concept as a comprehensive policy, with the aim of raising groundwater levels and reducing flooding.

Most civic activists and groups focused their demands on improving basic infrastructure. Ms. Jamal said, "Bengaluru also needs a shift from project-centric governance to maintenance-centric governance, with greater attention to roads, footpaths, streetlights, drains, parks, lakes, waste management, and public toilets."

She noted that citizens are looking for strong enforcement of the rule of law, including an immediate crackdown on illegal constructions, accountability in public works, and strict adherence to standards by all agencies, including contractors, Bescom, BWSSB, and the new city corporations. Sujith Cariappa of the Social Amenities Association noted that they oppose further densification of already congested neighbourhoods through flyover-centric projects that erode green cover. Instead, they advocate planned suburban townships that encourage horizontal growth.

They hope that public interest, accountability, and long-term urban planning will prevail over politics and bureaucracy.

Govt. plans new growth centres for development of Bengaluru region

The Hindu Bureau
BENGALURU

The Karnataka government is preparing a long-term economic development plan for the Bengaluru Metropolitan Region (BMR), with projections of expanding the regional economy to between $390 billion and $420 billion and creating up to three million jobs by 2037.

The proposal was reviewed at a Steering Committee meeting chaired by the Chief Secretary on Tuesday. The plan is being prepared by the Institute for Sustainability, Employment and Growth Foundation (ISEG Foundation) following an agreement signed with the State government in May this year.

Covering about 8,000 sq. km and home to nearly 1.5 crore people, the BMR contributes more than 43% of Karnataka's Gross State Domestic Product. The region's economy is currently estimated at $149 billion.

The plan proposes the development of new growth centres within and outside Bengaluru's existing urban limits. FILE PHOTO

Annual growth

According to the presentation made before the committee, the BMR recorded an average annual growth rate of 9.7% between 2015 and 2025. This outpaced Karnataka's growth rate of 8.5% and Hyderabad's growth rate of 7.5%, cementing Bengaluru's position as India's fastest-growing metropolitan economy. The region currently accounts for around 38 lakh jobs.

The plan proposes the development of new growth centres within and outside Bengaluru's existing urban limits. These centres are expected to accommodate industrial, technology, manufacturing, logistics, commercial and residential activities with the aim of reducing development pressures on the city and promoting growth in surrounding areas.

Several transport projects have also been proposed. These include a 287-km circular rail network, an additional 400-500 km of Metro rail corridors, four Regional Rapid Transit System corridors and expansion of the suburban rail network. Upgrades to road infrastructure and airport connectivity have also been envisaged.

Consultations

As part of the planning process, the government will hold consultations with industry representatives, investors, academic institutions and infrastructure experts over the next few months. An ideas workshop involving industry stakeholders is scheduled for late June, followed by another consultation in July.

The steering committee is expected to meet again on July 28. Financial and implementation strategies are proposed to be finalised in August, with the completed plan to be presented to the Chief Minister and Deputy Chief Minister in September.

North corporation completes 86% of LED light conversion

The LED conversion work has largely been completed in Yelahanka, Byatarayanapura, Pulakeshinagar, Hebbal, among others. FILE PHOTO

The Hindu Bureau
BENGALURU

The North City corporation has completed 86% of its ongoing project to replace conventional streetlights with energy-efficient LED lights across its jurisdiction. The corporation has also initiated steps to improve lighting in poorly illuminated areas through the installation of new streetlight poles and cable networks, according to a release.

A total of 68,907 LED streetlights have been installed so far, which is being implemented through the public-private partnership model. The LED conversion work has largely been completed in Yelahanka, Byatarayanapura, Pulakeshinagar, Hebbal, Sarvagnanagar, five wards of Dasarahalli and three wards of Rajarajeshwari Nagar, with the remaining works currently under way. The civic body said the project also includes the installation of a Centralised Control and Monitoring System (CCMS). The installation of the monitoring system is still pending and is being taken up alongside the remaining LED conversion works.

Man stabs friend to death

The Hindu Bureau
BENGALURU

A minor quarrel between two friends turned fatal after one allegedly stabbed the other following an argument over derogatory remarks against his family at NIMHANS Layout under the Suddaguntepalya Police Station limits. The deceased has been identified as Wasim, 29, a mechanic. The accused, Syed, 29, who worked in a tent house, has been taken into police custody.

Syed allegedly stabbed Wasim with a knife. The police said Syed rushed the injured Wasim to a nearby hospital for treatment. However, doctors were unable to save him.

PUBLIC NOTICE

NOTICE IS HEREBY GIVEN THAT, our client has negotiated and agreed to purchase the Schedule Property from its owner. All persons having any claim against the Schedule Property or any part thereof are hereby required to submit the same in writing along with documentary proof to the undersigned at their office within **15 days** from the date of publication hereof, failing which our clients shall proceed without any reference to such claim and the same, if any, will be considered as waived.

SCHEDULE PROPERTY

All that piece and parcel of the land bearing Survey Number **59/3,** measuring **34 Guntas**, situated at **Guddahatti Village, Attibele Hobli, Anekal Taluk, Bangalore Urban District** and bounded on:

East by : Land in Survey Number 59/2, West by : Land in Survey Number 59/4, North by : Land in Survey Number 61, South by : Neraluru Village Boundary

SALE NOTICE FOR SALE OF IMMOVABLE PROPERTY
(Under Rule 8(6) of the Security Interest (Enforcement) Rules 2002)

E-Auction Sale Notice for Sale of Immovable Assets under the Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 read with proviso to Rule 8 (6) of the Security Interest (Enforcement) Rules, 2002.

Notice is hereby given to the public in general and in particular to the Borrowers(s) and Guarantor(s) that the below described immovable property mortgaged/charged to the **ARM Branch II, Bangalore of Canara Bank,** the **Possession** of which has been taken by the **Authorised Officer of ARM Branch II, Bangalore will be sold "As is where is", "As is what is", and "Whatever there is" basis** for recovery of outstanding dues from below mentioned Borrowers. The Reserve Price and the Earnest Money Deposit is mentioned below.

Sl. No.	Name and address of the Borrower(s) / Guarantor(s	Total Liabilities	Description of Immovable Properties (Name of Owner / Mortgagor to be mentioned)	Auction Date & Time	Reserve Price & Earnest Money Deposit [EMD] Date & Time	Incremental Value at Bid
1.	**1. Sri. Siraj S/o Late Sri. Mohamad Bahuddin** Good Shed Colony, Shanthinagar, Tumkur - 572101. **2. Sri. Zahidulla Khan S/o Late Aleem Ulla Khan** 3rd Cross, A R Rolling Mills, Shirani Garden, Upperhalli, Tumkur - 572102.	**Rs. 99,56,335.65/- (Rupees Ninety Nine Lakhs Fifty Six Thousand Three Hundred Thirty Five and Sixty Five Paisa only) plus further interest thereon from 31.05.2026 and other expenses, etc.**	**(1)** Poultry shed and other Equipments at Agricultural Immovable Property bearing 5/20 Measuring 4 Acres at Karadagere Kaval Village, Tumkur, **Property in the name of Mr. Siraj.** Bounded by : **East :** Road, **West :** Land of T R Srinivas, **North :** Sy.No. Block 21B Land, **South :** Land of T R Srinivas. **(2)** All that piece and parcel of Site with AC Sheet and RCC Building Property bearing Old Muncipal Khatha No. 633 and then 633/274, Now bearing Tumkur City Currency Khatha No. 633/274, PID No. New 100214 (Old PID No. 39910) Measuring : EW 26 Feet and NS 30 Feet, Situated at Good Shed Colony, **Property in the name of Mr. Siraj.** Bounded by : **East :** Property of Mohammad Hussain, **West :** Property of Ameer Sab Sons, **North :** Property of II Party Hallem, **South :** Road.	**08.07.2026 – 01:00 PM to 03.00 PM** (With unlimited extension of 5 minutes duration each till the conclusion of the sale)	**Property No. 1 : Reserve Price : Rs. 108.00 Lakhs EMD : Rs. 10.80 Lakhs Property No. 2 : Reserve Price : Rs. 38.37 Lakhs EMD : Rs. 3.84 Lakhs on or before 07.07.2026**	**Multiplies of Rs. 1,00,000/-. Encumbrance (s):** Not Known to the Bank

Other Terms and Conditions :-

a. Auction / bidding shall be only through **" Online Electronic Bidding"** through the **Website : https://baanknet.com/** Bidders are advised to go through the website for detailed terms before taking part in the e-auction sale proceedings.
b. The property can be inspected, with Prior Appointment with Authorised Officer .
c. The property will be sold for the price which is more than the Reserve Price and the participating bidders may improve their offer further during auction process.
d. EMD amount of 10% of the Reserve Price is to be deposited in E-Wallet of **M/s PSB Alliance Private Limited (Baanknet)** portal directly or by generating the Challan therein to deposit the EMD through RTGS / NEFT in the account details as mentioned in the said challan.
e. After payment of the EMD amount, the intending bidders should submit a copy of the following documents/details on or before **07.07.2026, to Canara Bank, ARM Branch II Bangalore by hand OR Email.**
   i. Demand Draft / Pay order towards EMD amount. If paid through RTGS/NEFT Acknowledgement receipt thereof with UTR No.
   ii. Photocopies of PAN Card, ID Proof and Address proof. However, successful bidder would have to produce these documents in original to the Bank at the time of making payment of balance amount of 25% of bid amount.
   iii. Bid Form.
   The intending bidders should register their names at portal **https://baanknet.com/** and get their User ID and password free of cost. Prospective bidder may avail online training on E- auction from the service provider, **M/s. PSB Alliance (BAANKNET) - e- mail: support.baanknet@psballiance.com**
   EMD deposited by the unsuccessful bidder shall be refunded to them. The EMD/Sale proceeds shall not carry any interest.
f. Auction would commence at Reserve Price, as mentioned above. Bidders shall improve their offers in **Multiplies of Rs. 1,00,000/-** The bidder who submits the highest bid not below the Reserve price) on closure of 'Online' auction shall be declared as successful bidder. Sale shall be confirmed in favour of the successful bidder, subject to confirmation of the same by the secured creditor.
g. The successful bidder shall deposit 25% of the sale price (inclusive of EMD already paid), immediately on declaring him/her as the successful bidder and the balance within 15 days from the date of confirmation of sale by the secured creditor. If the successful bidder fails to pay the sale price, the deposit made by him shall be forfeited by the Authorized Officer without any notice and property shall forthwith be put up for sale again. This amount shall be deposited by way of Demand draft in favour of **Authorized Officer, Canara Bank, ARM II Branch OR** shall be deposited through RTGS / NEFT / Fund Transfer to credit of account of **Canara Bank, ARM II Branch, A/c. No. 209272434, IFSC Code : CNRB0006298.**
h. For sale proceeds of **Rs. 50.00 Lakhs (Rupees Fifty Lacs)** and above, the successful bidder will have to deduct TDS at a rate 1% or as applicable on the sale proceeds and submit the original receipt of TDS certificate to the bank.
   i. All charges for Conveyance, Stamp Duty/GST/Registration Charges etc. As applicable shall be borne by the successful bidder only.
   j. Authorised Officer reserves the right to postpone/cancel or vary the terms and conditions of the E-auction without assigning any reason thereof.
   k. In case there are bidders who do not have access to the internet but interested in participating the E-auction, they can approach **Canara Bank Circle office, Bengaluru or Canara Bank ARM II Branch, Bengaluru,** who as a facilitating centre shall make necessary arrangements.
   l. Bidder has to make due diligence and physical verification of property with regard to title, extent, area dues, etc. No claim subsequent to submission of bid shall be entertained by the bank.
   m. After confirmation of sale, bidder's request cannot be accepted for refund of amount which is already paid and Bank will proceed as per SARFAESI Act.

For further details contact Authorised Officer, Canara Bank, ARM Branch - 2 - (9113092975, 7561062889, 8921102717, 7892927914, 9464534482, 8709675503 and 080-25310181) e-mail id – cb6298@canarabank.com OR the service provider M/s.PSB Alliance (BAANKNET) - e- mail : support.BAANKNET@psballiance.com

Special Instruction / Caution :

Bidding in the last minutes/seconds should be avoided by the bidders in their own interest. Neither Canara Bank nor the Service Provider will be responsible for any lapses/failure (Internet failure, Power failure, etc.) on the part of the bidder or vendor in such cases. In order to ward off such contingent situation, bidders are requested to make all the necessary arrangements/alternatives such as back –up, power supply and whatever else required so that they are able to circumvent such situation and are able to participate in the auction successfully.

Dhaka's new Padma barrage will reshape water power in the region

The new barrage will lie just 180 km downstream of the Farakka barrage in Bengal — which Bangladesh has blamed for its periodic water scarcity; the Farakka, one of India's largest with a feeder canal, was built to divert water from the Ganga to the Bhagirathi-Hoogly, and flush the Kolkata Port

Sonikka Loganathan
CHENNAI

A view of the Padma river from space in 2016. NASA

Bangladesh recently signed off on the new Padma barrage to control the Padma river, which is the Ganga in Bangladesh, and abate the country's seasonal water scarcity.

The 2.1-km-long structure will store 2,900 million cu. m of water to serve 6.5 crore people across southwestern and northern Bangladesh. It is estimated to cost Tk 50,443 crore (Rs 39,170 crore) over seven years.

The barrage will lie just 180 km downstream of the Farakka barrage in West Bengal – which Bangladesh has increasingly viewed as an impediment. The Farakka barrage is one of India's largest with a feeder canal and was built to divert water from the Ganga to the Bhagirathi-Hoogly and flush the Kolkata Port.

Under the 1996 Ganges Water Treaty, Bangladesh will receive half the water from the Farakka barrage when the flow is under 70,000 cusecs. But during the dry season between March and May, each country has to receive at least 35,000 cusecs of water in three alternating 10-day periods.

Treaties past and future

A 2019 review by a team of experts in *Water Policy* found that there were "repeated occurrences of low flow at Farakka during the drier years in the post-Treaty period," including in 1997, 2008, 2010 and 2016. They concluded that the 1996 Treaty couldn't account for rising unpredictability in the flows.

The agreement is set to expire in December 2026.

But Dhaka has also said the Farakka barrage is responsible for the country's periodic water scarcity. To add to the anxiety, several river-sharing agreements between India and Bangladesh also remain unsigned, including the Teesta River Treaty.

According to S. Janakarajan, president of the South Asia Consortium for Interdisciplinary Water Resources Studies, "All transboundary water issues centre around the lack of timely flow of water," implying the barrage will be a way for the lower riparian state to exert some control over its water resources.

But this equity will come at a considerable environmental cost.

Effects of Farakka barrage

The Farakka barrage has altered the Ganga river's character and ecology in Bangladesh. About a third of the country's population relies on the Ganga basin, mostly to irrigate crops. But by redirecting the river and reducing flow, the barrage has diminished groundwater recharge, reduced the extent of waterways for navigation, increased salinity, eroded riverbanks, and has left less freshwater flowing to the Sundarbans.

According to Mr. Janakarajan, "a substantial part of Bangladesh" is less than 10 m above sea level.

"In the near future, sea-level rise will lead to the disappearance of 17% of the territory of Bangladesh," researchers wrote in the *Journal of Marine Science and Engineering* in 2022.

This, they added, will "create 20 million refugees, and 2,20,000 km² of land will be submerged following a projected sea-level rise of 1,500 mm to take place within 150 years."

Bangladesh also drew around 520 litres of groundwater per person per day in 2008 (the latest year for which the UN FAO Aquastat database provides national figures for withdrawals by source). While this is not particularly high, the country's dependence on groundwater is a matter of concern.

Because the Farakka barrage also reduces flow in the Padma, the Padma is less able to transport silt, which sinks to the riverbed and piles up. When the monsoons arrive, the river overflows quickly and floods.

The sediments are also crucial to maintaining ecosystems and the livelihoods that depend on them.

For example, the Sundarbans region hosts the world's largest contiguous mangrove forest and depends on water from the Ganga, Brahmaputra, and Meghna rivers. Mr. Janakarajan said less sediment and freshwater flowing from these barrages will cause water in the Sundarbans to become saline whereas the ecosystem requires brackish water, which is less salty.

These changes will also lead to fewer fish, affecting the lives and livelihoods of fisherfolk in the area.

Fondness for concrete

South Asia is currently on a dam-building spree. There are more than 160 hydroelectric power projects underway in the region, per a 2023 review in *Water*. China is also building what will be the world's largest dam over the upper course of the Brahmaputra, just before the river enters India. In response, India has initiated a Rs 6.4 lakh crore hydroelectric power project, including building over 200 dams in its Northeast.

Dams – of which barrages are a type – are generally designed to operate for a century. Climate change is breaking this guarantee.

To ensure a barrage doesn't overflow under heavy bursts of rain, for instance, engineers have to drain water from behind it using canals, Omair Ahmad, former South Asia managing editor at *Dialogue Earth*, said. However, this will require building extensive water diversion infrastructure that would likely be made of cement.

"Creating greater pondage here in a cement thing means water is not going into your groundwater. It cannot," Mr. Ahmad said. "It is robbing a much larger area around that barrage of the regular flow of water that would seep in from a river basin."

Given the adverse environmental consequences, experts said building another barrage is not the most rational choice.

"We think big projects will actually manage [water] despite historical evidence that they do not," Mr. Ahmad said. "It is rare for big projects to be able to manage this because ecosystems are a bit too complex."

Mr. Ahmad and Mr. Janakarajan also suggested that instead of one large barrage, Bangladesh should consider building a series of smaller check-dams, which don't dramatically alter a river's flow.

But this has the downside of requiring cross-country planning and maintenance, whereas a barrage will be 'confined' to a specific area.

"Water sharing is always going to be a political issue," Sreeradha Datta, an international affairs professor at O.P. Jindal Global University, said. "The more we try to tame the river, the more we fall into other issues [with] long-term consequences which we cannot see now. But in the immediate context, it looks beneficial, and we are always pandering to the constituency."

The Daily Star has reported Bangladeshi officials saying the government will build the Padma barrage with its own money. Experts, however, said the country lacks the engineering resources for a project of this scale and likely has help from China.

Working on a project so close to the border alongside India's scepticism towards Bangladesh's new Tarique Rahman administration could make India uncomfortable, Prof. Datta added.

"China gets to be seen more and more as a dominant water manager in South Asia, as it has already become in the Mekong," Mr. Ahmad said. "India becomes a less relevant actor within its own neighbourhood."

So far, India has not directly commented on the Padma barrage. Dhaka has said its relationship with India depends on what they agree about sharing the Ganga's waters – and New Delhi that all river-sharing issues will be handled within the existing bilateral framework.

The treaty's renewal process is underway.

The universe's expansion still accelerating: researchers

Reuters

Taking a fresh look at data involving a type of exploding stars, a team of researchers says it has confirmed the notion that the universe is expanding at an accelerated rate – the very observation that led to the identification in the 1990s of an enigmatic cosmic force called dark energy.

The study's results rebut research published last year that concluded that this cosmic expansion is no longer speeding up – a finding that had challenged the basic understanding of the universe. "The universe is still accelerating," said astrophysicist Brodie Popovic of the University of Southampton in England, one of the leaders of the study published this month in the journal *Monthly Notices* of the Royal Astronomical Society. The study's findings, by a team that included two Nobel Prize recipients, were guided by observations in two different datasets of a type of stellar explosion called a Type Ia supernova in order to calculate vast cosmic distances. These supernovae cause the destruction of an object called a white dwarf, the dense remnant of a low- to intermediate-mass star at the end of its lifecycle. This type of supernova has proven valuable in investigating the universe's structure based on evidence that all of these explosions have roughly the same luminosity. Their observed brightness differs depending upon their distance from earth, making them useful as cosmic mile markers.

The study rebuts argument that the cosmic expansion is no longer speeding up – a finding that had challenged the basic understanding of the universe

By measuring the brightness of these supernovae as seen from earth, scientists can gauge the universe's expansion rate and its change over time. The Big Bang event roughly 13.8 billion years ago initiated the universe, and it has been expanding ever since. Scientists in 1998 disclosed that this expansion is accelerating, with an invisible force called dark energy as the hypothesised reason.

The universe's contents include ordinary matter – stars, planets, gas, dust and all the familiar stuff on earth – and dark matter and dark energy. Ordinary matter represents an estimated 5% of the contents. Dark matter, which is known from its gravitational influences on galaxies and stars, makes up an estimated 27%. Dark energy makes up an estimated 68%. The authors of the 2025 study, which was published in the same journal as the new study, concluded that dark energy is weakening and has stopped accelerating the universe's expansion.

"Over the past decade, a group at Yonsei University has argued that supernova distances should be calibrated differently by accounting for the ages of the stars that eventually explode, and that this 'age effect' could substantially alter the evidence for acceleration. In our study, we found no evidence for the claimed 'age effect' in the largest calibrated supernova samples used by the cosmology community over the last decade," astrophysicist Adam Riess of Johns Hopkins said. Astrophysicist Young-Wook Lee of Yonsei University, located in Seoul, was one of the leaders of the 2025 study. He defended the findings of his team, and said the main arguments made by the researchers in the new study have "serious methodological flaws or lead to conclusions that are internally inconsistent by their own logic."

The researchers in the new study expressed confidence in their methodology and their conclusions confirming acceleration.

THE SCIENCE QUIZ

A quiz on counterintuitive effects

Vasudevan Mukunth

Please send in your answers to dailyquiz@thehindu.co.in

QUESTION 1

The _____-_____ phenomenon is a cognitive bias where something you've noticed for the first time recently suddenly seems to appear everywhere. It arises because you've simply learnt to notice the item more often when you encounter it and you remember each encounter. Fill in the blanks.

QUESTION 2

The Dzhanibekov effect describes an object spinning freely about its intermediate principal axis, the axis whose moment of inertia lies between the other two. As small disturbances accumulate, the object will reverse its orientation by ____ repeatedly even as it continues to spin. Fill in the blank with the value of an angle.

QUESTION 3

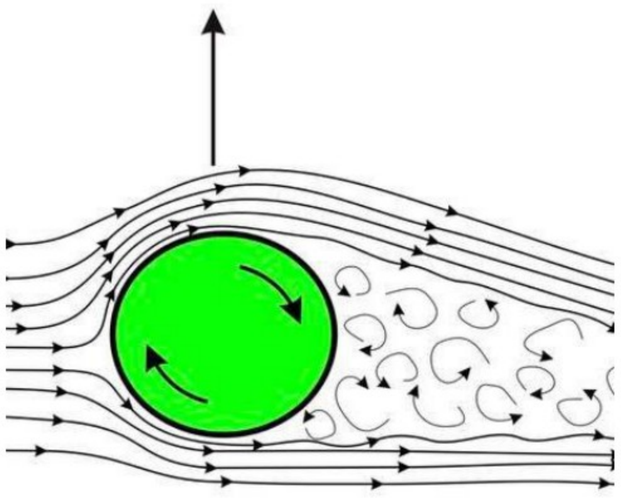
When a thin stream of a shear-thinning liquid, such as shampoo or liquid soap, strikes a surface of the same fluid, the latter may suddenly leap. This is called the X effect, and it happens because the rapid flow reduces the fluid's viscosity, creating a lubricating layer that redirects part of the incoming stream. Name X.

QUESTION 4

The _____ effect describes how people may adjust their behaviour in response to increased safety measures by taking greater risks. Named after the American economist, the effect suggests that some benefits of interventions such as seat belts and helmets can be partly offset by riskier behaviour. Fill in the blank.

QUESTION 5

Sometimes, efforts to suppress some information can have the unintended effect of amplifying it to more people. Name the American artiste for whom this effect is named. In 2003, this artiste tried to remove an aerial photograph of her home from the public domain, which only popularised the image further.



Visual: Name the force depicted by the large vertical arrow here. When a spinning football sails through the air, its path might curve sideways. This is because as the ball spins, air moves faster on one side and slower on the other, creating a pressure difference that deflects the ball. RDURKACZ (CC BY-SA)

Answers to June 16 quiz:
1. Light you still see in a perfectly dark room – Ans: **Eigengrau**
2. Organelles that synthesise melanin – Ans: **Melanosomes**
3. Structural components of Vantablack – Ans: **Carbon nanotubes**
4. Radiation thought to be emitted by black holes – Ans: **Hawking radiation**
Visual: **Peacock spider**

Woman 'strangled to death' by live-in partner

The Hindu Bureau
BENGALURU

The accused Sharath and the deceased Anusha N.D., were natives of Sakleshpur and became acquainted through social media.

A 20-year-old woman was strangled to death allegedly by her live-in partner following a quarrel at their rented house in Malleswaram, within the jurisdiction of the Seshadripuram Police Station.

The deceased has been identified as Anusha N.D., while the accused, Sharath, 25, works as a water tanker driver. Both are natives of Sakleshpur and had reportedly been living together for the past six months after becoming acquainted through social media. As per the police, the incident occurred on Saturday when an argument between the couple escalated. During the altercation, Sharath allegedly strangled Anusha to death.

The crime came to light on Sunday after Sharath reportedly informed a friend, who is a lawyer, about the murder. The lawyer subsequently alerted the police.

The police rushed to the house and found it locked. After noticing the house key near a window, officers gained entry and discovered Anusha's body inside. The body was shifted to Bowring Hospital for post-mortem examination.

The police have arrested Sharath and taken him into custody for further questioning. The exact motive behind the murder is yet to be established.

Minor boy dies after motorcycle crashes into barrier, falls from flyover

The Hindu Bureau
BENGALURU

Preliminary investigation suggests that over-speeding and reckless riding may have led to the accident. GETTY IMAGES/ISTOCKPHOTO

A 16-year-old boy was killed after the motorcycle he was riding allegedly crashed into a median and fell from a flyover in the early hours of Tuesday within the jurisdiction of the Mahadevapura Traffic Police Station.

The deceased has been identified as Lawrence, 16, son of Ravi Embu and a resident of Ayyappanagar in K.R. Puram.

According to the police, Lawrence left home at around 2.50 a.m. on a two-wheeler. While travelling from Tin Factory towards Kasturinagar on the Outer Ring Road bypass, he allegedly lost control of the motorcycle, which rammed a road safety barrier. The impact reportedly threw him off the flyover from a height of about 15 feet, causing him to crash onto the road median below and sustain critical injuries. Passersby rushed the injured boy to a nearby hospital and alerted the police. The Mahadevapura Traffic Police visited the accident spot and later shifted him to another hospital for advanced treatment. However, doctors declared him dead on arrival.

Preliminary investigation suggests that over-speeding and reckless riding may have led to the accident. The police said Lawrence's parents informed investigators that they were unaware he had taken the vehicle.

The RBI and its growing fiscal role

RBI's record ₹2.87 lakh crore surplus transfer to the Centre shows its growing fiscal significance, as earnings from reserve management and foreign assets support govt. finances; the trend raises questions about central bank independence, fiscal centralisation, and exclusion of such transfers from fiscal devolution to States

ECONOMIC NOTES

Deepanshu Mohan
Ankur Singh

The Reserve Bank of India continues to operate within a well-defined framework. REUTERS

Central banks occupy a peculiar position in modern democracies. Governments spend, tax, and borrow. Central banks manage inflation, preserve confidence in the currency, and safeguard financial stability. Their credibility rests on maintaining a degree of distance from the fiscal compulsions of the governments they serve.

Recent developments surrounding the Reserve Bank of India (RBI) invite a closer examination of that relationship.

Much of the recent discussion has focused on the RBI's management of foreign exchange reserves, interventions with respect to managing the rupee, including instances of reserve-rebalancing through gold sales, and increased foreign-currency holdings.

Yet, the more consequential story surrounding this is the extent to which the institution may be seen to be becoming more executive or fiscalised in its role to support the government.

In May, the RBI approved a record surplus transfer of ₹2.87 lakh crore to the Union government for FY26. While fully consistent with the Economic Capital Framework, its scale raises questions about the evolving role of the central bank within India's fiscal architecture.

A structural shift

Surplus transfers have been around the ₹30,000 crore to ₹65,000 crore level for the past few years. The tipping point was reached in 2019 after the implementation of the revised Economic Capital Framework.

The transfer is now at a record high of ₹2.87 lakh crore for FY26.

This move coincides with the phenomenal growth of the RBI's balance sheet. It increased by 20.6% in one year to ₹91.97 lakh crore by March 2026. Gross income increased by over 26% during the same period.

Traditionally, governments fund expenditure through taxation, borrowing, and revenue growth. Political consent is needed for taxation. Borrowing is disciplined by markets and future repayment obligations. Economic growth requires real growth in productive capacity.

Central-bank transfers are different. They generate fiscal space without new taxes, new borrowing, or commensurate growth in economic production. The latest transfer alone is bigger than the annual budgets of several Indian States.

This is not a bad practice to make such transfers. However, it does pose an interesting question. When does a stabilising institution start to act as a fiscal instrument?

The evolution of the RBI's reserve management is a good example.

The RBI may have sold almost $12 billion worth of gold and bought foreign-currency assets by about $7.5 billion in the face of rupee pressures, according to recent reports.

These are standard reserve-management decisions when looked at superficially. Central banks are constantly adjusting their portfolios based on market conditions. Gold is a strategic reserve asset. Foreign-currency assets are the source of liquidity for intervening in exchange-rate markets.

However, the management of reserves has become a financial issue.

The recent surplus transfer included a significant portion of gains from foreign assets, foreign exchange transactions, and interest earned on securities holdings. The activities are mainly being carried out to ensure monetary and financial stability, but are also producing increasingly significant fiscal revenues for the sovereign.

This is where the discussion transcends accounting. The RBI's balance sheet is now at ₹92 lakh crore. The composition of reserves, intervention in the exchange rate, and asset allocation decisions now impact not just monetary stability, but also the economy's overall health. They are becoming more and more important for fiscal results as well.

The experience of India is different from that of the advanced economies, where central banks became entangled with fiscal policy by engaging in quantitative easing and buying a large number of bonds. In this case, the link has come about because of the increasing significance of the fiscal value of central-bank earnings.

The federal blind spot

The least talked about part of this debate is fiscal federalism.

The total amount of ₹2.87 lakh crore transfer is non-tax revenue and hence it is a Union government gain. It is not part of the divisible pool of income tax collections or GST revenues which are subject to Finance Commission formulas. There is no automatic share to the States.

States still have significant spending obligations. Concurrently, they have restrictions on borrowing under Article 293 and have much less fiscal flexibility than the Union government.

However, one of the biggest transfers of resources from the public sector in recent years is still not part of fiscal devolution.

The point isn't whether States have a legal claim to RBI profits. They do not. The question is whether a central institution acting on behalf of the monetary union as a whole should indirectly support fiscal centralisation, without any mention of accountability, transparency or federal balance.

Dividend transfers, cesses, surcharges and borrowing restrictions are all considered to be individual policy instruments when viewed individually. Together, they show a progressive shift in the fiscal landscape of India towards the centre.

An evolving institution

The debate over the RBI's record surplus transfer is therefore not ultimately about the dividend itself. It is about how modern states finance themselves.

The central bank has evolved from being primarily a guardian of monetary stability into an increasingly important source of fiscal capacity. The latest transfer may have eased borrowing pressures and strengthened the government's fiscal position, but it also underscores how closely monetary institutions and fiscal outcomes have become intertwined.

The RBI continues to operate within a well-defined framework and retains substantial operational autonomy. Yet central bank independence is not merely a matter of legal design. It is also a question of institutional distance.

As surplus transfers become larger and fiscal pressures intensify, preserving that distance may become more difficult. It may also become more important.

THE GIST

- The RBI's balance sheet increased by 20.6% in one year to ₹91.97 lakh crore by March 2026, while gross income rose by over 26% during the same period.
- The RBI may have sold almost $12 billion worth of gold and bought foreign-currency assets by about $7.5 billion in the face of rupee pressures, with the recent surplus transfer including gains from foreign assets, foreign exchange transactions and interest earned on securities holdings.

What does the India-Russia logistics agreement allow?

What is RELOS, and does it allow India and Russia to station troops on each other's territory?

Dinakar Peri

The story so far:

The India-Russia bilateral Logistics Support Agreement (LSA), termed the Reciprocal Exchange of Logistics Agreement (RELOS), which had been dragging on for several years, was operationalised in January this year. There was a flutter on social media recently with claims that it allows the stationing of 3,000 Russian troops on Indian soil or vice versa, painting it as a military alliance. However, it is like any LSA, the likes of which India has signed with other countries.

What are Logistics Support Agreements?

A logistics agreement is a foundational military cooperation agreement between countries for administrative purposes that enables the reciprocal use of each other's bases and ports for supplies, repair, and fuel. The agreement also stipulates the occasions on which this can be utilised, generally for exercises, joint training, port calls, and Humanitarian Assistance and Disaster Relief situations. As defence cooperation and military-to-military engagement become vital in international relations, the agreement simplifies essential administrative procedures and reduces bureaucracy.

For instance, the agreement with the U.S., Logistics Exchange Memorandum of Agreement (LEMOA) signed in 2016, the first such, provides a framework for reciprocal provision of logistic support, supplies and services for activities such as joint exercises, training, or humanitarian assistance and disaster relief. "It does not provide for the establishment of any bases or basing arrangements," Minister of State for Defence Subhash Bhamre said in a written reply in the Parliament in February 2017.

If the hyperbole is to be believed, India and Russia can station troops on each other's territory, then by convention, it also means that India and the U.S. can do the same under the LEMOA. But that is grossly incorrect, as clarified by the Minister, and is so for any LSA.

What are the existing agreements?

India has signed a series of logistics support agreements since the LEMOA in 2016. Currently, India has similar agreements with nine countries – the U.S., the U.K., France, Vietnam, Japan, Australia, Singapore, and Russia – concluded on similar lines, which provide logistics support and technical aid. The basic template and purpose for all these remain the same. There is also one with Oman covered under the overarching defence cooperation agreement.

What is the agreement with Russia?

Like other agreements, RELOS defines procedures for supporting military formations, port calls of warships, and the use of airspace and airfield facilities by military aircraft of both countries and the organisation of logistics and technical support of military formations of warships, military aircraft, and other equipment.

The agreement was signed in Moscow on February 18, 2025, and Russian President Vladimir Putin signed the federal law ratifying it on December 15, 2025. According to the Kremlin, the purpose of the agreement is to define the procedures for the deployment of military formations, port calls by warships, and the use of airspace and airfield infrastructure by military aircraft of the two countries.

Broadly, RELOS covers joint military exercises, training, HADR missions, port and repair services, medical support, as well as delivery of food and technical resources and reciprocal access to military facilities, including airbases and ports, to support ship and aircraft personnel.

The agreement stipulates a maximum of 3,000 troops, representing a broad upper limit that takes into account the size of contingents and the number of ships or aircraft that may visit during engagements mutually agreed upon by both sides. It is valid for a period of five years, allowing for revisions later to reflect changing circumstances and requirements. The time frame for positioning of assets and personnel would be subject to the visit mutually agreed upon by both parties, one official said.

In fact, the scale of bilateral and multilateral relations between India and other countries is much larger. Indian armed forces exercise with the U.S. now.

Also, the agreement does not confer any provision for permanent basing of assets, and the agreement shall be exercised during joint exercises, port calls, or visits mutually agreed by both nations based on provisions of the agreement, officials clarified. "No permanent or long-term stationing has been agreed upon as part of the Agreement."

One important aspect is that RELOS gives access to Russian military facilities in the Arctic as both countries expand cooperation there, as new navigation routes open up, a fallout of global warming.

Political battle sharpens over Bidadi project issue

BJP promises to scrap township project if it comes to power

The Hindu Bureau
BENGALURU

BJP State president B.Y. Vijayendra, Leader of the Opposition in the Legislative Assembly R. Ashok and other leaders speaking to farmers who are protesting against the Bidadi township project.

Heightening their resistance to the acquisition of farm lands for the proposed Bidadi Integrated Township project, leaders of the opposition BJP on Wednesday visited the affected villages to express solidarity with farmers who are set to lose their lands and announce that the BJP-JD(S) coalition will scrap the project if it comes to power in 2028.

Leader of Opposition in the Assembly R. Ashok, who was part of the delegation with Leader of the Opposition in the Council Chalavadi Narayanaswamy, BJP State president B.Y. Vijayendra and senior legislators S. Suresh Kumar and C.N. Ashwath Narayan, told mediapersons after meeting Bidadi farmers that there was no point in Chief Minister D. K. Shivakumar continuing with "forced" land acquisition.

Short term

"It is for sure that Chief Minister D.K. Shivakumar cannot implement this project as he just has one and a half years left in his term," Mr. Ashok maintained. Accusing the Congress government of wrongly claiming that the lands being acquired were barren, he said all the land parcels in Bidadi were fertile.

Mr. Ashok, who visited a primary co-operative milk collection centre in Bidadi, said the data showed that milk worth ₹25 crore is being procured annually from the area. Similarly, the sericultural sector in the area was earning a revenue of ₹35 crore a year.

Seeking to debunk the argument that farmers could rebuild their lives with the compensation, Mr. Ashok cited the example of his own family, "My family was given a compensation of ₹65,000 for 65 acres that was acquired long ago in Jalahalli of Bengaluru. But not even a single paisa from this compensation is left with us." He accused Congress's top leader, Rahul Gandhi, of practising double standards by remarking that Mr. Gandhi, who had visited the Andaman-Nicobar Islands to express concern over environmental destruction over the port project, was now silent over his own party government's move to acquire fertile farm lands for township project.

BJP State president B.Y. Vijayendra took exception to Mr. Shivakumar claiming that Prime Minister Narendra Modi had hailed him for taking up Bidadi Township project and asked him not to drag Mr. Modi's name for his own selfish political interests.

Mr. Vijayendra alleged that the Congress government was using goondas to terrorise the resisting farmers. He urged the Chief Minister to desist from such illegal measures to forcibly acquire land.

Unable to accept Shivakumar as CM, Oppn. creating hurdles, says MLA

The Hindu Bureau
BENGALURU

The BJP and Janata Dal (Secular) leaders are opposing the Bidadi Township Project purely for political reasons, as they are unable to digest D.K. Shivakumar becoming Chief Minister, said H.C. Balakrishna, Magadi MLA.

Under way for long

"The land acquisition process was under way even when Siddaramaiah was Chief Minister and some farmers were opposing it. Why did H.D. Kumaraswamy and R. Ashok not come forward to fight for these farmers at that time?" questioned the MLA, speaking to presspersons in Bidadi on Wednesday.

Leaders from "our community" (referring to Vokkaliga) in other parties are unable to accept Mr. Shivakumar as Chief Minister, he alleged.

"They expected the Congress to be destroyed by internal conflicts. They believed that Mr. Siddaramaiah would never relinquish power and that Mr. Shivakumar would never become Chief Minister. They are unable to digest the fact that Mr. Siddaramaiah handed over power," he said.

Mr. Balakrishna stressed that the project was not initiated by Mr. Shivakumar, but by Mr. Kumaraswamy in 2006.

"After our government came to power, farmers submitted petitions demanding either the removal of the Red Zone classification or compensation. It was in response to those demands that this project was revived," he said.

'No longer agricultural'

Mr. Balakrishna claimed that most of the land in Bidadi is "no longer agricultural" but already been converted into real estate layouts. "Had Mr. Kumaraswamy not declared it a Red Zone, all of it would have fallen into the hands of the real estate mafia by now. Land conversion has not been possible because of the Red Zone classification, and these areas have remained agricultural land," he said.

DKS indulging in 'smear campaign': HDK

The Hindu Bureau
BENGALURU

Taking exception to posters with mentions of his family members that have allegedly come up around Bidadi, Union Minister for Heavy Industries H.D. Kumaraswamy on Wednesday accused Chief Minister D.K. Shivakumar of being behind a "smear campaign." The JD(S) has also urged people to participate in the padayatra on June 21 from Anchipura to Hosuru, in which Nikhil Kumaraswamy will be participating.

The posters carried his and his son Nikhil Kumaraswamy's photo and claimed that both owned 100 acres, he said.

"I had assumed that after becoming the Chief Minister, he would stop resorting to such tactics, but he has not. I will not be weakened by the personal attacks and my fight will only become intense," the Union Minister told presspersons here.

Stating that defaming was the last resort of those who were incapable of confronting issues politically, he said, "This is exactly what Mr. Shivakumar is doing by indulging in a poster campaign to malign me. They have used my wife's photographs." He claimed that posters were also put up against R. Ashok, Chalavadi Narayanswamy and B.Y. Vijayendra.

The Union Minister claimed that the total extent of land in his name was 46 acres, which he purchased four decades back. "Anita Kumaraswamy (his wife) has purchased about 37 acres," he said.

Pointing fingers at the Chief Minister, he alleged, "This is the man with the dubious history of grabbing land by obtaining the thumb impression of a deceased person. The same person who usurped land in Benniganahalli is now getting posters put up through his associates."

Owner of security agency says he was abducted, robbed of ₹1.09 cr.

The Hindu Bureau
BENGALURU

The Madanayakanahalli Police have registered a case after a 41-year-old man alleged that he and his driver were abducted at knife point and robbed of ₹1.09 crore in cash by a gang of seven unidentified men on the outskirts of Bengaluru.

According to the complaint filed by Shiva Shankar, a resident of Dasanapura Hobli and owner of a security agency, he had been involved in a business venture with associates from Andhra Pradesh, including individuals identified as Mohammed Pavlaj, Jipson and Aleem.

The group was allegedly engaged in investment-related dealings through a company

In his complaint, Shiva Shankar stated that he had received ₹35 lakh in cash from the Andhra Pradesh-based associates on June 13 and kept the money at his residence.

Two days later, on June 15, he allegedly received another ₹74 lakh at a hotel in Yelahanka and was transporting the cash in his car along with his driver, Chethan.

Around 11.05 p.m., while travelling off Kunigal Road in the Madanayakanahalli police limits, a bike and a car allegedly intercepted their vehicle.

A gang of seven unidentified men armed with knives and beer bottles reportedly threatened the duo, forced them out of the car and abducted them.

The complainant alleged that the gang confiscated their mobile phones, threatened them and demanded money.

The accused allegedly forced him to contact his wife and instruct her to hand over the ₹35 lakh kept at home. The cash was subsequently collected by some members of the gang, he claimed.

Shiva Shankar further alleged that the gang also made away with the ₹74 lakh that was in the car, taking the total amount robbed to ₹1.09 crore.

The accused later abandoned the victims and fled from the scene.

Based on the complaint, the Madanayakanahalli Police have registered a case under Sections 140(2) (kidnapping/abduction) and 310(2) (robbery) of the Bharatiya Nyaya Sanhita (BNS), 2023.

Efforts are under way to identify and trace the seven accused persons.

CBSE schools in city go beyond textbooks to instil moral values, address social isolation

Rashmi Patil
BENGALURU

Schools in Bengaluru affiliated to the CBSE have introduced various activities from this academic year, taking learning beyond printed pages to real-life action. FILE PHOTO

To inculcate moral and ethical values among children and address rising concerns about social isolation and the impact of an increasingly digital world, schools in Bengaluru affiliated to the Central Board of Secondary Education (CBSE) have introduced various activities from this academic year, taking learning beyond printed pages to real-life action.

For instance, Delhi Public School (DPS) - Bangalore East, has introduced a "kindness table" to encourage students to move from "passive kindness" to actively demonstrating empathy.

Nidhi Cherian, head of school, DPS - Bangalore East, said, "We want children to actively show compassion, inclusion, and care for family, friends, and people around them. Kindness Table is a unique initiative we are introducing this year. It invites nominations of children for their acts of kindness."

The school will review and select students to receive "Kindness in Action" badges and an invitation to share a meal with the head of school at the school canteen.

Saandeepani Academy of Excellence in Sompura has introduced "restorative circles" for children. Restorative circles are formed and led by children themselves, under the guidance of teachers, to address behavioural issues and resolve conflicts by sitting across the table for discussion.

Latha M., director of the academy, said, "Punishment will only instil fear and they will correct themselves temporarily. However, in restorative practices, one might not see immediate results, but they are gradual and long term. For instance, a child who was hurt by the comments made by her classmates addressed the issue by forming a restorative circle. She shared what it felt like hearing those comments and the impact they had. When other children realised it was wrong, they apologised. They understood that passing comments is no longer fun and that it seriously affects others."

This year, the school has also introduced a framework to address digital wellness and screen time for students. "We will involve parents, along with children, in these digital wellness sessions so that good practices continue at home as well," she added.

A faculty member representing National Public School said it has introduced life skills classes in a new format. "Earlier, life skills, more commonly known as Moral Science, were only taught through textbooks. Now, we have introduced practical sessions around some themes," she said.

Bengaluru second-best AI cluster in Asia, top 15 start-up ecosystem globally

Shilpa Elizabeth
BENGALURU

Bengaluru-Karnataka is ranked 15th among the world's top 40 start-up ecosystems, according to the Global Start-up Ecosystem Report (GSER) 2026 released at VivaTech, Paris, on Wednesday. The city, ranked in the top six start-up ecosystems in Asia, has also emerged as the second-best AI-native cluster in the continent after Beijing.

High in R&D, AI

Silicon Valley, New York City and London retained the top three positions, with no change from last year. Bengaluru, which was ranked 14th in 2025, slipped to 15th, although no ecosystem has been ranked 14th this year in the report. Instead, Toronto-Waterloo and Paris are tied at 13th.

The report analysed six success factors – performance (in terms of exits, ecosystem value and start-up success), funding, market reach, talent and experience, AI-native cluster, and R&D engine – to arrive at the rankings. Each factor is scored between 1 and 10, with 10 being the highest.

Bengaluru scored 9 in performance and R&D, 8 in AI-native cluster, and 7 each in funding and market reach.

Low in talent

Surprisingly, the city, whose talent pool has been its bragging point, scored only 4 under 'talent and experience'.

In terms of the quality and access of tech and life sciences talent, Bengaluru scored just 1, although it scored 10 in cost efficiency average of software engineer salaries and in the number of STEM students and graduates.

City vs. global averages

The city surpassed global averages on several counts such as ecosystem value, total Venture Capitalist funding, total early-stage funding, exit amount and exit count.

With 30 active unicorns, Bengaluru is well ahead of the global average of 11. The ecosystem is valued at $153 billion.

The total VC funding that flowed in between 2021 and 2025 amounted to $39 billion, far higher than the global average of $5 billion for the corresponding period.

The top-funded start-ups include Zepto, Meesho and Udaan. The exit amount between 2021 and 2025 is also significantly higher, at $46 billion compared to the global average of $7.6 billion.

Salaries remain low

However, the salary of a software engineer in the city, as of 2025, is recorded at $19.6K, much lower than the global average of $54K and the regional (Asian) average of $27K.

Strong subsectors

"Bengaluru-headquartered start-ups have raised a total of approximately $79 billion in VC funding since 2010. The State has captured about 46% of all VC investments into Indian start-ups, playing a key role in a national ecosystem that has created over 140,000 technology start-ups during the same timeframe," the report stated.

Terming AI and deep-tech, aerospace, space and defence tech, and quantum computing as the sub-sector strengths of the region, the report also highlights the Karnataka government's Start-up Policy 2.0, programmes such as KATALYST and LEAP, and the Karnataka Digital Economy Mission (KDEM).

'Ahead of Silicon Valley'

"In terms of specific parameters, we have done very well in 'performance' and in 'R&D', where we are ahead of even Silicon Valley.

In terms of AI readiness, we have also done very well," said B.V. Naidu, KDEM chairman, speaking to *The Hindu*. He acknowledged that the ecosystem needs to do better in terms of market access, where Bengaluru-Karnataka scored 7 out 10 in terms of global reach, but only 4 points in local access.

"We have been talking to the government to provide some kind of a preferential market access to start-ups," he said.

Mr. Naidu also added that the team will look into why Bengaluru scored low on 'talent' and hopes to improve it in the coming days.

In 2025, Bengaluru climbed seven spots to reach the 14th place in the ranking of global start-up ecosystems. Mr. Naidu expressed hope that the ecosystem can climb further up in the coming years by working on areas where it lost a few points this year.

Bengaluru-Karnataka's start-up edge

Bengaluru-Karnataka is India's highest-ranked start-up ecosystem, emerging as:

- **15** global start-up ecosystem
- **6** Asia start-up ecosystem
- **2** Asia ecosystem in AI native cluster

Scorecard*

The World Cup between the magic of football and the reality of power

Three books capture how the football World Cup has become entwined with power, politics and sportswashing; yet despite controversies and the growing influence of powerful interests, the tournament retains an emotional pull that continues to captivate fans worldwide

Suresh Menon

In his classic *Soccer in Sun and Shadow* (Nation Books), the Uruguayan writer and poet laureate of the sport Eduardo Galeano says, "Soccer is a pleasure that hurts." This refers both to the fan's reaction while watching his team play and the despair over how autocrats are stealing the beautiful game. And it seems to be happening again – this time in a democracy, with the U.S. hosting this year's World Cup alongside Canada and Mexico. Ticket prices are ridiculously high because Gianni Infantino, the president of football's governing body FIFA, wants to maximise revenue as he bids for re-election next year. Parking for one of the quarterfinals alone costs $900. The number of teams has expanded to 48, which will likely result in some mediocre matches. Tough visa regulations are discouraging fans. This could be a World Cup squeezed between two presidents with similar notions of self-aggrandisement.

FIFA has cash reserves larger than Cuba or Kenya, and more than twice that of Curacao, the smallest country at the World Cup. It is a monopoly, so the fan, unlike the customer, is seldom right. Matches are played to satisfy television viewers in Europe, even if it means playing at odd hours and at odd times of the year, such as in Qatar in November.

The larger context

How did the people's sport come to this? Three recent books seek to explain the change. No one believes today that sport exists in a vacuum, independent of the politics and culture around it. No history of the World Cup, therefore, can afford to focus only on the matches while ignoring the larger context. Earlier accounts did that. As early as the 1938 tournament, Benito Mussolini had already hijacked the event to promote his vision of a muscular, triumphant Italy, an episode that is rarely featured prominently in those accounts.

The final of the 2022 tournament in Qatar was one of the finest, but the politics leading to it were unsavoury. Jonathan Wilson writes in *The Power and the Glory: A New History of the World Cup* about how things were arranged. Following a lunch nine days ahead of the vote with the then French President Nicolas Sarkozy, the Crown Prince of Qatar, and other dignitaries, Michel Platini, the then head of UEFA (Union of European Football Associations), was advised by Sarkozy to vote for Qatar. Platini, who had been against the move earlier, went with it. Soon Qatar Sports Investment bought a majority stake in the Paris Saint-Germain club, Al Jazeera launched beIN Sports to challenge the French TV channel Sarkozy disliked, and Qatar ordered 36 Rafale jets from France for around $10 billion. As Wilson says, "The relationship between France and Qatar was mutually beneficial and extremely lucrative." Those at that lunch denied any connection between these events. Later, Platini was investigated for corruption and acquitted.

Exploiting the World Cup

But sportswashing did not begin with Qatar. "Long before the term 'sportswashing' had entered the general consciousness, long before Russia (host in 2018) and Qatar had shown that you didn't have to win the tournament before gaining propaganda success, that hosting was enough, the World Cup was being exploited," writes Wilson, a popular historian of the game.

When Lionel Messi lifted the World Cup in 2022, he did so with a *bisht*, a traditional Qatari cloak, draped across his shoulders. It was a victory for Qatar, too. "The state's autocratic ruler ensured the hosts intruded upon this moment of football history. The *bisht* may be entirely innocent but the bestowing of it was not," argues Miguel Delaney in *States of Play: How Sportswashing Took Over Football* (Seven Dials). Modern football, says Delaney, a football writer of *The Independent*, represents extreme economic neoliberalism distilled into sporting form. "It sucks up money from everywhere but then redistributes it as narrowly as possible."

The 'easternisation' of football has seen Qatar (Paris Saint-Germain), the UAE (Manchester City, Palermo, Girona), and Saudi Arabia (Newcastle United) own clubs in Europe and elsewhere, and pay international stars (Messi, Cristiano Ronaldo, Neymar) to play in their leagues. If the balance of power is shifting, there are millions of reasons.

In the run-up to 2022, Qatar had been criticised for its treatment of women, migrants, and the LGBTQ community. But as Simon Kuper, the *Financial Times* writer, says, "Qatar and FIFA got through the tournament unscathed. All their flaws combined couldn't do lasting damage to the World Cup."

In his personal diary/social commentary/history/political tract/memoir/travelogue *World Cup Fever* (Profile Books Ltd), Kuper, who writes engagingly and with humour on the sport, points to FIFA's consistent willingness to embrace brutal regimes, from Argentina's military junta of the 1970s to Vladimir Putin's Russia and Mohammed bin Salman's Saudi Arabia.

Of the recent books, Kuper's bears comparison with Galeano's masterpiece for its rich mixture of passion and indictment. The criticism of those who love the game comes from a place of sadness.

Purity in the game

Reporting on nine World Cups, with all their negative energies, pedestrian matches, politics, and lost opportunities, has not dulled Kuper's enthusiasm for the game. And that is the strength of not just this book, but in fact all the books discussed here. They are written by men who understand that somewhere beneath it all, there is a purity to the game which can be seen untrammelled by the selfishness of megalomaniacs.

"The World Cup is a vision of an alternative international hierarchy in which the U.S. is an also-ran and China doesn't even figure," says Kuper in a throwaway line that hints at its attraction for many nations.

A return to childhood

Spanish writer Javier Marias called football "the weekly return to childhood." Perhaps that is the key. The World Cup is a return to childhood at four-year intervals. It is when we say: Forget the FIFA, enjoy the centre forward's run. Did you see that save? Or if we are supporters of Argentina: If Messi be for us, who can be against us?

The World Cup doesn't solve the world's problems, but it can focus attention on them. Saudi Arabia will host the World Cup in 2034. We are guaranteed more of the same, some of it depressing, some elevating. Meanwhile, over the next few weeks, let us celebrate the magic.

(The writer's latest book is Why Don't You Write Something I Might Read?)

THE DAILY QUIZ

Here is a quiz on events that happened on June 18

Please send in your answers to dailyquiz@thehindu.co.in

Sindhu Nagaraj

QUESTION 1
On this day, which U.S. President signed a declaration of war against Great Britain, initiating the War of 1812, which arose chiefly from U.S. grievances over oppressive maritime practices during the Napoleonic Wars?

QUESTION 2
Which English musician, born on this day, gained global fame with the Beatles?

QUESTION 3
The SALT (Strategic Arms Limitation Talks) II treaty, signed on this day, was signed by which two countries?

QUESTION 4
On this day in 1940, which French General, broadcasting from London, after France fell to the Nazis, appealed to his compatriots to continue World War II under his leadership

QUESTION 5
British explorer and mountaineer George Mallory was born on this day in 1886. His story became one of the most-celebrated mysteries of the 20th century. Where did he disappear?

QUESTION 6
This American suffragist was fined after being convicted for voting in the 1872 presidential election, though she refused to pay it. Who was she?

Visual Question:
Identify this person. She became the first American woman to fly into outer space in 1983.

Questions and Answers to the previous day's daily quiz: 1. What do the colours on the Icelandic National flag represent? **Ans: Mountains, white ice, and volcanoes**
2. Who is Jón Sigurdson in the modern history of the country? **Ans: He was the 19th-century leader of the independence movement whose birthday is now observed as National Day**
3. Name the volcano whose eruption in 2010 created a massive ash cloud that grounded thousands of flights across Europe. **Ans: Eyjafjallajökull**
4. Name the 13th-century book by Icelandic author Snorri Sturluson that serves as a primary source for Norse mythology. **Ans: Prose Edda**
5. What is the name given to the popular traditional Icelandic knitted sweater known for its bold, circular yoke pattern around the neck and shoulders? **Ans: 'Lopapeysa'**
6. Often mistaken as yogurt due to its creamy texture, what dairy product is technically classified as a soft cheese? **Ans: Skyr**
7. Which natural phenomenon inspired the first Norse settlers to give the National capital, Reykjavík (smoky bay), its name? **Ans: Steam from the geothermal hot springs**
Visual: Name this famous Icelandic singer. **Ans: Bjork**
Early Birds: Tamal Biswas | K.N. Viswanathan | Lalchand Bhutani | Pankaj Gharde | Deepak Jiloha

FROM THE ARCHIVES

Know your English

S. Upendran

"Happy new year!"
"A Happy New Year to you too. You don't look too good. Too much dancing last night?"
"Not really. I stayed awake till 5:00 in the morning. That's all."
"You look terrible. Go into the drawing room and take a load off your feet."
"What load are you talking about?"
"When someone says, 'get a load off your feet', it means they want you to sit down and relax."
"I see. But didn't you say, 'take' a load off your feet the first time?"
"That's right. You can either say, 'take a load off your feet', or 'get a load off your feet'. Both are acceptable."
"So, can I tell someone, 'Come on in, and take a load off your feet'?"
"Yes. Here's another example. Get a load off your feet and have a drink."
"A drink! That's nice. What is it that you are offering?"
"That was just an example."
"You are such a lousy host. Anyway, what did you do during the Christmas break?"
"Nothing much actually. Just let the grass grow under my feet."
"What does that mean?"
"It means that I didn't do anything...."
"....Geetha is the only person I know who doesn't let the grass grow under her feet."
"Most people I know who work in Government offices let the grass grow under their feet."
"Isn't that what people working in Government Departments are supposed to do? Many of my cousins think that I let the grass grow under my feet. Anand keeps telling me this all the time."
"How is Anand doing by the way? Does he like the new job?"
"He is still finding his feet."
"Finding his feet! Has he lost them?"
"Ha! Ha! The expression 'to find...."
"....I know what the expression 'to find one's feet' means. It means getting used to a new situation. Am I right?"
"Absolutely. When I joined the company, my boss said that I would need time to learn about how the company works. He said that I would find my feet gradually."
"When my cousin went to the States, she was miserable. But when she called us up last week, she said that she was finally beginning to find her feet."
"That usually happens to people who push off to the States. First, they hate the place. Later, they fall in love with it and they don't want to come back home."
"That's true."
"Here's another example. When my cousin Gayathri was made the Principal of her college, she was all at sea. Now, she is slowly finding her feet."
"Isn't she an actress?"
"No, that's my cousin Ambika. Gayathri is the one who wrote a couple of plays."
"Does she still write....?"
"....I don't think so. The last one she wrote, the audience voted with its feet."
"Another expression with feet?"
"When you 'vote with your feet', you show your displeasure about something by walking out. You ...."
"....in other words, if you don't like something, you just get up and walk."
"That's right. When the superstar's latest movie was released, a lot of people voted with their feet. Many walked out after the first half an hour."
"The next time a politician visits our constituency, we should vote with our feet."
"That's a good idea!

High Court declares arrest of Gameskraft directors illegal

The court found that the ED had arrested them without issuing summons under the Prevention of Money Laundering Act

The Hindu Bureau
BENGALURU

The High Court of Karnataka has declared as contrary to law the arrest of Deepak Singh, Vikas Taneja and Prithviraj Singh, directors of Gameskraft Technologies Pvt. Ltd., by the Directorate of Enforcement (ED) in May following searches conducted in connection with an alleged fraud-linked money laundering case, and ordered their release from prison.

The court found that the ED had arrested them without issuing them summons under Section 50 of the Prevention of Money Laundering (PML) Act. Also, the court said that there was no new material to arrest them as they were not arrested despite searching their premises for a week during November 2025 on the same set of allegations based on which the searches were conducted again on May 7-8, 2026.

Justice M. Nagaprasanna passed the order on June 16 while allowing the petitions filed by Deepak Singh, founder and chief executive officer, Vikas Taneja and Prithviraj Singh, directors of the company, challenging only the legality of their arrest by the ED.

Can be summoned

However, the court made it "abundantly clear that the statutory powers vested in the ED under Section 50 of the PML Act remain wholly unaffected, and it shall be open to the ED to issue summons and proceed further in accordance with law, should the circumstances so warrant."

The court noted that the ED had previously conducted extensive searches between November 18 and 25, 2025 by registering an Enforcement Case Information Report (ECIR) based on a FIR registered by the Bengaluru police in 2024 on a complaint lodged by a user of company's online gaming platforms for alleged loss of ₹3 crore. At that time, the court pointed out, the ED did not deem arrest of the petitioners was necessary.

Also, the court noted the investigation against this ECIR was stayed by the High Court in January 2026 as the company pointed out that the Bengaluru police had filed 'B' report in the case as the company had settled the case with the complainant.

New ECIR

However, the ED registered a new ECIR in on February 23, 2026, based on three FIRs registered different police stations in Telangana on the same allegations of loss due to use of company's gaming platforms between 2017 and August 2015, when the company stopped operation of its gaming platforms following enactment of Promotion and Regulation of Online Gaming Act, 2025, the court noted.

Also, the court noted the ED neither summoned the petitioners for participating in the probe despite registration of new ECIR in February 2026 nor conducted searches of their premises till May.

The new grounds for arrest, served to the petitioners after searches conducted on May 7-8, were merely repackaged the same old allegations from earlier ECIR.

Stale material

"...the attempt to justify arrest on the strength of material already in possession of the ED from earlier proceedings runs contrary to the very architecture of Section 19(1) of the PML Act. The provision contemplates an assessment of the material available at the time of arrest; it does not countenance the resurrection of stale material to manufacture a fresh justification for deprivation of liberty. Section 19 [power to arrest] is not elastic enough to permit arrest on recycled suspicion when no new incriminating material has emerged," Justice Nagaprasanna observed.

"If the earlier ECIR, fortified by search and seizure operations spread over several days, did not persuade the ED that the arrest of the petitioners was either warranted or necessary, it is difficult to fathom how the very same material, merely paraphrased and transplanted into a new ECIR, could suddenly acquire the potency to justify their incarceration," the court said.

The ED had alleged that company's gaming platforms manipulated gameplay, cheated users crores of rupees through deceptive practices, and proceeds were laundered via foreign investments, movable and immovable assets, etc.

11 deaths in Mysuru Jayadeva not caused by negligence or staff shortage, says director

The Hindu Bureau
MYSURU

Medical Education Minister Sharan Prakash Patil at Sri Jayadeva Institute of Cardiovascular Sciences and Research in Mysuru on Wednesday. Institute Director B. Dinesh is seen. M.A. SRIRAM

Amid reports of the deaths of 11 patients at the Mysuru unit of Sri Jayadeva Institute of Cardiovascular Sciences and Research, allegedly in a span of 24 hours, the institute's Director B. Dinesh rushed to Mysuru on Wednesday to ascertain the reasons behind the fatalities following allegations of negligence and a shortage of doctors at the hospital.

The deaths have sparked concerns not only among residents of Mysuru but also among people from neighbouring districts, as the hospital serves as a major referral centre for affordable and specialised cardiac care in the region.

Rejecting allegations that a shortage of doctors had contributed to the deaths, Dr. Dinesh told reporters that all the deceased patients had been admitted in a critical condition after suffering heart attacks and after crossing the crucial "golden hour."

Addressing a press conference, he said Jayadeva Hospital receives between 600 and 800 patients every day, of whom nearly 20% arrive in a serious condition requiring immediate intervention.

Dr. Dinesh said the 11 patients were not admitted on the same day. All had suffered heart attacks and were undergoing treatment in the ICU. Most were elderly and had reached here after battling for survival elsewhere.

However, he acknowledged that patient inflow has increased significantly since last summer, creating a need for an additional 5% to 8% of medical staff. Recruitment is under way for 24 doctors, he added.

Meanwhile, Medical Education Minister Sharan Prakash Patil said the hospital's mortality rate remains well below the national average and that there was no evidence of negligence. Dr. Patil said he had sought a report on each death.

He said the mortality rate at Jayadeva's Bengaluru, Mysuru and Kalaburagi units ranges between 4% and 6%, against the national average of 9% to 11% for cardiac care institutions.

Prohibitory orders around Vidhana Soudha ahead of Council elections

The Hindu Bureau
BENGALURU

The Bengaluru police have imposed prohibitory orders under Section 144 of the BNSS within a one-km radius of Vidhana Soudha to ensure law and order, security, and the smooth conduct of the MLC electoral process on Thursday.

The order was issued on Wednesday by City Police Commissioner Seemant Kumar Singh. No processions, rallies, demonstrations, protests, victory celebrations, public meetings, or gatherings will be permitted within the prohibited zone. The assembly of over four persons has also been banned.

The police have tightened access to the premises. Entry will be allowed only on the basis of valid passes, and unauthorised persons will not be permitted inside. Access has been restricted to MLAs, MLCs, MPs, and authorised officials and staff working in Vidhana Soudha. Polling and counting agents carrying valid authorisation will also be allowed entry.

Tata Trusts to fund IIMB's 27-acre campus for undergraduates

The Hindu Bureau
BENGALURU

A file photo of the Indian Institute of Management Bangalore.

Tata Trusts committed a landmark grant to the Indian Institute of Management Bangalore (IIMB) on Wednesday to develop a world-class undergraduate campus in Bengaluru.

The grant, whose sum was not disclosed, will directly support the Institute's long-term academic vision, campus design, and institutional roadmap for excellence in higher education in India, said a communique from IIMB. Noel Tata, chairman, Tata Trusts, said, "The Tata Trusts have, for over a century, supported some of India's most defining institutions like the Tata Memorial Hospital and the Indian Institute of Science."

"This support reflects the same instinct: to build institutions of enduring value through support at an early, formative stage, when philanthropic capital can shape not just a building or a budget, but the character and ambition of an institution itself," Mr. Tata added.

> The Tata Trusts have, for over a century, supported some of India's most defining institutions like the Tata Memorial Hospital and the Indian Institute of Science
>
> **NOEL TATA**
> Chairman, Tata Trusts

The idea for the new School of Undergraduate Studies, located approximately 27 kilometres from IIMB's main campus, was conceived as part of the Institute's broader vision to contribute to undergraduate education in India with the same academic rigour and global orientation that define its postgraduate and executive education programmes.

The endowment will underpin the development of world-class academic and residential infrastructure. It will enable new research clusters at the intersection of emerging fields, including Artificial Intelligence, data science, algorithmic design, Indian Knowledge Systems, and applied business learning, said IIMB.

U. Dinesh Kumar, director-in-charge, IIMB, said, "We have designed programmes that not only equip students with technical proficiencies, but also enable young minds to ask better questions, interpret complexity, and lead with evidence."

The support from the Tata Trusts will allow IIMB to invest deeply in faculty, research infrastructure, and campus environment, thereby contributing to a state-of-the-art learning ecosystem focused on India's developmental priorities and committed to strengthening global capabilities, he added.

Come to office on time: DGP

The Hindu Bureau
BENGALURU

Director-General and Inspector-General of Police (DG&IGP) M.A. Saleem has issued a circular directing all police officers and staff working in offices across the State to strictly adhere to office timings and maintain punctual attendance.

In a circular issued on Wednesday, Mr. Saleem emphasised that government offices are the primary interface between the State and citizens, and that their efficient functioning is essential for ensuring good governance, transparency, accountability and public trust.

The circular noted that punctual attendance and timely commencement of official work are critical for efficient public service delivery and smooth administrative functioning.

It also stated that delays in the commencement of office work adversely affect the service delivery, administrative efficiency, and the disposal of official matters.

Referring to directions issued by Chief Minister D.K. Shivakumar, the circular stated that all government offices are required to commence functioning at 10 a.m.

Unit officers have been directed to verify personnel attendance via the Kartavya (KAAMS) app every day at 10 a.m.

'Aadhaar linkage must for new power connections in Bescom jurisdiction'

The Hindu Bureau
BENGALURU

Soon, applicants, including domestic, commercial, and farmers seeking new electricity connections, will have to obtain Aadhaar e-KYC authentication along with furnishing other documents for identity and address proof.

Following a request from Bangalore Electricity Supply Company Limited (Bescom), the Karnataka Electricity Regulatory Commission (KERC) has issued an order stating, "Every applicant seeking a service relating to the supply of electricity shall furnish the Aadhaar number with Aadhaar e-KYC authentication in accordance with the applicable provisions of law and the notifications issued by the Central Government and the Government of Karnataka from time to time."

A senior official from Bescom explained, "This is being done to verify the identity and address of the applicant. It is mandatory for all types of consumers. Once the applicant furnishes his or her Aadhaar number, an OTP will be sent to their mobile number. When the OTP is entered, it verifies the identity of the person electronically."

Boy bitten by neighbour's rottweiler

The Hindu Bureau
BENGAURU

The Mahadevapura Police have registered an FIR against the owner of a rottweiler and his family following an alleged attack on a 12-year-old boy and subsequent criminal intimidation.

According to the police complaint, the incident occurred on June 13 at around 2.30 p.m. in Maheshwari Nagar in Mahadevapura. The complainant, Vipin Vincent, an ex-serviceman, alleged that the rottweiler owned by his neighbour, identified as Shyam, was not properly restrained and was frequently allowed outside the house premises, posing a risk to the public.

The complaint states that the complainant's son was riding a bicycle on the street when the dog suddenly came out of the gate and bit him, causing injuries. When the boy's family approached the dog's owner regarding the incident, an argument allegedly broke out. The complainant alleged that Shyam, along with his wife Rajyalakshmi and their son, behaved aggressively, justified the dog's actions, and threatened the family with consequences if they pursued legal action.

The police have issued a notice to the accused.

Doddanna files cyber complaint over fake death rumours

The Hindu Bureau
BENGALURU

Doddanna

Veteran Kannada actor Doddanna has filed a complaint with the North Division cybercrime police in Bengaluru against unidentified persons for spreading false reports of his death on social media.

The complaint comes after a social media account named 'Public Friend' shared a post falsely claiming that the actor had passed away while offering condolences. The post quickly went viral, causing panic among his family members, fans and members of the film industry.

As rumours spread online, Doddanna was forced to appear before the media to clarify that he was alive and healthy. He urged the public not to believe unverified information circulating on social media platforms.

According to the complaint, the actor alleged that the misleading content had been edited and circulated using artificial intelligence tools, causing him severe mental distress and emotional trauma. He stated that the false reports had also deeply affected his family and well-wishers.

"This is not the first time such rumours have been spread about me. However, this time I have decided to seek legal action so that those responsible are held accountable," the actor reportedly told the police.

The complaint was officially lodged on Monday.

The police are now investigating to trace the IP address associated with the 'Public Friend' account and identify those responsible for creating and circulating the fake death news.

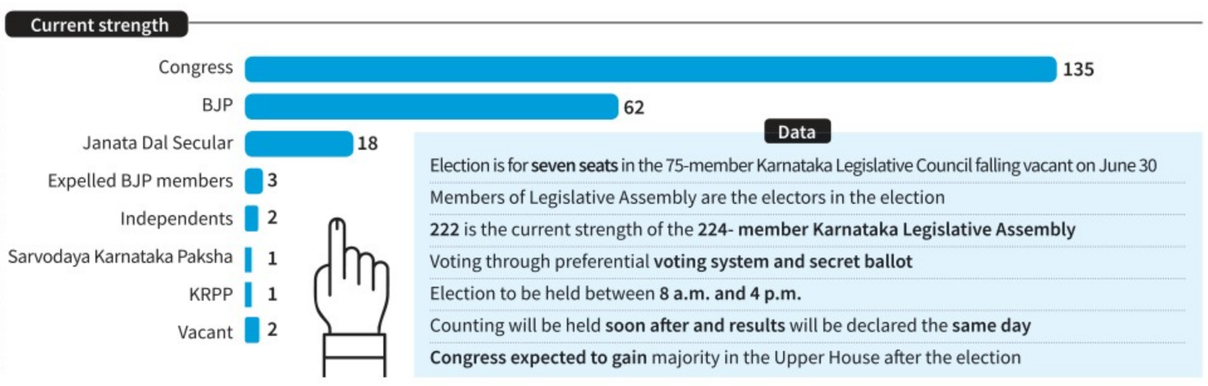
Candidates in fray

Congress
B.K. Hariprasad, B.S. Shivanna, P.V. Mohan, Tippanna Kamakanoor, Vinay Karthik

BJP
Lingaraj Patil, Raghu Kautilya

Janata Dal (Secular)
Govindraju



Current strength
Congress 135
BJP 62
Janata Dal Secular 18
Expelled BJP members 3
Independents 2
Sarvodaya Karnataka Paksha 1
KRPP 1
Vacant 2
Data
Election is for seven seats in the 75-member Karnataka Legislative Council falling vacant on June 30
Members of Legislative Assembly are the electors in the election
222 is the current strength of the 224- member Karnataka Legislative Assembly
Voting through preferential voting system and secret ballot
Election to be held between 8 a.m. and 4 p.m.
Counting will be held soon after and results will be declared the same day
Congress expected to gain majority in the Upper House after the election

Stage set for Council elections

The Congress, which now has 37 legislators in the Upper House, will get a majority with wins assured in four seats

The Hindu Bureau
BENGALURU

On the eve of the anticipated Legislative Council polls to seven seats that is expected to give the Congress a majority in the Upper House over three years after it came to power, number churning became the focus of parties that huddled their legislators on Wednesday.

While the Congress trained its legislators through mock voting in a resort near Bidadi, the Janata Dal (Secular) brought theirs to a resort near Nandi Hills, and the BJP legislators were trained in a hotel in the city.

Of the seven seats, the Congress and the BJP are expected to comfortably win four and two, respectively, and the former is tied in a battle with the JD (S) for the seventh seat in which Vinay Karthik is pitted against Govindaraju.

Apportioning votes

With a minimum of 28 votes expected for a win, parties strategised to apportion the votes among their candidates. There are also precedents of parties allotting one extra vote to the candidate for "safety"

Chief Minister D.K. Shivakumar during mock polling on Wednesday. SUDHAKARA JAIN

in case of any vote becoming invalid or legislators refraining or absenting from voting.

The voting is through secret ballot, which also gives anxious moments to parties. The second preferential votes play a crucial role, turning this into a number-churning exercise, especially when the contest for one seat is tight and fears of cross-voting have been expressed.

The Congress, which has a tally of 37 in the 75-member Upper House, will get a majority with wins assured in four seats. If it manages to win all five seats, its tally will go to 39.

In the 224-member Lower House, the current strength is 222 after the disqualification of Vinay Kulkarni and the demise of former Minister D. Sudhakar. The Congress has 135 members and has the support of two Independents, one Sarvodaya Karnataka Paksha member, and two members expelled from the BJP – S.T. Somashekar and Shivaram Hebbar. The BJP has 63 members, including G. Janardhan Reddy, while the JD(S) has 18 members and is expecting support of BJP expelled member Basanagouda R. Patil Yatnal.

Congress sources said the party conducted three rounds of mock voting, in which Chief Minister D.K. Shivakumar also took part. The Congress has over 30 first-time legislators. Multiple mock polls are being done to prevent any votes from becoming invalid.

The JD(S) legislators were also in a strategy meeting with Union Minister H.D. Kumaraswamy and were trained by senior and former members experienced in preferential voting system.

Meanwhile, it is learnt that though the JD(S) is seeking six votes from the BJP to be transferred to its candidate Govindraju, the BJP is yet to make up its mind.

"The decision on whether to keep 28 or 29 votes each for our candidate will be taken later," BJP sources said.

How numbers stack up

The Hindu Bureau
BENGALURU

Going by the book, each candidate has to secure 28 votes to win though political calculations are often different. Assuming the Congress allots 28 votes for each candidate, all the five candidates will sail through. However, with parties being vary of invalid votes and cross voting, at least one additional vote is given to each candidate.

Assuming the Congress allots 29 votes to the first four candidates, the party's fifth candidate will fall short of four votes and will end with 24.

The JD(S) – assuming the BJP transfers six votes – along with votes expected from G. Janardhan Reddy and BJP's expelled member Basanagouda R. Patil Yatnal will have 26, including 18 of its own.

Assuming the BJP allots 29 votes to each of its two candidates, it will be able to transfer only four votes to the JD(S) candidate dwindling his number to 24. For both, second preferential votes remain important unless cross voting gives them the number.

"In such a scenario, the second preferences provided in the surplus votes to the winning candidates will be considered for counting and value derived from it is added to the candidates tally. Many times, value of surplus votes will enable the candidate to win. Even after counting this, if the value does not cross 28, then the elimination rule will be applied to eliminate the candidate with least votes. These calculations can also change if there are invalid votes that brings the calculable values. The calculations are dynamic and it will be known only during counting," a government source explained.

Dharmasthala case: One phone call being read out of context, says Prakash Raj

The Hindu Bureau
BENGALURU

Actor Prakash Raj on Wednesday clarified his position on the controversial Dharmasthala case, stressing that he had no involvement in the matter except for a phone call, which is now being read out of context.

The clarification came days after reports emerged about Chinna C.N., alias Chinnaiah, 50, the central figure in the Dharmasthala mass burial case, mentioning Mr. Raj's name in a writ petition filed before the Karnataka High Court, where it was reportedly only a small reference.

According to the actor, Chinnaiah had contacted him after the SIT began its investigation. Speaking in a mix of Tamil and Telugu, he expressed fear and anxiety about his situation, the actor recalled. "My response was straightforward. I encouraged Chinnaiah to come forward with the truth if it were genuine," Mr. Raj said.

"I told him that if what he has is the truth, he should speak about it openly. I said the officer assigned to investigate the case is a good officer and that the truth coming out would be a moment of relief for everyone," Mr. Raj said.

The actor reiterated that he reassured Chinnaiah that there was nothing to fear if he was being honest and that he personally had no interest in the matter.

Actor Prakash Raj addressing a press conference in Bengaluru on Wednesday. SPECIAL ARRANGEMENT

> My response was straightforward. I encouraged Chinnaiah to come forward with the truth if it were genuine
>
> **PRAKASH RAJ,** Actor

The actor maintained that this brief exchange constituted the entirety of his involvement and said it should not be interpreted as "influencing the investigation" or "guiding" any individual. He added that his only intention was to encourage transparency and support due process.

Mr. Raj said that activist Girish Mattannavar had spoken to him regarding developments in the matter and that he immediately conveyed the information to Pronab Mohanty, head of the SIT probing the Dharmasthala case. "Mr. Mohanty had advised me not to entertain random calls or unverified claims without proper investigation," he said.

He urged the public not to communalise the issue, saying that questioning allegations and demanding accountability should not be mistaken for attacking religion or faith.

SIR: Under 'pressure' to meet targets, anganwadi workers seek exemption from BLO duties

The Hindu Bureau
BENGALURU

Claiming that they are under immense pressure due to unrealistic deadlines and targets, anganwadi workers across Karnataka have written to the Election Commission of India (ECI) seeking exemption from Block Level Officer (BLO) duties. They argued that the ongoing Special Intensive Revision (SIR) of electoral rolls has disrupted their main responsibilities of caring for children, pregnant women and lactating mothers.

The workers said they are being assigned strict voter verification of targets without adequate training on the revised procedures and are being threatened with suspension or other disciplinary action if the targets are not met.

Block Level Officers staging a protest in Bengaluru on Wednesday. ALLEN EGENUSE J.

"The pressure to complete electoral roll revision within tight deadlines has created a situation where anganwadi workers are being forced to prioritise SIR-related work over their primary responsibilities at anganwadi centres. However, children continue to attend the centres every day and cannot be left unattended. As a result, workers are struggling to balance both responsibilities and are unable to meet the targets set for SIR work," said S. Varalakshmi, State president of the Karnataka State Anganwadi Employees' Association.

The workers also staged a protest at Freedom Park on Wednesday. They said that the pressure has become so severe that thousands of workers have received warning notices threatening suspension, and many others are considering resignation because of the mental stress associated with the work.

They also raised concerns related to voter documentation. The workers argued that in many cases, applicants are unable to produce the documents being sought during the SIR process, particularly women who have moved after marriage from another district or State. Workers claimed that local officials are pressuring them to somehow complete the documentation process to meet targets. "Workers are being placed in a position where they are expected to meet targets but may later be held personally liable for discrepancies," the workers said.

Adding to this, workers said they are already burdened with multiple responsibilities under the Integrated Child Development Services (ICDS) programme. These include identifying and treating malnutrition among children below six years, monitoring the health of pregnant and lactating women, conducting home visits, maintaining records and updating data through the Poshan Tracker application.

High Court fiat to govt. on homestays

The Hindu Bureau
BENGALURU

The High Court of Karnataka has directed the State government to examine the feasibility of formulating a comprehensive policy and regulatory framework governing the establishment, operation and supervision of homestays.

Justice Suraj Govindaraj issued the direction while quashing the cancellation of the registration of a homestay in Kutta village of Ponnampet taluk in Kodagu district following the alleged sexual assault of a U.S. national in April.

The court held that the district authorities cancelled the registration without issuing notice and without adhering to the provisions of the Karnataka Tourism Trade (Facilitation and Regulation) Act, 2015. The court converted the cancellation order into a show-cause notice, allowing the petitioner, the owner of the homestay, to file a response to the notice.

Meanwhile, the court pointed to the increasing and recurring number of disputes and petitions arising out of actions taken against homestays on the basis of complaints from tourists, neighbouring residents, local authorities, and other stakeholders.

Nine areas

The court identified nine critical areas requiring attention: fire safety measures in residential buildings converted to host guests, food safety and kitchen hygiene standards, building compliance and zoning regulations, guest security and mandatory identity verification, consumer protection and pricing transparency, sanitation and waste management standards, clear delineation of responsibilities among various government departments, a structured and non-arbitrary inspection mechanism, etc.

Forest Dept. issues elephant camp safety protocol

The Hindu Bureau
BENGALURU

In a move to ensure visitor and staff safety, elephant welfare, accident prevention, and quick emergency response at all elephant camps in the State, the Karnataka Forest Department has released the Karnataka Elephant Camp Safety Protocol.

The protocol prohibits all kinds of physical contact between tourists and elephants.

The move comes in the backdrop of the recent death of a tourist and an elephant in a fight between two elephants at the Dubare camp.

Ten non-negotiable safety rules have been introduced, including the prohibition of any physical contact with elephants by visitors, such as touching, direct feeding, bathing, taking selfies near elephants, or standing close to them. It also specifies a zoning system, under which visitors must remain in the green zone behind barricades.

A minimum safe viewing distance, preferably 10 metres wherever feasible, based on site risk, is to be maintained. Not more than 50-75 visitors should be present at the green zone viewing point at a time, and a slot duration of 45-60 minutes, including briefing, guided viewing, interpretation, exit, and buffer, is recommended. Only authorised staff and emergency responders are allowed in the amber zone, which is the controlled staff area. In the red zone, which is the Elephant Operational Area, only mahouts, kavadis, veterinarians, and authorised forest staff are permitted.

INBRIEF

Fire breaks out at Vijayawada children's hospital; none hurt

A fire broke out at Rainbow Children's Hospital in Vijayawada, Andhra Pradesh, on Wednesday. No casualties were reported, and the patients were shifted to a nearby hospital, Fire Department officials said. Smoke began from the emergency ward and spread to the first floor. "We suspect the fire was caused by an electric short circuit, which led to an air-conditioner burning in the casualty ward. A thorough probe is on," the Fire Services Additional Director G. Srinivasulu said.

Traveller booked for assault of Lufthansa crew member

An air passenger was booked by the Rajiv Gandhi International Airport police after he allegedly assaulted a Lufthansa cabin crew member during a flight from Frankfurt to Hyderabad on Tuesday. The accused, B. Satish Kumar, allegedly attacked a cabin crew member on board flight LH-752 after a snack trolley brushed against the passenger's leg during an in-flight service, the police said. After the flight landed at Hyderabad, a case was registered based on the crew's complaint.

Bank ATM stolen in Andhra Pradesh, ₹18 lakh missing

Thieves stole an ATM of a nationalised bank in Anantapur district of Andhra Pradesh early on Wednesday. The incident took place in Bukkarayasamudram mandal headquarters. The burnt machine was later found in a field in Akuledu village. According to the police, nearly ₹18 lakh was stolen from the machine. Three people are believed to be involved in the theft. The police have formed special teams to catch the accused.

ED quizzes Veena for around 8 hours in CMRL pay-off case

Daughter of former Kerala CM Pinarayi Vijayan was grilled about payments of ₹2.78 cr. made by CMRL to her now-defunct Exalogic IT company; it was her first personal appearance before ED

The Hindu Bureau
KOCHI

The Enforcement Directorate (ED) on Wednesday questioned T. Veena, daughter of former Kerala Chief Minister Pinarayi Vijayan, for around eight hours in connection with the money-laundering probe in the Cochin Minerals and Rutile Ltd. (CMRL) pay-off case.

She turned up at the zonal office of the ED here around 10.30 a.m. P.A. Mohamed Riyas, her husband and Beypore MLA, accompanied her in a vehicle and left the premises after she entered the office.

She left after questioning around 7.50 p.m.

High-profile probe: T. Veena arrives at the Enforcement Directorate office in Kochi on Wednesday. R.K.NITHIN

The Central agency is learnt to have asked her about the payments amounting to ₹2.78 crore made by the CMRL to her now-defunct Exalogic IT company.

The ED also raised questions on the loans worth ₹50 lakh extended to Exalogic by Empower India Capital Investments Pvt. Ltd. (EICIPL) operated by CMRL Managing Director S.N. Sasidharan Kartha, despite her company failing to make timely repayments.

Tight security at office

It was Ms. Veena's first personal appearance at the ED office here.

The security at the office premises had been beefed up ahead of her questioning in view of the violent incidents during searches held by the agency at the residence of Mr. Vijayan in Thiruvananthapuram on May 27 as part of the probe.

Personnel of the Central Industrial Security Force (CISF) and the Kerala Police were posted at the entrance to the ED office.

Karnatak University suspends professor

The Hindu Bureau
HUBBALLI

Following allegations of harassment by research scholars, Karnatak University Dharwad on Wednesday suspended a botany professor.

The order of suspension pending inquiry of botany professor Devaraj Tangudorai was issued by the university registrar even as a protest by students was under way on Wednesday.

Vice-Chancellor A.M. Khan said that Prof. Tangudorai has been placed under suspension while investigation is under way.

According to the complaint, the professor harassed a female research scholar, pressuring her to marry him

According to the complaint, the professor harassed a female research scholar, pressuring her to marry him.

A male research scholar said that the professor repeatedly told him that his research work will progress only if he persuaded the female research scholar to meet him.

After these complaints surfaced, the university constituted an inquiry committee to examine the allegations and submit a report.

Following suspension, the professor has been asked not to leave Dharwad without permission and to appear before the inquiry committee whenever required.

According to sources, both the complainant and the professor appeared before the inquiry committee on Saturday and presented their statement.

The complainant reportedly submitted audio recordings in support of her version.

The professor reportedly shared his photographs with her on social media, leading to the discontinuation of her studies and return to her native district Vijayapura.

As the professor reportedly approached another research scholar from the same district to persuade her to return to Dharwad, the research scholar finally lodged a formal complaint with the registrar, the sources said.

Yesterday

In observation made at 4.00 p.m., Byrnihat, Meghalaya recorded an overall air quality index (AQI) score of 253 indicating an unhealthy level of pollution. In contrast, Pampore, Jammu & Kashmir recorded a healthy AQI score of 25

Air Quality Code: Poor Moderate Good (Readings indicate average AQI)

SO₂: Sulphur Dioxide. Short-term exposure can harm the respiratory system, making breathing difficult. It can affect visibility by reacting with other air particles to form haze and stain culturally important objects such as statues and monuments.

NO₂: Nitrogen Dioxide. Aggravates respiratory illness, causes haze to form by reacting with other air particles, causes acid rain, pollutes coastal waters.

CO: Carbon monoxide. High concentration in air reduces oxygen supply to critical organs like the heart and brain. At very high levels, it can cause dizziness, confusion, unconsciousness and even death.

PM2.5 & PM10: Particulate matter pollution can cause irritation of the eyes, nose and throat, coughing, chest tightness and shortness of breath, reduced lung function, irregular heartbeat, asthma attacks, heart attacks and premature death in people with heart or lung disease

TTD, CFTRI sign MoU to enhance quality, safety of laddu prasadam

The Hindu Bureau
MYSURU

The Tirumala Tirupati Devasthanams (TTD) has entered into a MoU with Council of Scientific & Industrial Research-Central Food Technological Research Institute (CSIR-CFTRI), Mysuru, to strengthen the quality, safety, and nutritional value of the laddu prasadam offered to millions of devotees.

The collaboration combines TTD's extensive prasadam preparation and distribution system with CFTRI's expertise in food science, technology, quality assurance, and food safety. The partnership seeks to preserve the traditional taste, texture, sanctity, and cultural significance of TTD prasadam while adopting scientifically validated measures to enhance quality and consistency, according to CSIR-CFTRI.

The MoU was signed during the RISE Conclave held in Bengaluru recently. A press release said that CSIR-CFTRI will provide technical support to improve food handling, procurement, storage, processing, and distribution practices. The institute will also assist in implementing advanced testing methods and standardised protocols to minimise contamination risks and ensure adherence to the highest food safety standards.

Additionally, CFTRI will conduct specialised training programmes for TTD personnel in areas such as food analysis, sampling techniques, contaminant detection, ghee quality assessment, and aroma profiling.

No.IADB/ENGG/PMC/EPTND-EP-03/1657/2026-27 **Date: 17.06.2026**

SHORT TERM NOTICE INVITING TENDER FOR PROVIDING PROJECT MANAGEMENT CONSULTANCY SERVICES
(Through GOK Karnataka Public Procurement Portal Only)

KIADB is inviting tender under Quality Based Consultancy System (QCBS) as per the Karnataka Transparency in Public Procurement Act 1999 and Rules 2000 through electronic procurement from eligible Consulting Firms under two cover system for the following works:

Name of the Works : (1) PMC Services for the work of Formation of Industrial Layout in Sira Industrial Area, Phase-2, Sira Taluk, Tumakuru District., **(2)** PMC Services for Construction and Commissioning of 600 KLD CETP with ZLD facilities on Turnkey Basis including O&M of entire system for 05 years at Baikampady Industrial Area, Dakshina Kannada District. (3rd Call), **(3)** PMC Services for the work of "Formation of Industrial Layout at KGF Industrial Area, Bangaradagani Village, KGF Taluk, Kolar District. **(4)** PMC Services for the work of Re-Construction & Strengthening of roads, construction of RCC Cross Drainage, HDPE water supply line at Jigani Industrial Area 1st & 2nd Phase, Bengaluru South District. **(5)** PMC Services for the work of Formation of Road, Construction of RCC Side Drain, RCC Inspection Chamber, RCC Box culvert & providing water supply pipeline in Sira Industrial Area, Phase-1, Sira Taluk, Tumakuru District. **(6)** PMC Services for the work of Formation of Road, Construction of RCC Side drain, spur culvert & box culvert at Dobaspet 5th Phase Industrial Area, Nelamangala Taluk, Bengaluru Rural District. **(7)** PMC Services for the work of Establishment of Knowledge, Wellbeing and Innovative City (KWIN City) at Phase-4 & 5, Doddaballapura and Nelamangala Taluk, Bengaluru Rural District. **(8)** PMC Services for the work of Establishment of Plug & Play infrastructure in EV Block, Harohalli Industrial Area 5th Phase, Ramanagar Taluk, Bengaluru South District.

The last date and time of receipt of tender is : **04.07.2026** upto **04.00 pm.**

Applicants May Download Bidding Documents from the Karnataka Public Procurement Portal **https://kppp.karnataka.gov.in.**

Innovate or be eaten

India must realise the importance of innovating up to the frontier

There is no question that Indian professionals are capable of pathbreaking innovation. As evidenced by the strong representation of Indian and Indian-origin technology industry leaders, Indian executives have displayed extraordinary talent in both the managerial and technical work that goes into building and advancing complex businesses at the forefront of the global economy's most important engines. 'Bharat Innovates 2026', the event in Nice, France, supported by the Ministry of Education, has shown that many of these innovations are possible in India, and that patient incubation of startups in key strategic areas can lead to exceptional results that are competitive with the best-in-class globally. India's potential to be a global home for innovation is real, especially with the kind of middle power collaboration that French President Emmanuel Macron advocated for at the event. The innovation question is key to processing the aftermath of Anthropic's most powerful AI models, Claude Mythos and Fable, being banned for non-Americans, a move that has already affected some Indian entities and users.

Perhaps it is not possible to brute-force frontier AI or semiconductor technology, given the tens of billions of dollars even a single player requires to make incremental advances in these fields. Becoming an AI deployment superpower, as many tech policymakers advocate, may also be a pursuit of a losing battle; India, after all, is not alone in seeking knowledge economy efficiencies from AI. But the field of opportunities remains nonetheless vast: deep tech in areas such as space exploration, defence, and even material sciences remain an open contest. For India to pursue innovation, two ingredients are important: India must be a stable and attractive home for capital and talent. For the former, the swashbuckling rent-seeking of the successful must be reined in to keep innovators from dreading success on Indian soil; venture capital must be in a position to assess exploratory and cutting-edge pitches on the same footing as they do in other countries; and tax policies must be clear and predictable. To be an attractive home for talent, what is required is quite simple: the top talent must look forward to their future in India, instead of running into a dead end for their potential and the life they feel greener pastures may afford them. For this, investments in public goods such as clean air, abundant urban green spaces, and affordable and reliable public transport can go a long way. These are, after all, what returnees miss the most. Some of India's oldest and most stubborn problems are in the way of a truly innovative ecosystem. The good news is that these problems need political capital, not risk capital.

Step forward

The top court has given an economic value to unpaid domestic work

The Supreme Court's judgment in *Shishupal @Shish Ram vs Surjeet* by a Division Bench of Justices Sanjay Karol and N.K. Singh, is likely a landmark. The ruling originated as the Court revised compensation granted by the Motor Accident Claims Tribunal (MACT) for a road accident in 2001. The first MACT awarded the family of Reshma, the accident victim, ₹2.42 lakh, which the Punjab and Haryana High Court revised in 2024 to ₹8.43 lakh. But in its order, the Court revised it to ₹62.78 lakh after attaching a sum of ₹30,000 a month to Ms. Reshma's 'economic value', for the service she rendered as a homemaker. The ruling is not surprising. In *Lata Wadhwa* (2001), the Court valued a homemaker's services at a modest ₹3,000. In *Kirti vs Oriental Insurance* (2021), it said the economic value of a homemaker's work cannot be discounted simply because it is unpaid or performed by women. However, the 'official' value attached to that work has suffered from inconsistent quantification. The Bench's value of ₹30,000 a month is itself notional and a floor; it added that the floor must be hiked by 10% every three years and a woman's salary, where applicable, has to be added to the floor, in the context of MACT's claims. The judgment does not create a salary, wage entitlement, pension scheme or employment relationship for homemakers, and applies to compensation calculations in MACT cases only. That said, the now-normalised societal tendency to undervalue women's work means that any advance is valuable and will likely have ripple effects.

The connection between unpaid domestic labour and suppressed female labour force participation is a major theme in contemporary Indian labour economics. Now, for example, homemakers seeking maintenance under the Hindu Marriage Act, say, have judicial reasoning supporting the economic value of their domestic work. Rural women who "assist in sowing, harvesting, and cattle-tending", as the Court noted, can now invoke the Court's reasoning to pitch to have their labour, which is often treated as being incidental to household work, valued higher. The additive rule may encourage litigants to invoke similar reasoning in employment disputes *vis-à-vis* 'work from home' arrangements and domestic responsibilities. Future litigation may test whether male homemakers can claim equivalent treatment. Motor insurance is already a low-margin segment for many insurers, and a large increase in the average claim size – likely applied retrospectively as well – may force companies to reassess their risk models and render them more inclined to settle claims quickly in Lok Adalats. All said, the Shishupal judgment is a vital corrective to decades of economic erasure.

Health data must drive action, not just headlines

Chandrakant Lahariya

Practising physician in preventive and cardio-metabolic medicine and specialist in health policy. He has worked with the World Health Organization (WHO) and the UN system for nearly 18 years

There is an unsettling paradox in the release of health survey data in India. Survey findings often end up doing exactly the reverse of what they should. They often highlight what we already know, do not take a sufficiently serious view of what has not improved, and rarely lead to immediate programmatic action. The discussion that follows is often ritualistic: the government highlights achievements, newspapers amplify numbers, academics wait for raw data to analyse, and business and industry identify market opportunities.

This seems to be the case with the three recently released health-linked surveys: the National Family Health Survey (NFHS-6), the National Statistical Office (NSO) 80th Round Household Consumption on Health and the National Health Accounts Estimates for India 2022-23.

All three should have offered a moment of national stocktaking. Instead, the two reports on health expenses barely received any attention, while the third, the NFHS-6, and its use by key stakeholders, tells a familiar story. In government communication, improvements have been selected and celebrated. Achievements must, of course, be acknowledged. However, the real value of such surveys is not in confirming what has worked, but in showing where programmes remain weak and old strategies are no longer sufficient.

The business of disease

Industry and business groups have flagged rising health challenges reported in NFHS-6. Rising obesity becomes an argument for weight-loss products, apps, gyms, diagnostics and drugs. Rising diabetes becomes an opportunity for monitoring devices, test packages and private clinics. Rising non-communicable diseases become the market case for more screening, testing and medicalisation. Where public health messaging is weak and private health markets are aggressive, every survey finding can become a business prospect.

The one positive development so far has been the extensive coverage in the print media, which has flagged what matters to citizens: the rise of obesity, diabetes, hypertension and other non-communicable diseases (NCD). Yet, much of this was already known. Obesity and other NCDs have moved from urban and affluent groups to all social and economic groups. The new data merely put fresh numbers to an old warning.

What is grossly missing is critical reflection and policy dialogue around these findings. This should worry us. A health survey is not meant to be a national reminder of familiar problems but an instrument of course correction. If anaemia has not improved, the response cannot be another paragraph in a report. If out-of-pocket expenditure remains high, the answer cannot be only a headline on a declining percentage share. If obesity is rising among children, the response cannot be a few articles followed by silence.

Health data should guide accountability, budgets and programme reform

The NFHS-6 also carries a temporal problem. Its data were collected during 2023-24, but the findings entered public debate in mid-2026. In a political system skilled at both claiming credit and avoiding blame, this lag is convenient. A government can celebrate positive indicators as proof of current policy success while dismissing uncomfortable findings as "old data", influenced by the COVID-19 pandemic, past administrative disruptions or conditions that have since improved. The survey then becomes less a compass and more a weapon. This is unfair to the survey and unhelpful to policymaking.

Academicians and public health researchers play a crucial role in interpreting large-scale survey data beyond official reports. In India, however, such analysis is often delayed because raw data are released late. By the time peer-reviewed studies appear, three to five years may have passed since data collection. Policymakers can then dismiss critical findings as outdated and no longer relevant. As a result, data lose their impact: when reports are released, raw data are unavailable for scrutiny; when analysis finally arrives, the opportunity for policy action has often passed.

From data to action

There is a need to reflect on how India continues to miss these opportunities. Data improve health outcomes only when they are linked to timely and relevant policy decisions. Countries that make effective use of health data do not wait years for perfect academic papers or definitive solutions. Instead, they have robust systems and empowered institutions that generate rapid policy briefs, identify lagging districts and regions, conduct regular reviews, compare performance, allocate resources efficiently and adapt programmes as needed. The translation of data into action is not merely a slogan; it is a discipline. India needs to cultivate that discipline if it is to realise the full value of the vast amounts of health data it collects.

First, every major national health survey should be followed, within 30 to 45 days, by a national and State-level action note jointly prepared by the government and independent academic institutions. The note should candidly identify what has improved, what has remained stagnant and what has deteriorated. Each finding should be linked to a specific programme and a clearly accountable authority. If child nutrition has stagnated, the nutrition programme must respond. If hypertension detection remains inadequate, the primary health-care system must respond. If out-of-pocket expenditure on medicines remains high, the drug procurement system must respond. Data should not merely describe problems; they should trigger accountability and corrective action.

Second, there should be State-level health data review meetings, not ceremonial events but working sessions. Health Secretaries, Finance Departments, District officials, public health experts, civil society representatives, other key stakeholders and independent subject experts should examine the findings together. The question should not be, "What can we highlight?" It should be, "What must we change?"

Third, India needs systems for the optimal and timely use of survey data. It has started developing the Integrated Health Information Platform (IHIP), but that is primarily for real-time data. Survey data, Health Management Information System (HMIS) data and IHIP data must be combined to generate analytical information. Fragmented data produce fragmented policy.

Fourth, primary data and source files from surveys should be made available early so that independent researchers and public institutions can produce quick analysis. There is no reason to wait years for serious interpretation. Data should not sit like a guarded file. They should be available as a public good.

Fifth, findings should influence budgetary allocation. If a survey shows rising NCDs, primary care budgets must reflect the need for NCD prevention and treatment. If households are spending heavily on medicines, public facilities must strengthen essential drug availability. If obesity is rising in children, school health, food regulation and urban planning must respond. Data without budgetary consequence are merely information.

Looking ahead

Economist Aaron Levenstein said in 1951 that "statistics are like bikinis. What they reveal is suggestive, but what they conceal is vital". Health data should be like an x-ray. They are useful only when interpreted correctly, discussed honestly and followed by policy actions. Data and statistics are only as useful as their interpretation; interpretation is only as useful as the action it produces. The next time survey findings are released, the real question should not be what the numbers show. The real question should be: what will change in programmes in a month's time, in six months and in a year? Alongside this, India definitely needs more and timely health data. However, what we need even more is accountability.

Rubio's remarks and the limits of strategic empathy

Abhijit Singh

Retired naval officer and former Head of the Maritime Policy Initiative at the Observer Research Foundation (ORF), New Delhi

A day after the United States and Iran struck an interim deal on June 14, 2026, to end the war and reopen the Strait of Hormuz, it remains unclear whether the agreement will be implemented at all. Not only have details not been made public, but negotiators have, by all accounts, pushed the difficult issues down the road. There is no mention in the interim agreement of Iran's nuclear programme, its missile programme, or even ending Tehran's support for regional groups. Iran's top officials maintain that a final deal for a lasting truce is yet to take shape.

Washington's troubling response

These developments, though significant, are unlikely to make headlines in India, where policymakers and the public are still smarting over the deaths of three Indian sailors in a U.S. strike in the Strait of Hormuz on June 10.

Particularly galling are the remarks by the U.S. Secretary of State, Marco Rubio, who told External Affairs Minister S. Jaishankar last week that "violations of the American blockade and the illicit transport of Iranian oil would not be tolerated and that commercial vessels must immediately comply with US forces". There was reportedly no expression of condolence for the deaths of the sailors, nor any indication that the incident would prompt a broader reassessment of the risks now confronting civilian shipping in the Gulf.

The implication was unmistakable: Washington does not view the episode principally as a humanitarian tragedy requiring accountability, but as a compliance problem arising from the failure of merchant vessels to obey American directives.

That framing has implications for New Delhi. It suggests that for Washington, the safety of neutral shipping and the interests of partner countries during a conflict are secondary to the enforcement of U.S. strategic objectives.

The U.S. Secretary of State's comments reveal the human cost of American strategic objectives

Merchant vessels are expected simply to comply with American instructions; should they become collateral victims of the increasingly militarised environment in the Strait of Hormuz, the costs are expected to be borne by the countries that own the ships and by the sailors who crew them.

Indian sailors stand alone

For a nation such as India, whose economic interests are deeply tied to the free flow of commerce through the Strait of Hormuz and whose citizens make up a significant share of the global maritime workforce, this should be unacceptable. Great power competition inevitably imposes costs on third parties with little say in the decisions that create or sustain crises. But those costs cannot simply be externalised onto partner countries and civilian mariners in the expectation that they will quietly acquiesce.

India's predicament is particularly stark because it supplies roughly a fifth of the world's maritime workforce but possesses few realistic means of ensuring the safety of its seafarers. The Indian Navy's escort operations in the Gulf are valuable but necessarily limited. They cannot protect the more than 18,000 Indian sailors in the region, many of whom serve aboard vessels registered under flags of convenience such as Palau, Guinea-Bissau and the Marshall Islands. Such flags offer little meaningful diplomatic protection in times of crisis. When things go wrong, Indian sailors are often left effectively stateless from a protection standpoint. The three deaths aboard the *MT Settebello* have exposed a structural vulnerability that New Delhi has long recognised but never adequately addressed.

Whether or not this will fundamentally alter the trajectory of India-U.S. relations is hard to say. The bilateral relationship possesses too many load-bearing elements – defence cooperation, critical technologies, the Indo-Pacific and the Quad (Australia, India, Japan, U.S..) – for one incident to trigger a rupture. Even so, Mr. Rubio's remarks seem to have done real damage at the level of trust and political optics. New Delhi's summoning of the U.S. Chargé d'Affaires twice within three days last week signals genuine anger. Many in India view Washington's response not as an aberration but as evidence of a deeper pattern: when the interests of partner states conflict with American strategic objectives, the U.S. invariably chooses itself.

Seeking accountability and answers

From an Indian standpoint, accountability for the incident has yet to be established. India must push for a credible, independent fact-finding investigation into the circumstances surrounding the strike. Beyond bilateral protest, New Delhi should consider taking the issue to multilateral forums, including the International Maritime Organization and consultations with other crewing and flag states. A lone démarche simply does not carry the weight of a coordinated international position. Importantly, Indian officials must articulate a principled and consistent position on maritime norms, one that applies irrespective of how powerful the state violating them may be.

For the Narendra Modi government, this episode is about more than the tragic deaths of three Indian sailors. Mr. Rubio's remarks have inadvertently laid bare an uncomfortable truth about great-power partnerships: strategic empathy has limits. The United States may regard India as an indispensable partner in the Indo-Pacific, but it will not subordinate its priorities in the Gulf to Indian sensitivities. That is not a reason for New Delhi to distance itself from Washington. It is, however, a reminder that close partnerships do not eliminate divergences of interest. India must continue to engage the U.S. with clear eyes and defend its maritime interests without assuming that others will do so on its behalf.

LETTERS TO THE EDITOR

Water management

The report, "India stares at 35% rain deficit amid El Niño trail (Front page, June 17), points to a key issue — water scarcity, which has become one of the most pressing challenges facing India's metropolitan cities. Falling reservoir levels and the overexploitation of groundwater have made urban areas increasingly vulnerable, particularly during the summer months. Several studies have warned about the alarming depletion of aquifers, yet authorities often treat each shortage as a temporary crisis rather than addressing its root causes. For decades, India's water policy has focused primarily on augmenting supply. While this approach has contributed significantly to food security, it has overlooked the need for efficient water management. Cities must adopt sustainable measures such as rainwater harvesting, permeable pavements, and other forms of green infrastructure to improve groundwater recharge. Simultaneously, aging water distribution networks, inadequate metering, and poor urban governance require urgent attention. A comprehensive strategy that combines conservation, infrastructure modernisation, and better governance is essential to ensure urban water security.

M. Jeyaramachandran,
Sholavandan, Tamil Nadu

Operation NEET retest

The Indian Air Force being used to transport National Eligibility-cum-Entrance Test (NEET-UG) question papers sends the wrong signal (June 17). Although it is part of a fool-proof exercise to conduct the retest, using the armed forces to secure delivery of confidential material sends a message of 'lack of trust' and corruption everywhere.

Thomas Palocaren,
Vellore, Tamil Nadu

Corrections & Clarifications

In a report (Front page, June 17), "India stares at 35% rain deficit amid El Niño trail", a sentence in the last paragraph should have said: "... analysts are more cautious and have said that a serious farm disruption *could add to retail food inflation*, a risk that even the Reserve Bank of India has flagged."

Letters emailed to letters@thehindu.co.in must carry the full postal address and the full name or the name with initials.

Water security is central for a Viksit Bharat

C. R. Patil
Union Minister of Jal Shakti

Did you know that the Jal Jeevan Mission is the world's largest rural drinking water supply programme? Or that the Swachh Bharat Mission (SBM) is the most significant rural sanitation movement in the world? Together, these initiatives represent not merely government schemes, but a re-imagination of how a nation of 1.45 billion people is building a water-secure future.

Few sectors shape human dignity, economic growth, public health, agriculture and environmental sustainability as profoundly as water. Yet, for decades, India's water challenges were addressed in fragmented ways. What has changed in recent years is the focus and integrated nature of the response led by Prime Minister Narendra Modi.

The scale of investment and execution in the water sector in the last 12 years has been unparalleled. Water is now viewed as a shared national priority, cutting across departments, States, and communities. While earlier water was relegated to the side, under Prime Minister Modi, the Government of India has assumed responsibility for filling the long-standing gaps in planning, management, and delivery in the water sector.

A complete turnaround

The most prominent example of this transformation is the Jal Jeevan Mission. When the programme was launched, only about 3.23 crore rural households, roughly 17% of rural Indian households, had tap water connections. Today, more than 15.8 crore rural households, covering over 81% of rural India, have access to tap water at home. The government is moving towards achieving 100% coverage by 2028. For millions of families, this is not merely a utility service; it is a change in their way of life.

Studies indicate that earlier, rural women in India spent billions of hours each year fetching water. The expansion of household tap water supply has helped save more than 5.5 crore person-hours daily; that time is now being invested in education, livelihoods, childcare and economic activity. Across households, access to safe drinking water has also reduced out-of-pocket health expenditure arising from water-borne diseases.

Equally transformative is the SBM. India's sanitation movement demonstrated that behavioural change, public participation and political commitment can work together at scale. According to the World Health Organisation's assessment of health gains, SBM-Grameen is estimated to have averted more than 3 lakh diarrhoea deaths between 2014 and October 2019. The construction of household toilets also brought dignity, privacy and safety to millions of rural women. Beyond making villages open defecation-free, the country has moved towards sustainable solid and liquid waste management under SBM-Grameen 2.0.

India has also undertaken one of the largest water conservation and groundwater recharge initiatives anywhere in the world. Under the 'Jal Sanchay Jan Bhagidari' initiative, more than 1.55 crore rainwater harvesting and groundwater recharge structures have been created across the country by May 31, 2026. The impact of these efforts is visible in groundwater trends as well. Recent assessments indicate improvement in groundwater recharge and a reduction in the number of over-exploited assessment units in several parts of the country. It also showcases that sustained conservation efforts, when combined with community participation, can reverse environmental stress.

Parallelly, India has advanced long-pending national water projects. The Ken-Betwa River Linking Project, the country's first major river interlinking initiative to bring water to the arid region of Bundelkhand, is moving ahead at an accelerated pace.

Under the guidance of Prime Minister Modi, the Namami Gange programme has demonstrated that environmental restoration and development can advance together. Over the past decade, the government has created 4,260 million litres per day (MLD) of sewage treatment capacity; reduced the Biochemical Oxygen Demand from 26 tonnes per day (TPD) in 2017 to 10.75 TPD in 2024; and brought down effluent discharge from 349 MLD to 265.56 MLD. Today, monitoring shows that pH and dissolved oxygen levels in the Ganga meet bathing criteria at all monitored locations.

India's water journey over these years offers an important global lesson. Water challenges in the 21st century cannot be addressed through isolated interventions. Drinking water, sanitation, river conservation, irrigation efficiency, groundwater recharge, wastewater reuse and climate resilience must all be viewed as parts of a connected ecosystem.

The road ahead

This integrated approach becomes even more critical in the face of climate change. For India, the challenge is unique. The country is home to nearly 18% of the world's population, but has access to only about 4% of global freshwater resources. Rapid urbanisation and changing weather patterns will place increasing pressure on these resources in the coming decades.

Today's investments, therefore, are not merely developmental expenditures; they are long-term investments in national resilience. The progress achieved over the past decade demonstrates the immense potential unlocked when selfless leadership, responsive governance, and active public participation come together in pursuit of a shared national vision.

The road ahead requires sustained effort. The government will strive to improve water-use efficiency, promote recycling, strengthen water governance, and encourage citizen participation.

Access to drinking water, sanitation, river conservation, groundwater recharge, wastewater reuse and climate resilience must all be viewed as parts of a connected ecosystem

The existential crisis of the Trinamool

The prevailing need to be on the winning side has led to mutiny within the party

STATE OF PLAY

Shiv Sahay Singh

The 2026 Assembly elections of West Bengal has been one of the most significant elections the State had witnessed in the past several decades not only because it marked the end of the 15-year-old Trinamool Congress regime, and paved the way for the first Bharatiya Janata Party (BJP) government in the State, but also because it reflects a crisis in our polity.

In today's political system, everyone wants to be on the side of the winner or at least have the blessings of the winning side. Being on the side of the opposition where one has to criticise the government and face a volley of police cases does not appeal to the political class any more.

Therefore, whenever the centre of power shifts, the easiest way out of the mess is to shift one's allegiance to the winning side, even if it means giving up one's political loyalty and sabotaging a decade-long political career. This is exactly what is happening with the Trinamool and the so-called rebellion of its MPs and MLAs.

Those who have seen the functioning of the Trinamool Congress from up close would agree that it was run more like a fan club than a political party. Mamata Banerjee was the presiding deity and everyone/everything revolved around her. It was not the political or the organisational acumen that determined the nomination of a Trinamool leader to the Lok Sabha or Rajya Sabha; everything hinged on the liking of the party chairperson, and over the past few years, the general secretary. The back-to-back victories for the party in the State polls only added to the

overarching persona of Ms. Banerjee within the Trinamool.

This model worked well for everyone, especially for the party chairperson, who thought that she was in ultimate control of the party, and for her loyalists who knew that they had only one task – to keep her, and later her nephew Abhishek Banerjee, happy and present themselves as committed party workers.

A shattered illusion

There were a few exceptions such as Suvendu Adhikari and Tapas Roy who left the party disillusioned and charted a different political course. Retired bureaucrat Jawhar Sircar is perhaps the only exception in recent times who gathered the courage to call out the bluff of the Trinamool after the rape and murder of a doctor at Kolkata R.G. Kar Hospital in August 2024. But a majority of the Trinamool Congress leadership continued singing odes to the party leader, turning a blind eye to corruption, authoritarianism and misrule; all because they wanted to be on the side of the winning team.

Those who have turned rebels now are not the victims of the Trinamool's fan club model but those who have been its biggest beneficiaries. These rebel MPS and MLAs cannot claim ignorance of what was happening under Trinamool rule from 2011-26, and now suddenly realise how the party has failed the people of West Bengal.

The 28-year-old experiment of Trinamool Congress is failing not because it suffered an electoral setback, but because the foundations of the party have crumbled. Mamata Banerjee and Abhishek Banerjee were living in a bubble and liked being surrounded by sycophants, whose only ideology was opportunism, to the extent that just one electoral setback has pushed them to a crisis threatening the very existence of the party.

Though the rebellion of about 60 of 80 MLAs and 20 of 28 MPs is something that the people of West Bengal have not witnessed in the past, between 2011 and 2024 there were innumerable instances where representatives of civic bodies, MLAs and even MPs from the Opposition joined the ruling Trinamool Congress. In the 15 years of the party's regime, almost 50 MLAs from the Left Front, the Congress and the BJP joined the Trinamool, and in not a single case did the Speaker of the Assembly disqualify any legislator under the anti-defection law. Mamata Banerjee has thus become a victim of her own machinations.

Additionally, anger is spilling out on the streets against local Trinamool leaders accused of corruption, extortion and electoral violence, with over a hundred local Trinamool leaders being arrested.

The BJP leadership is aware of the danger of mixing the Trinamool rebels with their own flock. All that the BJP is promising the rebels currently is an assurance that everything will be smooth sailing for the next few years.

Why A.P.'s incentive for having more children is misplaced

The recently announced cash incentives in Andhra Pradesh cannot offset the economic barriers faced by people to have larger families

DATA POINT

Sambavi Parthasarathy

On May 16, Andhra Pradesh Chief Minister N. Chandrababu Naidu announced a one-time incentive of ₹30,000 for the third child and ₹40,000 for the fourth. He said that these incentives were a part of the State's new population management policy to encourage population growth.

On the surface, the incentives to have bigger families may sound sensible with the latest National Family Health Survey (NFHS-6) report for the year 2023-24 placing the **State's fertility level at 1.8**, which is below the replacement level of 2.1. However, a closer look warrants questions on at least three fronts: whether such an incentive is adequate for families to have more children; what the key reasons are for the dropping fertility rate; and whether such an intervention is necessary now.

A comparison of this one-time cash incentive against basic expenditures shows that it cannot offset the childcare costs, a concern that is prompting families to rethink having more children **(Chart 1)**.

The government's incentive is about twice the average cost of hospitalisation for childbirth in India, and a far smaller multiple of the cost in Andhra Pradesh. In fact, it is almost the same as the cost of hospitalisation for childbirth in the State's urban area. In a State where more than 50% of births happen in private hospitals and about 52% of all deliveries happen through Caesarean sections, this incentive will just offset the hospitalisation cost in rural areas **(Chart 2)**. It is also inadequate to cover the cost of C-sections in private hospitals in urban areas.

For a family of five (assuming there are two adults and three children), this incentive is about 1.5 times their Monthly Per Capita Expenditure (MPCE) in rural areas and almost similar to the MPCE in urban areas, as per the Household Consumption Expenditure Survey for 2023-24. This means that the incentive could just help the families meet their consumption needs for one month, provided the same was not already spent in hospital during childbirth.

Cannot afford children

Moreover, the question around family planning has moved from whether families 'should' have more children to whether they can afford to. The United Nations Population Fund's (UNFPA) 'State of World Population Report 2025' shows that financial limitations are the prime barrier to having children **(Chart 3)**.

Other barriers included housing limitations, followed by unemployment (or job insecurity), and the lack of quality and affordable childcare options. In many of these indicators, the share of Indians pointing to these concerns was much higher than the average share across the 14 countries that were surveyed for the report.

The survey further pointed out that a larger share of Indian men and women preferred having either one or two children **(Chart 4)**. Less than 10% of Indian respondents said they would prefer to have three, four or more children, which is almost on a par with the share of Indians who preferred having no children.

It is noteworthy that the below-replacement fertility rate in Andhra Pradesh and across India does not mean that the population decline is imminent. The population will continue to increase, then stabilise and eventually begin to decline, which, for India, is likely to happen only in 2063 as per estimates **(Chart 5)**.

For instance, although Japan and South Korea's fertility rates dropped below the replacement level in the late 1970s and the early 1980s respectively, their populations – which are less than 10% of India's – began to decline only around 2010 and 2020.

Wrong incentives

The data for the charts were sourced from the Household Consumption Expenditure Survey 2023-24, Household Social Consumption: Health 2025, NFHS-6, Our World in Data and the UNFPA

Chart 1: A comparision of A.P.'s new incentives against select expenditures in India ( ) and Andhra Pradesh ( )

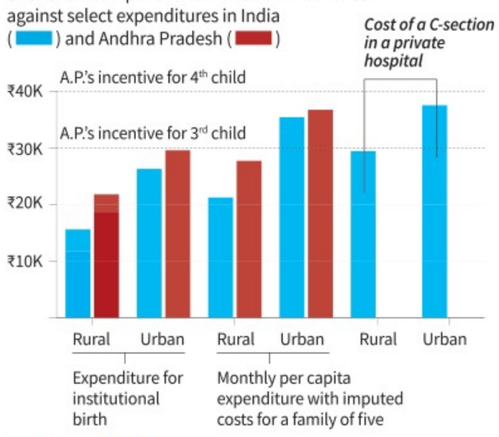

Chart 2: About 50% of institutional births happened in private facilities in 2023-24 in A.P. Among them, more than 60% of the births were delivered by C-sections

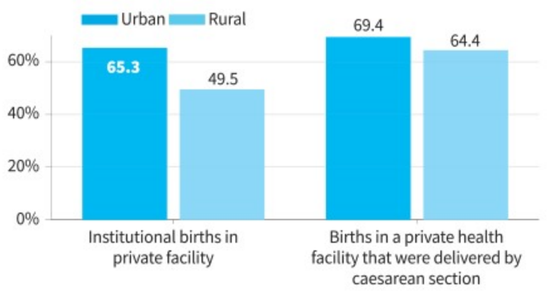

Chart 4: Ideal number of children preferred by male and female respondents as per the UNFPA survey

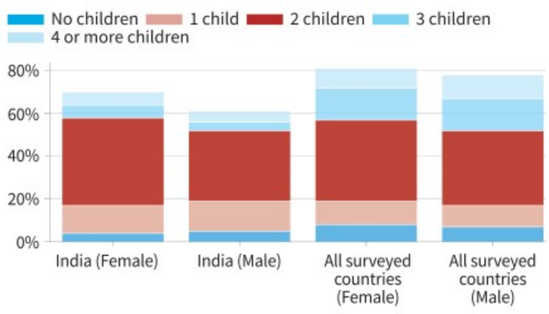

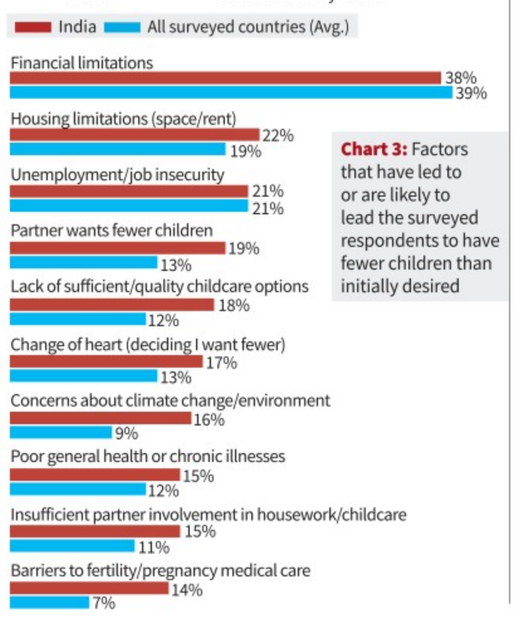

Chart 3: Factors that have led to or are likely to lead the surveyed respondents to have fewer children than initially desired

Chart 5: Population figures and projections for select countries with a fertility rate below the replacement level (Y-axis in log scale)

Scheme for crocodile sanctuaries

Dr. H.R. Bustard, an expert on crocodiles and an officer of the FAO (UNDP), was deputed by the Government of India to advise the Andhra Pradesh Government on the conservation and farming of crocodiles in various parts of the State.

It is stated that three species of crocodiles namely gharial (found in the Ganga, Brahmaputra and Mahanadi), the maggar or freshwater crocodile (found generally in rivers and reservoirs) and the estuarian or salt-water crocodiles (found in the estuaries of major rivers) were facing extinction owing to large-scale and indiscriminate killing for meat. The eggs are also eaten and so the species face the problem of survival.

Dr. Bustard inspected the Corangi mangrove forest in the Kakinada Forest Division last week accompanied by Mr. T.V. Subba Rao, Additional Chief Conservator of Forests, Mr. Pushpalumar, Director Nehru Zoological Park, Hyderabad and Mr. B. Bhomarajam, Conservator of Forests, L.P. Circle, Rajamundry. Dr. Bustard stated the area was eminently suitable for farming the salt-water crocodiles. A scheme would be prepared for the purpose and submitted to the Government shortly.

They inspected the Godavari river area from Devipatnam to Peramtapalli.

Dr. Bustard found the region between the Papi Hills and Peramtapalli was an excellent habitat for crocodiles and has prepared a scheme for the conservation and farming of crocodiles there.

He wanted these two areas to be declared as sanctuaries for the preservation and farming of crocodiles.

A HUNDRED YEARS AGO JUNE 18, 1926

Oil pollution

Washington, June 17: The International Oil Pollution Conferences has passed a resolution which recommends the establishment of a limit of fifty to one hundred and fifty miles from the coasts of maritime nations, within which the discharge of oils or mixtures constituting nuisance, should be prohibited and that each Government would require ships flying its flags to refrain from discharging oil near the shores of other countries.

From Page One

Modi raises seafarers' safety in Trump meet

The U.S. President also dismissed perceptions that the India-U.S. relationship was fraying, saying that as long as he was President, India would have a "great friend" in the White House. He lavished praise on Mr. Modi repeatedly and their friendship, painting a picture at odds with the mounting challenges the relationship has had to weather in recent times, including a protracted trade negotiation, restrictions on skilled migration, the death of Indian sailors, and a closeness with the Pakistan government that has ruffled feathers in New Delhi.

"He's the most beautiful looking man. He looks so nice. He's like an angel, but actually he's a killer," Mr. Trump said, praising Mr. Modi. "He's as tough as they come, but he looks so good. So he gets you by surprise," he added.

Mr. Trump said he appreciated Mr. Modi (i.e., India) investing in the U.S.

Asked to speak on the India-U.S. defence relationship, Mr. Trump said that though they did not have a contract, if India were to be attacked "we would be there to help", stretching out his hand to hold Mr. Modi's.

Mr. Trump suggested he would go to India at some point in the future.

Following the meeting, Mr. Modi posted on social media saying the two sides had reviewed U.S.-India cooperation in trade, energy, defence, technology and people-to-people ties.

Framework deal reveals nuclear commitment

On its part, the U.S. will lift sanctions on the sale of Iranian crude oil, petrochemical products, and financial services, including banking, during the negotiation period.

The draft, which has not been released officially, calls for an "immediate and permanent end to the war on all fronts, including Lebanon" – a key Iranian demand.

Under the agreement, the U.S. and Iran have pledged to "respect each other's sovereignty and territorial integrity, and to refrain from interfering in each other's internal affairs".

The U.S. will immediately lift its naval blockade and Iran will allow traffic through the Strait of Hormuz to reach pre-war volumes within 30 days. Mr. Trump has said that traffic through the Strait will be toll-free. According to Iran's Foreign Ministry, however, Tehran will not impose a toll but ships will have to pay a fee to Iran's newly created Persian Gulf Strait Authority, for environmental upkeep and other services

Nuclear talks in next phase

"Iran reiterates that it will never produce nuclear weapons. Iran and the U.S. have agreed that the fate of enriched material and the fate of all other mutually agreed nuclear-related issues, including Iran's nuclear needs, will be adequately addressed in a final agreement," the leaked text says.

Iran has hundreds of kilograms of highly enriched uranium, which the U.S. and Israel want to take out of the country and dilute or destroy.

Two of the contentious points of the MoU are Iran's demands for the unfreezing of its assets and reparation for the war damage. The leaked text says Iran would get access to the funds and financing for reconstruction.

"The U.S. undertakes that, in light of the progress of negotiations towards a final agreement, frozen or restricted funds and assets of Iran will be released and made fully available."

After protests, injured Kukis shifted from Imphal hospital

Three youth were moved 60 km away to Churachandpur Medical College under tight security; protesters earlier tried to storm RIMS and take away the trio injured in an attack in Kangpokpi

The Hindu Bureau
GUWAHATI

Three Kuki youth, injured in an armed attack on their village in Kangpokpi district of Manipur on June 15, were moved out of Imphal's Regional Institute of Medical Sciences (RIMS) early Wednesday morning.

Officials said the trio – 18-year-old Genlenmang Vaiphei and Paogoulal Chongloi, and 20-year-old Lunliandaw Vaiphei – were shifted from the RIMS under tight security around 12.15 a.m. to the Churachandpur Medical College, about 60 km south of Imphal.

The Meiteis are in a majority in Imphal and the valley beyond, while the Kuki-Zos dominate Churachandpur and Kangpokpi districts. An ethnic conflict broke out between the two communities in May 2023, claiming more than 250 lives.

Protesters gathered outside RIMS soon after the three Kuki youth, including a footballer who has played for Kolkata's Mohun Bagan club, were admitted on June 15. The security forces used batons and tear gas shells to disperse the mob.

Rising tensions: Protesters gather outside the Regional Institute of Medical Sciences premises in Imphal late on Tuesday. PTI

The following night, the security forces foiled attempts by the protesters to storm the hospital in a bid to take the injured trio away.

Kuki organisations said the three youth should not have been admitted to the RIMS in the first place, given the ethnic tension. They said the three were injured when armed cadres of the National Socialist Council of Nagalim (NSCN) and the Kamson faction of the Zeliangrong United Front (ZUF) fired at people near Leilon Vaiphei village around 6 a.m. on June 15.

The NSCN and ZUF are Naga armed organisations. Six Naga men, whose bodies were recovered almost a month after they were abducted on May 13 after the killing of three church leaders, belonged to Leilon Vaiphei village.

Meanwhile, the State police said a suspected militant was killed on Tuesday in joint operations by security forces, launched across Churachandpur, Kangpokpi, and Ukhrul districts to dismantle extremist bases.

"During the encounter, one suspected militant was killed. An AK-47 rifle, along with magazines, ammunition, explosives, and other incriminating items, was recovered from the spot," the statement read.

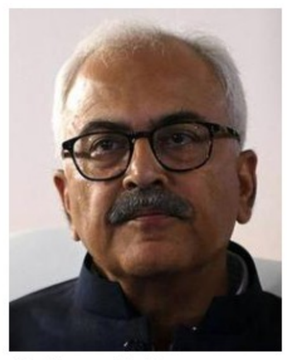
Fake encounter: MLA

Local MLA Letzamang Haokip claimed the person killed was a civilian named Lenminsang, and not a militant.

Condemning the "shocking killing" in what he said could be a fake encounter, he demanded a "thorough judicial and independent" probe into the incident and stringent action against all those responsible for his death.

Manipur Governor discusses security situation with Shah

The Hindu Bureau
NEW DELHI



Ajay Kumar Bhalla

Amid continuing violence in Manipur, Governor Ajay Kumar Bhalla met Union Home Minister Amit Shah in Delhi on Wednesday.

Mr. Bhalla is learnt to have apprised the Minister of the security situation in the northeastern State where tensions have escalated between the Kuki and Naga communities over the past one month.

The ethnic violence, which first erupted in the State on May 3, 2023, between the Kuki-Zo and Meitei people, has claimed the lives of more than 250 people so far.

"The overall security situation in the State was discussed," said a senior government official.

While no details were provided, the Union Home Ministry posted on X, "Governor of Manipur Shri @BhallaAjay26 met Union Home Minister and Minister of Cooperation Shri @AmitShah today."

After remaining under President's Rule for a year, the elected government in Manipur was restored on February 4 this year.

Other than Chief Minister Yumnam Khemchand Singh and Home Minister Govindas Konthoujam, two Deputy Chief Ministers – Losii Dikho and Nemcha Kipgen, representing Naga and Kuki communities – were sworn in.

The expansion of the Manipur Cabinet is yet to take place even as Assembly elections in the State are due early next year.

Ms. Kipgen, who took oath virtually from Delhi, is yet to travel to Imphal and attends all meetings online.

Delhi Police reply sought on bail plea of IM operatives

Aaratrika Bhaumik
NEW DELHI

The Supreme Court on Wednesday asked the Delhi Police to respond to bail pleas filed by two men accused of operating the Rajasthan module of the banned outfit Indian Mujahideen (IM). The accused, who have been in custody for 12 years, are challenging a Delhi High Court order denying them bail.

On April 24, the court had rejected the bail pleas of Mohd Saquib Ansari and Waqar Azhar, holding that they were active members of the banned terrorist organisation. In their petitions, the two accused contended that a similarly placed co-accused had already been granted bail.

They also pointed that they had spent nearly 12 years in custody awaiting the conclusion of the trial.

Bangladesh PM's adviser was stopped at airport as name was on 'blacklist'

Vijaita Singh
Kallol Bhattacherjee
NEW DELHI

Bangladesh Prime Minister Tarique Rahman's Information and Broadcasting Adviser Zahed Ur Rahman was stopped by immigration officials at the Delhi airport on June 14 as his name had been included in a "blacklist" generated by the External Affairs Ministry in 2025.

Zahed Ur Rahman was travelling using a regular passport with a SAARC visa to participate in a conference in India. As his name had not been withdrawn from the blacklist, the immigration authorities stopped him at the Delhi airport following a system-generated alert against his name, government sources told *The Hindu*.

According to *Prothom Alo*, a Bangladesh-based newspaper, the Bangladesh High Commission sent a formal letter to the Indian Ministry on June 12, confirming that Mr. Rahman would lead the Bangladeshi delegation at the conference.

Zahed Ur Rahman

Mr. Rahman was reportedly placed on the blacklist by the Ministry as he had made anti-India remarks in the past on social media platforms.

After the Bangladesh Nationalist Party (BNP) assumed power in the neighbouring country in February, Mr. Rahman was appointed as an adviser holding the rank of a State Minister in the Bangladesh government.

He was scheduled to attend a meeting of the Indian Ocean Rim Association (IORA) in Delhi.

Hours-long wait

"Zahed Ur Rahman, Information & Broadcasting Adviser of Bangladesh Prime Minister Tarique Rahman was allowed by the immigration to enter India but he chose to return from the airport in Delhi," said a source in response to a question on whether Ministry officials had forgotten to remove Mr. Rahman's name from the blacklist before his arrival in Delhi to attend the IORA conference.

When the case was flagged by the Bangladesh High Commission, the immigration notice against Mr. Rahman was withdrawn and he was allowed to enter India, sources said.

The process took more than two hours, prompting Mr. Rahman to return to Dhaka via a connecting flight from Colombo.

In 2016, the Union government informed Parliament that "names of foreign nationals and foreigners of Indian origin who are found to have indulged in anti-India activities, heinous crimes or violated visa rules are placed in a negative list after due consultations... Such persons are barred from entering into India for specified time period."

The list is then forwarded to the Bureau of Immigration (BOI), which screens for such entries at airports and land and seaports.

Defence production hits record ₹1.78 lakh cr.

Saurabh Trivedi
NEW DELHI

India's annual defence production has surged to an all-time high of ₹1.78 lakh crore in the financial year (FY) 2025-26, the Defence Ministry said on Wednesday.

According to the Ministry, the milestone represents a 15.6% growth over the previous fiscal year's output of ₹1.54 lakh crore and a staggering 110% increase since FY 2020-21 when the figure was ₹84,643 crore.

The indigenous defence production has increased almost four times from ₹43,746 crore in FY 2013-14.

Defence Public Sector Undertakings and other PSUs accounted for approximately 76% of total production, while the private sector contributed 24%.

Indian, Thai officials talk on bilateral, defence ties

The Hindu Bureau
NEW DELHI

The 10th Thailand-India Defence Dialogue was held in Bangkok on Tuesday with both the countries reviewing bilateral defence cooperation and exchanging views on regional and global security issues of mutual interest.

The dialogue was co-chaired by Thailand's Deputy Permanent Secretary for Defence, Admiral Nuttapol Diewvanich, and Joint Secretary in Defence Ministry Satyajit Mohanty.

According to the Ministry, both sides discussed the evolving security environment in the Indo-Pacific region and shared their perspectives on key regional developments. Defence industry cooperation featured prominently in the talks. They reaffirmed the importance of strengthening cooperation to promote stability and prosperity across the region.

Full body scanners on trial at four key airports; three more next in line

Vijaita Singh
NEW DELHI

Passengers flying from Srinagar, Jammu, and Ayodhya may soon pass through full body scanners at airport security, with the Bureau of Civil Aviation Security (BCAS) having requested operators at these airports to install the advanced imaging technology on a priority basis, a senior government official said on Wednesday.

The Bureau has also asked all other airport operators handling the movement of more than 50 lakh passengers annually to install the machines.

These scanners are already being used on a trial basis in the Delhi, Bengaluru, Hyderabad, and Kochi airports. The Central Industrial Security Force (CISF), which provides aviation security cover at 73 civil airports across the country, is evaluating the functioning of the scanners in these airports. The trials began in May and will continue for three months.

Through and through: The scanners detect metallic items under clothing, reduce the need for physical frisking. SPECIAL ARRANGEMENT

The scanners can detect metallic and non-metallic items concealed under clothing, while reducing the need for physical frisking and ensuring a smoother travel experience, the official said.

On April 2, the BCAS had issued the standard operating procedure for these scanners which are installed at pre-embarkation security points.

"The deployment of [full body scanners] is expected to significantly enhance threat detection capabilities by minimising physical frisking. The trial initiated in May 2026 will evaluate its operational effectiveness, passenger convenience, privacy safeguards, and integration with existing security procedures," the official said, adding that the evaluation will guide future policy decisions.

Other security measures include bomb detection and disposal squads that have been deployed at 25 airports, while bomb detection teams have been activated at 35 additional airports. Dog squads have been established at most airports to augment security operations, the official said.

Multiple seizures

In 2025, the CISF detected around 31.46 kg of gold, 114.13 kg of silver and cash amounting to ₹52.91 crore being illegally transported through airports. Until May 31 this year, 12.779 kg of gold, 23.825 kg of silver and ₹14.49 crore in cash has been seized by CISF personnel at airports.

Between 2021 and June 17, 2026, there have been 63 cases of drugs detected by the CISF

The CISF is also in the process of digitising operational records, including those pertaining to explosive detection system checks and prohibited item detections.

'Parasites': SC denies bail to man accused of cyberfraud, calls for sterner legislation

Aaratrika Bhaumik
NEW DELHI

The Supreme Court on Wednesday came down heavily on cyberfraudsters, describing them as "parasites" who prey on unsuspecting citizens, and observed that such offenders ought to be dealt with firmly. Refusing to entertain a plea by an accused seeking the clubbing of multiple criminal cases and the grant of bail, the court remarked that the interests of society are better protected when those involved in such offences remain in custody.

"You people are parasites. We have to be very harsh on you. Society's interest is there only when you are inside jail and not outside", a Bench headed by Chief Justice of India (CJI) Surya Kant observed.

The top court was hearing a petition filed by Manoj Kumar Singh, who is facing multiple cyberfraud cases across Bihar, Tamil Nadu, and Jammu and Kashmir.

Cyberfraudsters commit offences in one State and move elsewhere to avoid detection and arrest, SC Bench observes

Mr. Singh apprised the court that several criminal cases were pending against him in different States and expressed apprehension that additional cases could be registered in the future. He sought interim protection from the court.

The Bench, also comprising Justice V. Mohana, took note of the pattern allegedly followed by cyberfraud accused, observing that they often commit offences in one State and then move elsewhere to avoid detection and arrest.

"You are hardened criminals whose victims are spread pan-India. You cheat someone in Tamil Nadu and then go to Jammu", the Chief Justice said.

Accordingly, the Bench declined to grant any interim relief and observed that Mr. Singh was at liberty to approach the jurisdictional High Court for appropriate relief.

In October 2025, a CJI-led Bench had taken *suo motu* cognisance of "digital arrest" scams, an organised cyberfraud in which criminals impersonate law enforcement or judicial officers to extort money using forged court orders.

Delhi HC issues notice to govt. on Telegram's plea over suspension

Firm alerted to fabricated NEET questions being sold on its platform, but issues persisted, says Centre; company tells court it acted on complaints

Ishita Mishra
NEW DELHI

The Delhi High Court on Wednesday issued notice to the Union government on a petition filed by messaging app Telegram against the Centre's decision to suspend access to its services in India until June 22, citing concerns linked to the conduct of the NEET-UG re-examination.

Justice Tejas Karia directed the government to submit its response by Thursday.

The matter stems from the Centre's temporary suspension of Telegram amid concerns that organised cheating networks involved in the NEET-UG controversy were using the messaging app to circulate leaked or fabricated question papers and coordinate fraudulent activities. The restrictions were issued by the Ministry of Electronics and Information Technology. A separate direction also requires Telegram to disable the editing of previously sent messages until June 30.

> Our app is used by students who regularly get study material over it. Teachers use our platform to teach. It's used for business purposes and even for several other things. This is a curtailment of fundamental rights of those who use our app
>
> **TELEGRAM**
> In Delhi High Court

During the hearing, Solicitor-General Tushar Mehta, who represented the Centre, alleged that several channels on the platform were being used to offer leaked examination questions in exchange for money. He added that the authorities had repeatedly alerted the company to these concerns and shared specific examples, but the issues persisted. He said, "If you give me time till tomorrow morning at 8 a.m., I will place shocking things before the court."

Senior Advocate Dhruv Mehta, who appeared for Telegram, challenged the legality of the blocking order and contended that it reflected a failure to consider the company's responses. He told the court that Telegram had acted on lists of objectionable channels supplied by authorities. "We have removed all the contents that you have pointed out," he said, adding that the company had cooperated throughout the process.

Telegram was warned about misuse before blanket ban, says NTA chief

Maitri Porecha
NEW DELHI

Representatives of the messaging app Telegram were called in for meetings "at the highest levels", and warned about the misuse of the app's features that facilitate "paper leak frauds" before a blanket ban was issued, Abhishek Singh, Director-General of the National Testing Agency (NTA), told *The Hindu* on Wednesday.

Mr. Singh said the primary motive behind government intervention was to halt the spread of engineered fake leaks that can spread panic among the students ahead of the National Entrance-Cum-Eligibility Test (NEET) re-test scheduled for Sunday.

"The government had previously approached Telegram regarding the misuse of two specific features, including making edited timestamps visible in Telegram groups and addressing the issue of lack of stringent naming filters for its groups. However, Telegram did not alter its system then," Mr. Singh said.

The NTA was concerned about the *modus operandi* used by bad actors on Telegram to trigger mass panic by fabricating evidence of question paper leaks. Cheating syndicates have been systematically exploiting a specific loophole in Telegram's group and channel synchronisation features.

Locked out: The Electronics and Information Technology Ministry blocked nation-wide access to Telegram until June 22. GETTY IMAGES

For instance, a bad actor can create a public Telegram channel and link it to an associated group. Days before an exam, the administrator can upload a random PDF file on the channel, name it provocatively such as "NEET Question Paper Leaked". The day after the actual exam, the operator then can use Telegram's edit feature to replace the dummy PDF with the actual question paper. While the post inside the channel shows an 'edited' tag, the linked group retains the timestamp of the original post made days earlier. This creates a highly convincing illusion that the actual question paper was available on the platform before the exam began, sparking panic.

"After the ban, Telegram founder Pavel Durov said on X that they are making the 'edited' label more visible to prevent backdating scams. However, this change is still not visible on the app," Mr. Singh said. "Why can't Telegram simply fix its metadata so that timestamp changes are accurately reflected in linked group chats," he asked.

Pointing out that Telegram allows creation of alleged criminal groups with questionable names such as "Paper Leak NEET Mafia", Mr. Singh said the app has to "adhere to norms".

He argued that the lack of stringent naming filters and the ability to rapidly obscure participant identities have turned the platform into a hub for various alleged illegal activities.

The move to ban Telegram has evoked a debate over examination integrity versus digital liberties.

Manindra Agarwal, Director, IIT-Kanpur, said that because NEET exam papers have been leaked, NTA's motive is to stop the spread of fake news. "Telegram is a popular app, but it should also act in a responsible way especially if it has been requested to tweak certain features," Mr. Agarwal said.

However, cybersecurity and policy experts have raised red flags over taking an absolutist approach against the platform.

Nisarga Adhikary, a cybersecurity researcher at IIT-K, warned that a blanket ban or heavy-handed restriction "optimises for visibility rather than actual risk reduction".

SC defers hearing of plea on NEET re-test to July

The Hindu Bureau
NEW DELHI

The Supreme Court on Wednesday deferred to July the hearing of a plea challenging the National Testing Agency (NTA)'s decision to re-conduct National Eligibility-cum-Entrance Test (NEET-UG) for nearly 22 lakh candidates.

The NEET-UG, originally held on May 3, was cancelled nationwide on May 12 following allegations of paper leak.

Consequently, the Central Bureau of Investigation (CBI) launched a probe, and a fresh examination has been scheduled for June 21.

A Bench comprising Chief Justice of India (CJI) Surya Kant and Justice V. Mohana directed that the matter be listed before a Bench led by Justice P.S. Narasimha, which is already hearing a batch of cases related to the examination.

However, Justice Narasimha's Bench is scheduled to sit only after the Supreme Court resumes regular sittings on July 13, effectively rendering the plea infructuous.

Ex-Trinamool Minister arrested in cheating case

Senjuti Sengupta
KOLKATA

Former Trinamool Congress Minister Udayan Guha was arrested from his residence in the Phoolbagan area of Kolkata on Wednesday in connection with a cheating and financial misappropriation case registered in Cooch Behar district.

"Mr. Guha has been arrested based on an FIR lodged at the Dinhata police station on June 11 under Sections 406, 409, 420 of the IPC. The case relates to allegations of cheating and collection of 'cut money' under the Pradhan Mantri Awaas Yojana since 2016," said a senior police officer from Cooch Behar.

He said that the complainant, an individual from Dinhata, alleged that the former Minister collected crores of rupees from local residents to set up a children's unit at a government hospital.

Rebuild education system to reduce cost and stress, says Rahul in Kota

The Hindu Bureau
JAIPUR

Congress leader Rahul Gandhi on Wednesday called for rebuilding the country's education system, saying it puts pressure on children, gives stress to students, and extorts money from parents. The "Gen Z families" were spending an amount three times the Centre's education budget on top five competitive examinations, he said.

Mr. Gandhi addressed a students' convention at the Dussehra Maidan in Kota, considered Rajasthan's hub of coaching institutes, in the first leg of his national campaign to highlight the alleged NEET paper leak, youngsters' distress, exam irregularities, and unemployment, with a demand for accountability.

A large number of youngsters, including NEET and JEE aspirants, attended the programme, titled "Chhatron Ki Goonj" (students' voice) with the catchphrase, "Seal the Leaks". Mr. Gandhi said it was not a political meeting, but an occasion to interact with the young people struggling to get a future, facing challenges every single day.

Ear to the ground: Congress leader Rahul Gandhi addressing the "Chhatron Ki Goonj" rally at Kota in Rajasthan on Wednesday. PTI

'Parents burdened'

"The biggest weakness of India's education system is that it does not nurture the dreams of our children," he said. While the public sector education had declined, private education had become expensive, putting an immense burden on parents, Mr. Gandhi said.

Five students, who included NEET, JEE and Civil Services aspirants, were called on stage for an interaction with Mr. Gandhi. He talked to them about their plans for future, their strategies for preparation for exams and the expenditure incurred. A couple with their daughter also came on stage to narrate the family's struggle to arrange for coaching.

'Rejection system'

The Leader of Opposition in the Lok Sabha said the examination system for jobs and professional courses had turned out to be a "rejection system", rather than an exercise for selection, with a minuscule number of candidates getting selected from among lakhs. This puts a heavy burden on students and their families, resulting in financial ruin, depression, and suicides in extreme cases, he said.

He referred to the five top competitive exams in the country – UPSC, SSC, RRB, JEE and NEET – and said they drained the energy of the youth as well as the financial resources of middle-class families. "Our education system is in fact an extortion machine."

Mr. Gandhi will address similar conventions in Allahabad, Patna and Delhi during the campaign.

Rahul distracting students for political gain, says BJP leader

Devesh K. Pandey
NEW DELHI

The Bharatiya Janata Party on Wednesday attacked Congress leader Rahul Gandhi over his event in Kota, Rajasthan where he addressed a large gathering of students, with just three days remaining before the re-conduct of the NEET-UG examination.

BJP spokesperson Sudhanshu Trivedi accused Mr. Gandhi of attempting to distract students and subject them to unnecessary mental pressure during the final phase of the examination "just to exploit a sensitive issue for political gain". "Why do you want to organise such an event, create stress, and anxiety in the students' minds and subject them to mental harassment?" asked Mr. Trivedi, adding that there would be many other opportunities for Mr. Gandhi and the Congress to do politics after June 21.

"When the decision for the re-test has been made and also noted by the Supreme Court, what exactly are you demanding?," he said. While students were focusing on their preparations and the government was working with "sensitivity and vigilance" to ensure the examination was held smoothly, the leader appeared to be pursuing a political agenda, he said.

He described Mr. Gandhi's move as part of an "established and well-planned toolkit mindset" to repeatedly target institutions in a bid to spread "anarchy and confusion".

Abhishek Banerjee to meet LS Speaker over Trinamool 'split'

The Hindu Bureau
NEW DELHI

Trinamool Congress leader Abhishek Banerjee will meet Lok Sabha Speaker Om Birla on Friday regarding the split in the party, after 20 Lok Sabha MPs declared a "merger" with the Nationalist Citizens Party of India (NCPI).

In a letter dated June 10 addressed to the Speaker, he urged Mr. Birla not to recognise or grant separate status to any rebel Trinamool faction in the Lok Sabha. The letter was submitted to the Speaker's office on June 14, just hours before the rebel faction met Mr. Birla.

The letter contended that the Trinamool was a "single, indivisible political party" and that its legislative wing cannot be separated from the parent organisation. It added that no breakaway group based solely on signatures can claim recognition.

Abhishek Banerjee

The Speaker's office had initially invited Mr. Banerjee to meet him on Monday at 4 p.m., via an email sent at 2 p.m., on a day when he was being questioned by the Enforcement Directorate. Mr. Banerjee sought a fresh date and time to present his case, following which Mr. Birla scheduled the meeting for Friday.

Rajya Sabha Chairman refers BJP MPs' notice against Cong. chief to Privileges Committee

The Hindu Bureau
NEW DELHI

Rajya Sabha Chairman C.P. Radhakrishnan has referred the notice moved by six BJP MPs against Leader of the Opposition in the Upper House Mallikarjun Kharge, accusing him of making "derogatory, disparaging and disrespectful" remarks against Prime Minister Narendra Modi, to the Committee of Privileges for examination, investigation and report.

The notice has been submitted against Mr. Kharge "for alleged continual and deliberate use of grossly derogatory, disparaging and highly disrespectful remarks against the Prime Minister and thereby lowering the dignity of Parliament and its members." The notice has been given under Rule 188 of the Rules of Procedure and Conduct of Business in the Council of States (Rajya Sabha).

Mallikarjun Kharge

Remarks on Modi

According to sources, they had raised objections to remarks made by Mr. Kharge in April, when he allegedly called the Prime Minister "a terrorist". Though later Mr. Kharge clarified that he never used this phrase for the Prime Minister.

"I said tax terrorism is happening, ED, the Income Tax Department and the CBI are conducting raids... this terrorism is being facilitated by the PM. I did not call him a terrorist," the Congress leader had said.

A notification issued by the Rajya Sabha Secretariat on Wednesday said, "On consideration of the facts, the Chairman, Rajya Sabha has referred on June 16, the matter under Rule 203 of the Rules of Procedure and Conduct of Business in the Council of States (Rajya Sabha) to the Committee of Privileges for examination, investigation and report."

Rajya Sabha Deputy Chairman Harivansh is the Chairman of the Privileges Committee of the House.

TENDER NOTIFICATION NO.06/26-27 Dt: 18.06.2026
(Through KPP Portal only)

Tender is invited by "The I/c. Dy. General Manager (Materials)" for the following Tenders as detailed below.

Sl.No.	Description	EMD in Rs.
1	Supply of Manpower for Hutti Gold Mines. **HGML/2026-27/SE0094**	2,71,000/-
2	Providing manpower to Registered office, Bengaluru **HGML/2026-27/SE0097**	1,62,000/-
3	Supply of Lead acetate. **HGML/2026-27/IND0486**	1,77,000/-
4	Supply of Various types of MS ERW Pipes and MS Slip on Flanges. **HGML/2025-26/IND0434**	50,000/-
5	Supply of Elecon ET Series Gear Box for BCN No.-3. **HGML/2026-27/IND0508**	29,500/-
6	Procurement of Mens Formal Shoes, Cut Shoes, and Ladies Sandals. **HGML/2026-27/IND0512**	31,000/-
7	Procurement of Black Ankle Boots (Derby Shoes). **HGML/2026-27/IND0507**	41,000/-
8	Procurement of KDP 250 Pneumatic Pump. **HGML/2026-27/IND0510**	45,500/-
9	Procurement of Jaw Plates for 80 TPH Jaw Crusher. **HGML/2026-27/IND0487**	1,44,000/-
10	Providing of Staff Nurse & X-ray technicians at HGML Hospital. **HGML/2026-27/SE0089/CALL-2**	98,000/-

Calendar of events: (1) Pre-Bid Meetings (Zoom): **22.06.2026 for Sl.No.1 at 11.00 A.M., for Sl.No.2 at 11.30 A.M., for Sl.No.3 at 12.00 P.M.**
(2) Last date for receipt of tender: **04.07.2026 at 4.00 P.M. (3)** Opening of Technical Bid on: **06.07.2026 at 10.00 A.M.**
For further details interested bidders are advised to log on to website **https://www.kppp.karnataka.gov.in** or contact the office of undersigned during working hours. For participating in the above tender bidder needs to be registered in KPP portal.

Maoist with ₹10-lakh bounty surrenders in Kolkata: police

A woman Maoist, who goes by the names of Sakuntala and Pushpa, has surrendered before the Kolkata Police. Kolkata Police Commissioner Ajay Kumar Nand said on Wednesday that she surrendered with one gun and 40 rounds of bullets. "She is a native of Mechua in Belpahari, Jhargram district. She was a member of Dalma Squad's general committee, CPI (Maoist)..." Mr. Nand said. Though she belonged to Belpahari, she used to function mostly in Jharkhand. The official also added that there was a ₹10 lakh bounty on Ms. Sakuntala in Jharkhand. She has around four cases against her in West Bengal.

Three burnt to death and two injured in sand mining dispute

Three persons, including a 60-year-old former janpad panchayat vice-president, were charred to death while two others were injured after they were attacked by a large group over a purported dispute linked to sand mining in Chhattisgarh's Korea district on Tuesday night, the police said. Four persons have been arrested so far and the injured are in critical condition, the police said. The former vice-president and his business rivals, the Tripathi family, whose members are among the accused, were both associated with the BJP, a senior police officer said. Following this, the Congress accused the BJP government of providing patronage to illegal sand mining.

Tomato, onion, potato prices rise; farmers get low returns

In potato-growing States such as U.P. and Bihar, farmers are in distress as they get as little as ₹2 or ₹3 per kg for potatoes; but consumers are paying through their nose, says a farmer leader

A. M. Jigeesh
NEW DELHI

The prices of essential commodities, particularly tomatoes, onions, and potatoes, have increased across almost all States in the past one week, according to data from the Price Monitoring Division of the Department of Consumer Affairs. The price of tomatoes almost doubled in Delhi in this period, while the prices of potatoes and onions have also risen by about ₹3 to ₹5 per kg in the same time.

The Centre has been maintaining that ensuring the right prices for farmers and consumers is its "top priority". Farmers' bodies, on the other hand, say farmers are forced to sell their produce at very low prices, and the increase in retail prices is a failure of the government.

The retail price for a kg of tomatoes in Delhi was ₹53 as on Wednesday, according to data. A kg of tomatoes cost ₹30 on May 17. On June 10, tomatoes cost ₹31 per kg in the national capital's retail market. Similarly, the price for a kg of onions was ₹32 in Delhi on Wednesday, ₹5 higher than last week.

The retail price for a kilogram of tomatoes in Delhi was ₹53 as on Wednesday. SUSHIL KUMAR VERMA

Although the government has not provided any details on the rise in prices, an official source said it was a seasonal issue, and the Centre was taking steps to curb the price rise and ensure adequate supplies.

Except in the Andaman and Nicobar Islands, Andhra Pradesh, Karnataka, Manipur, Nagaland, Chandigarh, Ladakh, and Tamil Nadu, tomato prices have gone up in all States and Union Territories in the past week.

The prices of rice, gram dal, tur dal, urad dal, moong dal, masoor dal, mustard oil, and palm oil have also increased in Delhi and some other major centres. "This price rise is the biggest paradox. Retail prices are increasing tremendously and farmers are being fleeced. Who is gaining from this increase? The producing class does not gain, but the corporate houses in retail trade, and big traders, are gaining. They are getting the support of the ruling party to increase their profits," Samyukt Kisan Morcha (SKM) leader, and president of the All India Kisan Sabha, Ashok Dhawale, said.

Farmers in several States, including Maharashtra, did not even have the money to transport onions and tomatoes to the market, particularly after the fuel price hike, he said.

"They are destroying their produce. In potato-growing States such as Uttar Pradesh, and Bihar too, farmers are in distress as they get as little as ₹2 or ₹3 per kg for potatoes. But consumers are paying through their nose," farmer leader Ashok Dhawale said, urging the Union government to help both farmers and consumers.

Farmers warn of protests over fertilizer shortage

NEW DELHI
The SKM has warned that it will begin protests if the Union government fails to ensure adequate supply of fertilizer for kharif crops. After a national council meeting, SKM leaders said on Wednesday that in Bihar and Madhya Pradesh, farmers are already facing shortages, and fertilizer is being sold in the black market.

Nicobarese tribal councils oppose draft election rules

Abhinay Lakshman
NEW DELHI

The councils said the existing forms of self-governance align more closely with democratic values

Nicobarese tribal councils from three different island groups have written to the local administration turning down the idea of Election Commission-conducted polls to their self-governance system, saying it could introduce "election rivalry, division, and conflict" in their society. The councils said the existing forms of self-governance "more closely align with democratic values", and said a new system would interfere with their existing ways which have been "traditional, time-tested, and consensus-based" and in practice for thousands of years.

This comes even as the Andaman and Nicobar Islands (A&NI) administration on Wednesday notified a public meeting on June 30 in Sri Vijaya Puram to discuss the draft rules for elections to Nicobarese tribal councils.

The tribal councils in Little and Great Nicobar, Kamorta (Nancowry), and Katchal Island have written objections to the draft rules published by the A&NI administration in May. They have sought the withdrawal of this draft.

The draft rules aimed to reorganise Nicobarese villages into constituencies that would be represented by elected leaders, who would then constitute a larger tribal council. It would involve delimitation, preparation of voter rolls, and reservation of leadership positions for women. The draft also prescribes five-yearly elections. They outlined the polling process, the structure of the new representative system, the delimitation method, the rules for candidature, nomination, and withdrawal, their duties and responsibilities, and the administrative set-up for conducting these elections.

The draft rules were notified on May 15. The 30-day window for objections and suggestions closed this week. The administration has received letters of objection from the Congress party in the islands and the tribal councils.

SC Bench says it will look into allegation of Registry misplacing case records

Aaratrika Bhaumik
NEW DELHI

The Supreme Court on Wednesday took strong exception to an allegation that its Registry had misplaced a case file relating to a plea challenging a Punjab and Haryana High Court order, observing that such "inefficiency" warranted an inquiry.

A Bench comprising Chief Justice of India (CJI) Surya Kant and Justice V. Mohana made the observation after advocate Shubhi Shivani Ahmed informed the court that the file relating to an appeal against an April 27 order of the Punjab and Haryana High Court rejecting her client's anticipatory bail plea had allegedly been misplaced by the administrative wing of the apex court.

"The special leave petition was filed on June 8. However, it has not been registered by the Registry to date," she submitted. Ms. Ahmed further informed the Bench that she had written to the Registrar concerned seeking clarification but had received no response.

"It is a very serious matter if the Registry has misplaced the file. If our Registry is misplacing files in urgent matters, do you think I will simply direct the matter to be listed? I must do something more. Please give me the details. I would like to look into this inefficiency, what is the reason behind it and who is responsible for it," he said.

The CJI also asked Ms. Ahmed to have the advocate-on-record (AoR) who had filed the petition lodge a formal complaint and furnish the relevant details of the incident.

Repeated instances

This is not the first time CJI Kant has voiced concern over the functioning of the Registry.

In May, he delivered a sharp rebuke to the administrative wing, terming the conduct of its officials "nasty" and remarking that some appeared to think of themselves as a "super Chief Justice of India".

Bangladesh returns Assam man abducted from 'no-man's land'

The Hindu Bureau
GUWAHATI

The Border Guard Bangladesh (BGB) returned a 60-year-old farmer from Assam's Cachar district more than 10 hours after he was allegedly abducted from the Indian side of the border on Tuesday morning.

Ranjit Das, the farmer who was abducted from the Indian side of border on Tuesday.

Though Ranjit Das was taken away from the Kinnarkhal area of Cachar's Katigorah, the BGB personnel handed him over to their Border Security Force counterparts at the Bhanga border outpost in the adjoining Sribhumi district later in the day. "The man, a resident of Chandinagar Part-II village, close to our (Kinnarkhal) outpost, was released at 9.15 p.m. after a series of flag meetings between the border-guarding forces," a BSF officer said.

Later, the local police took Mr. Das to Katigorah Model Hospital for a medical examination. He said he was initially assaulted by his abductors, but was treated fairly well during his 10-hour captivity in a house on the Bangladesh side of the border.

Sujit Das, the farmer's son, said his father had gone to the "no-man's land" along with 16 others to work on their agricultural plots. A 150-yard strip on either side of the zero line is referred to as no-man's land.

Rural workers, activists call for repeal of new jobs Act; to stage protest from July 1

The Hindu Bureau
NEW DELHI

The NREGA Sangharsh Morcha and the Joint Platform for Agricultural and Rural Workers' Unions on Wednesday announced an indefinite protest from July 1, demanding the repeal of the Viksit Bharat-Guarantee for Rozgar and Ajeevika Mission (Gramin) (VB-G RAM G).

The VB-G RAM G scheme will come into force on July 1, replacing the Mahatma Gandhi National Rural Employment Guarantee Act, launched by the Congress-led UPA government in 2006.

Announcing the protest at a press conference, the organisations rejected the claim that the new scheme would increase the guaranteed work days from 100 to 125 per rural household.

Several organisations across the country have protested against the proposed VB-G RAM G scheme. J. ALLEN EGENUSE

They cited the recent budgetary allocation to show that the funds, in the best-case scenario, would provide only 42 days of work in a financial year. The bodies said the protests would continue until the proposed law is repealed. Taking a decentralised approach, these would be held at the panchayat level, the activists said.

An analysis of the Centre's proposed interim allocations announced on June 9 indicates a significant gap between the promised 125 days of work and the employment that can be generated, they said.

The draft rules require States to contribute 40% of the programme cost, putting an unprecedented burden on the States, said Nikhil Dey of the NREGA Sangharsh Morcha.

FAITH

Significance of Sara Kshetra

There are two sets of Vaishnava Agamas – Vaikhanasa and Pancharatra. Pancharatra is believed to have been revealed by Lord Narayana over the course of five nights. He first taught the Pancharatra to the serpent Ananta, then to Garuda, then to Senesa, then to Brahma and finally to Rudra. All five to whom the Pancharatra was taught worshipped in Sara Kshetra, said Therazhundur Gosakan Bhattachariar in a discourse. Sara Kshetra is known as Tiruccherai in Tamil and is in Tamil Nadu. Garuda belongs to Kashyapa gotra, and even today the priests who perform puja in the Tiruccherai temple belong to Kashyapa gotra.

At the end of the deluge, Lord Narayana told Brahma to make a pot, and preserve the Vedas and other sacred literature in it. Brahma tried many times to make a pot, but every pot he made broke. So, he asked the Lord what he should do. The Lord said, "Go to Sara Kshetra. There are nine sacred tirthas. Of these the Sara Pushkarini is the most sacred. Make the pot on the banks of Sara Pushkarini." Brahma did as instructed, and this time the pot did not break. He placed all the sacred literature in the pot, and as ordered by the Lord, he placed the pot in Kumbakonam. Bhrugu, Saunaka, Vyasa, Markandeya, Parasara, Phanindra (Ananta) and Vainateya (Garuda) did penance on the banks of Sara Pushkarini.

The temple of Saranatha is on the banks of this pushkarini. The Lord here is Saranatha; the Goddess is Saranayaki; the pushkarini is Sara tirtha; and the vimana is Sara vimana. Brahmanda Purana and Bhavishyottara Purana describe this kshetra.

INBRIEF

RBI allows banks to offer higher interest to NRIs/PIOs

The Reserve Bank of India (RBI) has decided to temporarily withdraw the interest rate ceiling on fresh Foreign Currently Non-Resident-Bank [FCNR(B)] deposits of 3-5 year tenors and the restriction on interest rates on Non-Resident External (NRE) deposits of three-year and above tenors, including deposits that are renewed upon maturity. The move, a review of its 2025 direction, is to boost forex reserves and will be in effect till September 30, 2026. The central bank issued amendment directions to this effect on Wednesday. As per the directions, banks will be able to offer higher interest rates to this specific category of depositors and interest rates on NRE/NRO deposits will not be higher than those offered by the bank on comparable domestic rupee term deposits.

India's crude oil, LNG imports surge in May

India's imports of crude oil grew about 7.5% in May, the third month of the West Asia conflict, over their level in April while imports of liquified natural gas (LNG) increased about 16% over the same period. However, the import bill for crude oil surged 14.7% and that for LNG by more than 22% during the same period, an analysis of data from the Petroleum Planning and Analysis Cell (PPAC) indicates. In April this year, India had imported 20.1 MMT of crude oil spending $16.3 billion and spent $0.9 billion to import 1,954 million metric standard cubic metres per day (MMSCMD) of LNG. When compared with the same month last year, India's crude imports surged 1.41% to 21.6 million metric tonnes (MMT) in May 2026. However, amidst the West Asia crisis, India's importers had to pay $18.7 billion during the reported period, which was approximately 81.6% higher than the $10.3 billion paid in the comparable period last year.

Peace deal: cautious Indian shipowners seek govt. help

Indian govt. to evacuate 34 ships, including 16 fertilizer vessels from Persian Gulf; Naval escorts being planned for safety, as shipowners expect that stability may take more than a month

M. Kalyanaraman
CHENNAI

Though the announcement of the U.S.-Iran peace agreement has been welcomed as good news, Indian shipowners were cautious, just as international shipping companies.

"It's too early to say anything. We have to wait for the agreement to be signed, and then clarity has to emerge on the terms and conditions," says Anil Develi, CEO of Indian National Shipowners Association, adding uncertainty continues.

Mr. Devli said if things go well, it would take another 30 to 60 days for full normalcy. "We hope and expect the government to facilitate getting the vessels back," he said.

Meanwhile, the Bharat Maritime Insurance Pool, that came with a sovereign guarantee of $1.4 billion for providing re-insurance, has been a non-starter, says Mr. Devli. He added that one Indian shipowner had received a quote from a public sector company and it turned out to be more than London rates, despite the government offering to bear re-insurance costs. Blaming the situation on lack of trust and transparency on the part of both shipowners and Indian insurance companies, Tony Fernandez, who has nearly 50 years of experience in insurance, says it was quite possible that, because of audit fears, the public sector insurer could have transferred even the remaining risk to other parties, thereby increasing the cost of insurance. Mr. Fernandez said that this has been an old problem in the insurance industry and has plagued the current effort to mitigate war-risk insurance too. Meanwhile, the government has identified 34 vessels of Indian interest carrying various flags. These include 16 vessels carrying fertilizers, including one Indian-flagged ship, Jag Arnav. Fertilizer supplies are critical for the ongoing kharif season.

In transit: In total, 539 Indian seafarers are on Indian-flagged vessels, including 325 in the Persian Gulf region. AP

Nine energy supply vessels have been identified by the government for evacuation - three are Indian-flagged and six are foreign-flagged.

The government has also been keen on LNG ships, since natural gas is a key component in making fertilizers domestically. The Marshall Islands-flagged LNG carrier Al Ghashamiya transited the Strait of Hormuz on June 16. The vessel is bound for Dahej, carrying more than 90,000 tonnes.

For the purpose of evacuation of these vessels, the government is considering naval escorts and other protective measures for safe exit. Thirteen Indian-flagged vessels are still in the Persian Gulf, west of the Strait of Hormuz; nine are in the Gulf of Oman; three in the Gulf of Aden; and eight in the Red Sea area. These include five crude oil carriers, one LPG carrier, three bulkers, and two container ships.

In total, 539 Indian seafarers are on Indian-flagged vessels (325 in the Persian Gulf region west of the Strait of Hormuz and 214 in the Gulf of Oman). So far, more than 3,600 Indian seafarers have been evacuated by various shipping companies from the Gulf region.

Indian-flagged vessels have faced four incidents, while 19 incidents involving Indian-crewed vessels were reported. So far, seven confirmed Indian seafarer deaths have been reported. Four have been injured, and one is presumed dead. According to the latest assessment of the government, a substantial volume of cargo is currently stranded or awaiting evacuation across ports. At major ports, the volume comprises 11,299 TEUs of containers and 1,771 TEUs of perishable cargo. At non-major ports, including Mundra, Pipavav, and Hazira, 28,891 TEUs of containers and 1,368 TEUs of perishable cargo are awaiting evacuation.

In total, more than 43,000 TEUs of cargo, including over 3,100 TEUs of perishable goods, remain affected. The government has put in place several measures to reduce congestion at ports due to shipping delays.

Additional storage has been allocated for cargo handling requirements, along with extended support for stacking cargo within the port area to avoid unnecessary movement and minimize additional costs for customers.

The relief measures are expected to provide immediate operational and financial support to the trade community while helping ports manage congestion, preserve time-sensitive cargo, and maintain the smooth flow of maritime commerce.

India, U.K. announce July 15 as trade deal implementation date

T.C.A. Sharad Raghavan
NEW DELHI

PM Modi with his British counterpart Keir Starmer during the G7 Summit.

India and the United Kingdom have overcome last-minute differences over steel import duties to finally announce July 15 as the implementation date for the trade deal between the two countries, the two governments announced on Wednesday.

The Comprehensive Economic and Trade Agreement (CETA) was signed by the two countries in July 2025 and was all set to be implemented by April or early May 2026.

However, a fresh regulation by the U.K. announced in May and applicable to all countries cut the quota for duty-free steel imports by 60% and doubled the tariff on above-quota imports to 50%. These new rules are to come into effect from July 1, 2026.

These tariffs and quotas were not part of the trade deal negotiations and suddenly halted the implementation process.

According to Commerce Secretary Rajesh Agrawal, a team from India has been in the U.K. over the last few days to move things along.

"Delighted to note that the India-UK Comprehensive Economic and Trade Agreement will enter into force on 15th July 2026," Prime Minister Narendra Modi posted on X following the announcement. "This agreement will significantly boost our bilateral trade and investment."

The implementation of the trade deal, under which the U.K. will remove tariffs on 99% of its product lines, will be accompanied by the implementation of the Agreement on Social Security, also referred to as the Double Contribution Convention (DCC), on July 15. It further said that such protections would be through a mix of country-specific quotas, residual quotas and access under an Authorised Use Scheme (AUS).

'Landmark consensus'

"Demonstrating the collaborative strength of the India-U.K. Comprehensive Economic Partnership Agreement (CETA), India and the United Kingdom have successfully reached a landmark consensus to safeguard and promote bilateral steel trade," the Ministry of Commerce and Industry said in a release.

Without revealing details on what exactly the solution to the U.K. steel tariff issue would entail, the release added that "both sides mutually agreed to protect commercial interests, minimise market disruptions, and ensure an overall balanced and stable trading environment for exporters".

BMW eyes sales of 20,000 units in India

Sangeetha Kandavel
CHENNAI

Hardeep Singh Brar

German automaker BMW is targeting annual sales of more than 20,000 units in 2026, buoyed by strong demand for luxury vehicles in the Indian market.

"BMW sold around 18,000 vehicles, including 800 MINI cars, last year. The company has maintained its growth momentum, reporting a 17% year-on-year increase in sales during the first quarter of 2026," said Hardeep Singh Brar, president and CEO of BMW Group India.

After launching MINI Countryman C, a sports utility vehicle (SUV) assembled at BMWs plant at the Mahindra World City, near Chennai, he said, "Last year, we sold around 730 MINI cars. So, this year, we want to double MINI sales," he added.

Responding to a query on the profile of MINI buyers, he said most customers already own a luxury vehicle and purchase a MINI as an additional car. "We have also seen many customers buying a MINI as a gift for their spouse," he said, adding that the luxury car segment has consistently outperformed the mass-market segment.

Oil prices tumble on likely U.S.-Iran deal

Saptaparno Ghosh
NEW DELHI

Oil prices fell to their lowest level in more than three-and-half months on Wednesday as markets registered some optimism from a potential peace deal between Iran and the U.S.

Analysts however, do not see a complete return to normalcy immediately. During trade Wednesday, benchmark Brent crude futures declined 1.52% from their previous close to $77.76 per barrel.

The International Energy Agency (IEA) in its latest monthly forecast held that a complete recovery would not happen immediately.

"As mines have to be removed, the main shipping lines and supply chain would take time to normalise," the IEA stated.

Speaking to *The Hindu*, Prashant Vashisht, senior VP and co-group head, corporate ratings, ICRA, said it may take about 8-9 months for the inventories to be stocked up to pre-war levels, which would continue to reflect in elevated effective prices.

He added that, considering the volatile situation, countries may also rush to boost reserves.

On inflation, Maulik Patel, head of research, Equirus Securities told *The Hindu* that lower crude prices were a positive and would "gradually ease imported inflation pressures".

"However, the benefits may play out over the coming quarters rather than immediately.

"That said, the overall macro-outlook is improving compared with the uncertainty seen over the past two months," he said.

'India to meet 3% compressed biogas blending goal for FY27'

Saptaparno Ghosh
NEW DELHI

The Centre is on track to meet the goal of blending 3% compressed biogas (CBG) with CNG and domestic piped natural gas for FY27 with the blending percentage having already nearly doubled to about 2% at present, officials told *The Hindu*.

They added with more CBG plants under varied stages of construction, this would provide a fillip towards achieving the target.

India's present consumption of natural gas for domestic PNG and CNG in transport combined is about 34-35 million metric standard cubic metre per day (MMSCMD).

A biogas Plant at Bengaluru in the State of Karnataka.

"In April, CBG sales were approximately 0.66 mmscmd and about 0.63 mmscmd in May," they stated, explaining that at the present rate of consumption they amount to nearly 2% of blending.

More plants

According to the Petroleum Ministry's Gobardhan portal, construction of 324 CBG/bio-CNG plants are under progress while construction work is yet to start on 1,261 plants.

Suresh N.S., senior research scientist, Strategic Initiatives Group at think-tank CSTEP said geopolitical developments underscore urgency of boosting India's domestic energy security and reducing dependence on imported fuels.

Rupee up for fourth session in row on softer oil price

The Hindu Bureau
MUMBAI

Indian currency appreciated for the fourth consecutive session on Wednesday, closing at ₹94.50 a dollar, up 10 paisa as easing tensions between U.S. and Iran cooled crude prices.

"Local currency outperformed Asian peers as oil prices continued to soften on expectation of easing energy supply pressures from a U.S.-Iran deal. Technically, spot USD-INR faces resistance at 95.10," said Dilip Parmar, research analyst at HDFC Securities

KARNATAKA POWER CORPORATION LIMITED
CIN : U85110KA1970SGC001919

ABSTRACT e- TENDER NOTIFICATION (Through KPP Portal Only)

KPCL invites Bids in two parts through GoK KPP Portal: **https://kppp.karnataka.gov.in** for the following works.

BHADRA GENERATING STATION

1) **KPCL/2026-27/PS/WORK_INDENT4148/CALL-2, Date:11.06.2026.** Design, Manufacture, Supply, Erection, Testing and Commissioning of 11 kV KIOSK consisting of 1 incomer, 2 outgoing feeders cubicles supplied with 11 kV vacuum circuit breakers, CTs, VTs, protective relays and multi-function meter etc., complete including dismantling of the existing equipment at Bhadra Generating Station. EMD: **Rs. 35,950/-**. Last date and time for on-line submission of tenders: **25.06.2026 upto 16:30Hrs.** Further information if required can be obtained from office of the **Executive Engineer (O&M)Bhadra, Bhadra Generating Station, KPCL, B.R. Project - 577115, Bhadravathi Taluk, Shivamogga District, Karnataka.**

KALINADI HYDRO ELECTRIC PROJECT

1). **KPCL/2026-27/OW/WORK_INDENT4252, Date: 12.06.2026.** Comprehensive AMC of 13Nos. High mast systems installed at Ambikanagar and Dam sites. **EMD: Rs. 10,250/-.**Tender processing fee: **As per e-procurement norms.** Period of Completion: **365 days(1 year AMC). Last date and time for On-line submission of Tenders: 27.06.2026, 16:00Hrs.** Further details can be had from the office of the **Executive Engineer (O,PS&C)Nagjhari, KPCL, Ambikanagar-581363, Uttara Kannada District.** Mobile: **94482 30872.**

KALINADI HYDRO ELECTRIC PROJECT - I & II

1). **KPCL/2025-26/GH/WORK INDENT4065, Date:10.06.2026.** Supply and replacement of electrical control panels and re-wiring of 35 Ton crest gantry crane and 20T draft tube gantry crane at Kadra Dam. Tender Amount (excl. GST): **Rs. 8,40,000/-.** EMD: **Rs.21,000/-.** Last date and time for receipt of tenders: **24.06.2026, 17:00Hrs.** Further details can be had from the office of the **Executive Engineer(Gates) Kali, KPCL, Kadra, Karwar Taluk, North Kanara District - 581396,** Mobile: **9141611350.** E-mail: **eegateskali@gmail.com.**

SHARAVATHY HYDRO ELECTRIC PROJECT

1). **KPCL/2026-27/GH/WORK_INDENT4227, Date:15.06.2026.** Providing Under water diving Services & mobile crane services at Sharavathy Valley Project, Varahi Hydro-Electric Project & Bhadra Dam. EMD: **Rs. 25,320/-.** Last date and time for receipt of tenders: **01.07.2026 @ 16:00Hrs.** Any Further, information if required can be obtained from office of the **Executive Engineer (Gates)Sharavathy, KPCL, Kargal-577421, Sagar Taluk, Shivamogga District,** Mobile: **91483 46914 / 94808 30315,** E-mail: **eegatessharavathy@gmail.com.**

Putin hosts ASEAN leaders as West mounts pressure on Ukraine war

AFP

Russian President Vladimir Putin hosts a summit of 11 Southeast Asian nations in Kazan from Wednesday. Facing Western sanctions over the Ukraine conflict, Moscow has pivoted its economy towards Asia. Moscow said the leaders will "exchange views on global and regional problems" and new aims in Russia-ASEAN ties. AFP

Israeli settlers torch two West Bank mosques, say Palestinian officials

AP

Israeli settlers set fire to mosques in two West Bank villages, the local mayors said, while signs of arson and vandalism were seen at the site. "The forces searched the area for suspects and located two burned mosques, as well as graffiti on the walls. The suspects had fled prior to the arrival of the forces," Israel's military said. AFP

U.S.-Iran deal could remove restrictions on tankers; unlock banking, insurance access

Before the conflict, international shipping through the Strait of Hormuz operated without tolls, service fees or any mandatory reporting to national authorities; while the U.S. says no tolls should be imposed, Iran says ships transiting the strait will have to pay a service fee and report to authorities

NEWS ANALYSIS

M. Kalyanaraman

Tankers and cargo vessels in the Gulf of Oman, along shipping routes linking the Strait of Hormuz and the Arabian Sea. AP

The 14-point Memorandum of Understanding (MoU) between Iran and the U.S., as published by Al Arabiya English, contains several commitments by the U.S. and Iran relating to shipping and transit through the Strait of Hormuz.

Under the agreement, the U.S. will lift its naval blockade and help restore maritime traffic within 30 days. Iran, in turn, has committed to restoring traffic "proportional to the pre-war volume" and to facilitating the movement of merchant vessels to and from the Persian Gulf within the same period.

According to the text published by Al Arabiya, Washington has agreed to immediately lift Treasury Department sanctions on exports of Iranian crude oil, petroleum products and derivatives, along with related services such as banking, insurance and transportation.

In practical terms, this would remove restrictions on tankers previously sanctioned for carrying Iranian oil and enable them to access international banking systems, insurance markets and credit facilities more easily.

Days before the MoU was signed, the U.S. carried out punitive strikes on vessels allegedly transporting Iranian oil, including two ships bound for India and crewed by Indian seafarers, three of whom were killed. Subsequently, U.S. Secretary of State Marco Rubio maintained that the transport of "illicit" Iranian oil would not be permitted. However, negotiations on sanctions relief had reportedly been nearing completion for several days. Before the conflict, international shipping through the Strait of Hormuz, a naturally occurring one, operated without tolls, service fees or any mandatory reporting to national authorities. Malacca-Singapore straits involve reporting to national authorities for the purpose of safe navigation but no fee, so is the Gibraltar.

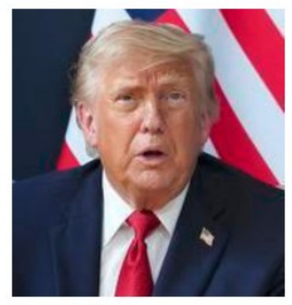
In Bosphorus and Dardanelles, vessels pay service charges, including for pilotage to Turkiye. In the artificial Suez and Panama canals, ships pay substantial transit fees, though alternative longer and more expensive routes remain available if those waterways are disrupted.

"Any fee to any authority for Strait of Hormuz would be vehemently opposed by global shipping for various reasons," said Capt. Ritesh Kumar, a veteran master mariner.

While the U.S. has indicated that no tolls should be imposed, Iran has signalled that it may seek to levy service charges. Iranian officials had also suggested that future arrangements could require ships transiting the Strait of Hormuz to report to Iran and/or Oman.

Iran accord to end the war to be signed 'shortly', says Trump

Agence France-Presse
EVIAN



Donald Trump

U.S. President Donald Trump said on Wednesday he expected the accord with Iran ending the West Asia war to be signed "shortly" but cast uncertainty over the exact date.

"The deal we reached with Iran on Sunday will be signed shortly, tomorrow (Thursday), maybe the next day (Friday)," Mr. Trump said at the G7 summit, after previous announcements that it would be signed on Friday in Switzerland with Vice-President J.D. Vance representing the United States.

"We are going to most likely sign a deal," he added.

'Prepared to bomb'

Mr. Trump told presspersons at the final press conference of the G7 that he was prepared to "bomb the hell" out of Iran if they violated the agreement.

"If they are not behaving they will be hit again," he said.

But he added: "They don't want to get bombed, they don't want to get hit."

Mr. Trump said he "might" stay in Europe for the signing but added that as a memorandum of understanding "it might not be the kind of a document I should be signing".

Asked if sending Mr. Vance to the signing rather than going himself was to avoid blame if it did not work out, Mr. Trump replied: "I like that idea."

"If it works out I am going to take the credit, if it doesn't work out I'm blaming JD! You better be careful JD! He is going to turn his plane around and get the hell out of here!"

Following reports of tensions with Prime Minister Benjamin Netanyahu, Mr. Trump said Washington "did send a copy" to Israel of the accord.

Dilute uranium

Meanwhile, senior U.S. administration officials said that Iran has agreed to dilute its enriched uranium stocks under its interim deal with the U.S., as they released what they said was the text of the agreement.

"The fact that they're conceding to that is a major, major win for the United States of America," one of the U.S. officials said of the nuclear issue on a call with presspersons.

U.S. drops 'Indo' from name of its military's Pacific Command

Agence France-Presse
WASHINGTON

The Pentagon is restoring the name of the U.S. Indo-Pacific Command to the U.S. Pacific Command, it said on Tuesday, reversing a 2018 decision.

The renaming will not change the command's area of responsibility, which stretches from the western part of India to America's Pacific coastline, the Department of War said in a statement.

Its "fundamental mission and its unwavering commitment to maintaining a free and open theatre alongside regional allies and partners" also remain unchanged, it added. The name change "honours the command's deep historical roots, fostering a sense of pride and collective spirit among all who serve in the Pacific," the department said.

The U.S. Pacific Command was established after the Second World War. It was renamed as the U.S. Indo-Pacific Command in 2018, in a nod to the growing importance of the Indian Ocean in U.S. strategic thinking.

Trump delays Clayton's DNI nomination to try to push Congress on voter ID Bill

Associated Press
EVIAN-LES-BAINS

U.S. President Donald Trump said on Wednesday that he was delaying federal prosecutor Jay Clayton's nomination to lead the U.S. intelligence community in a bid to force Congress to act on a voter ID Bill that currently lacks enough support for passage.

The Republican President said in a social media post just hours before Mr. Clayton's scheduled confirmation hearing that he will keep Bill Pulte, a top U.S. housing official, as acting Director of National Intelligence. Democratic and Republican lawmakers had opposed Mr. Trump's selection of Mr. Pulte, citing his lack of known experience in intelligence and his use of his current administration perch to target perceived adversaries of the President – resistance that last week forced Mr. Trump to turn to Mr. Clayton.

The abrupt announcement creates instant uncertainty over the long-term leadership of the 18-agency intelligence community and dashes hopes for a swift renewal of Foreign Intelligence Surveillance Act that expired in Congress last week due to bipartisan anger over Mr. Trump's pick of Mr. Pulte.

Jay Clayton

Mr. Clayton had been set to appear on Wednesday for a Senate confirmation hearing that was fast-tracked because of the program's lapse. Democrats had said they would not renew the expired surveillance programs until Mr. Trump withdrew the selection of Mr. Pulte.

In his social media post, Mr. Trump accused Democrats of breaking a deal to renew the program after he nominated Mr. Clayton.

Trump also added another condition: linking his approval of the surveillance program to the passage of a Bill requiring people to show ID to vote.

The Republican-controlled Congress has not acted on the voting Bill because it does not have enough support in either chamber, particularly from Democrats.

Elon Musk's AI tool Grok was used in strikes against Iran: U.S.

Agence France-Presse
SAN FRANCISCO

The project's Maven Smart Systems 'enabled U.S. forces to deploy over 2,000 munitions to 2,000 distinct targets within 96 hours,' a statement said. REUTERS

Elon Musk's artificial intelligence tool Grok was used in strikes against Iran, the United States government revealed in a legal briefing seen on Tuesday.

The June 15 brief defends the gas turbines used by a giant data centre belonging to the trillionaire's company xAI, which are the target of an environmental lawsuit.

In the brief, the U.S. Department of Justice argued that the lawsuit "threatens American national, economic, and energy security by seeking to shut off the power supply for artificial intelligence innovation that supports the Department of War's military operations."

To support the argument, federal prosecutors presented testimony from Pentagon AI chief Cameron Stanley in which he states, under oath, that Grok is already in use within Project Maven, the U.S. military's AI-assisted targeting program that was initially powered by Anthropic's Claude model.

The project's Maven Smart Systems (MSS) "enabled U.S. forces to deploy over 2,000 munitions to 2,000 distinct targets within 96 hours during Operation Epic Fury," Mr. Stanley's statement said.

Mr. Stanley praised Mr. Musk's technology and "the greatly increased operational efficiency made possible by the Grok Gov Model".

At the end of February, the government terminated its contracts with Anthropic after it refused to allow its tools to be used for fully automated strikes or the mass surveillance of Americans. The Pentagon then turned to Anthropic's competitors, like Google, OpenAI and xAI, to continue its pursuit of AI.

STALEMATE

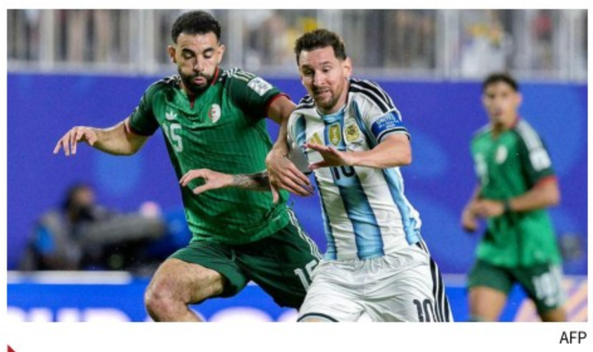
Wissa's strike helps a battling DR Congo hold Portugal

AFP

Portugal was held to a 1-1 draw by the Democratic Republic of Congo on Wednesday as Cristiano Ronaldo played in a record-equalling sixth World Cup. Joao Neves opened the scoring in the sixth minute in Houston but Yoane Wissa equalised in first-half injury time to give the Congolese their first-ever World Cup point.

HIGH PRAISE

Messi is a madman: Haaland in awe of the Argentine superstar

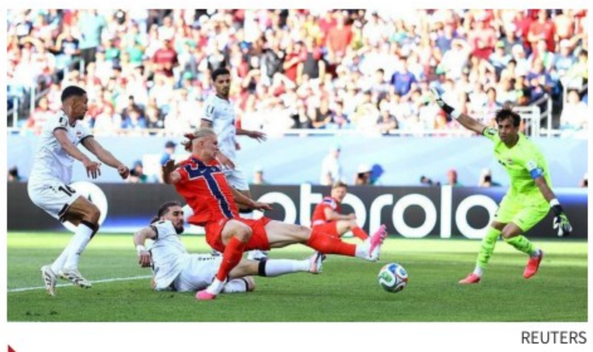


AFP

Norway's Erling Haaland was in awe of Lionel Messi, saying that he is a "madman", after the Argentine legend scored a hat-trick against Algeria in the defending champion's 3-0 win in their World Cup opener. In a Snapchat story, Haaland uploaded his selfie and wrote in the caption, "Messi is a madman" along with a crown emoji.

UP AND AWAY

Haaland double powers Norway's big win over Iraq



REUTERS

Erling Haaland struck his first World Cup goals as Norway beat Iraq 4-1 in Boston on Tuesday in its first game at a major tournament in 26 years. The win left Norway on top of Group I on goal difference, level with France on three points. The Norwegians face Senegal in their next game in New Jersey on June 22.

LIKE FATHER LIKE SON

Norway fields three children of former World Cup stars

FIFA

In a World Cup first, Norway became the first team to field three sons of former World Cup players in the same match, in the contest against Iraq on Wednesday. Alf-Inge Haaland, Goran Sorloth and Erik Thorstvedt, the fathers of Erling, Alexander and Kristian respectively, had played against Italy on June 23, 1994.

1, 2, 3, here we go! Messi sets Argentina off to flyer with a wicked shot from distance, follows it up wth a cheeky strike to beat Luca Zidane before completing his treble with another unstoppable effort past Algeria's flat-footed defence. REUTERS, AFP, AP

Messi hat-trick headlines Argentina's romp past Algeria

The captain leads the way for the defending champion with a dazzling show, putting the 38-year-old level with Germany's Klose's all-time record of 16 goals at the quadrennial showpiece

FIFA WORLD CUP

Agence France-Presse
KANSAS CITY

Lionel Messi scored a dazzling hat-trick for Argentina on Tuesday to equal Miroslav Klose's all-time record of 16 goals at World Cups as the defending champion swept Algeria aside 3-0.

Messi also became the first player to feature in six World Cup tournaments, in his 200th international match. Messi produced a majestic finish from distance in the 17th minute, sparking a frenzy among his adoring fans.

Algeria goalkeeper Luca Zidane, son of France great Zinedine, got his hands to the ball, but could not keep it out.

Messi netted again in the second half from close range, gobbling up a rebound to take him just one goal behind the all-time record held by Germany's Klose. And he completed his first hat-trick at a World Cup with an unstoppable finish in the 76th minute.

The diminutive genius was substituted shortly afterwards.

The Group J match in the open-air stadium started at a frantic pace and both sides had early goals ruled out for offside, including one from Messi.

The South Americans were largely in control of the match, fluid in attack with their No. 10 pulling the strings.

But as the clock ticked towards half-time Algeria enjoyed a better spell, with Argentina goalkeeper Emiliano Martinez forced to parry a shot from Fares Chaibi from a tight angle.

Messi curled another effort over the bar in the early minutes of the second half and Zidane kept out a shot from Lautaro Martinez.

Lionel Scaloni's Argentina is seeking to become the first back-to-back winners since Brazil managed the feat in 1962.

Algeria is hoping to reach the knockout round for only the second time, in a group that also includes Austria and Jordan.

Earlier, the roads around the Kansas City Stadium were clogged as tens of thousands of Argentine fans streamed towards ground dressed in blue and white, many with Messi's name on the back of their shirts.

Goals, Glory, Messi
5
The Argentine is the second player (after Cristiano Ronaldo) to score in five editions
My tears after the first goal? I've had some tough days. It wasn't related to football. And those feelings were because of that. I thank my teammates, the coaching staff and the delegation for helping me
MESSI
5
His fifth World Cup goal from outside the penalty area drew him level with Rivellino at the top
SIX
The first man to figure in six editions
16
Draws level with Klose for most goals in World Cup history
20
On the 20th anniversary of his World Cup debut and his first World Cup goal (June 16, 2006 vs. Serbia & Montenegro), he performed a hat-trick against Algeria
24
He now has 24 goal involvements (16 goals, 8 assists) at World Cups, breaking Pele's record (21)
38y 357d
With his first hat-trick in the quadrennial event, he has eclipsed Cristiano Ronaldo's record (33y 130d) as the oldest to perform the feat
The oldest to score multiple goals (two or more) in a World Cup match, surpassing Milla (38y 34d, 1990)
The youngest (18y 357d) and oldest goal-scorer for Argentina at the World Cup

Stat Attack

1 Olwan, who top-scored for Jordan with nine goals in the Qualifiers, netted its first in the World Cup

3 Mbappe is the third player to score for France in three different editions (after Platini and Rocheteau)

3 Hussein is the third (after Brandts in 1974 and Mandzukic in 2018) to score a goal and an own goal in the same game at the World Cup

5 Mbappe has the most multi-goal (two or more) games at the World Cup

10 Schmid's goal from outside the penalty area is the 10th in the 2026 tournament. In the 2022 edition, 12 such goals were scored

11 Algeria is the 11th nation Messi has scored against at the World Cup, more than any other player

15 Mbappe also overtook Platini (14) for most strikes in major tournaments by a Frenchman

1 Haaland is the first to score a brace for Norway in the football extravaganza. He also tied Rekdal for most goals (2) in its World Cup history

14 Mbappe has gone past Fontaine's all-time World Cup record (13) for France. He is now tied with Muller. Only Messi (16), Klose (16) and Ronaldo Nazario (15) are ahead

15 Norway is on a 15-game winning streak (across all competitions) when Haaland scores. The Manchester City forward has found the target 28 times in this period

18y 143d
Mbaye (Senegal vs. France) is the youngest African scorer at the FIFA showpiece, and the second youngest to find the back of the net on his debut after Spain's Gavi (18y 110d, 2022) at this level

23y 287d
Barcola is the youngest Frenchman to score on his World Cup debut since Henry (20y 299d, 1998)

58 Mbappe has surpassed Giroud (57) to become France's top-scorer

Mbappe magic helps France pass Senegal test

Ayon Sengupta
NEW JERSEY

France beat Senegal 3-1 at the MetLife Stadium in their FIFA World Cup Group I opener on Tuesday, but the scoreline scarcely reflected how uncomfortable Didier Deschamps' side was made to feel for much of the match. Senegal coach Pape Thiaw trusted experience over youth in midfield, preferring Idrissa Gueye to Pape Matar Sarr, and his side quickly settled into a familiar rhythm.

Though France held most of the early possession, it struggled to build anything substantial from that advantage. Kylian Mbappe was guilty of breaking down promising moves with heavy touches after Michael Olise and Ousmane Dembele had twice, in quick succession, found him in space.

Senegal, meanwhile, looked content to sit deep and absorb pressure, waiting for opportunities to exploit any free space. Sadio Mane, Ismaila Sarr and Gueye combined neatly in the seventh minute, carving a hole in the French midfield, but Nicolas Jackson's final pass was a little too quick for Sarr to reach its end.

Precise finish: Mbappe outwits Mendy to draw first blood for *Les Bleus*. REUTERS

As the temperature climbed, so did Senegal's confidence. France's adventurous approach left room for Jackson to attack, and the striker came closest to breaking the deadlock after Mbappe was robbed of the ball in the middle. He burst clear down the left and slipped a low effort beyond Mike Maignan, only for the post and a fortunate ricochet off the goalkeeper's leg to keep the scores level.

Deep into stoppage time, Mane released Sarr into space with only Maignan to beat, but the winger's effort was nowhere near the intended target.

The pattern, however, began to shift as the game restarted. France moved the ball with greater urgency, with Olise becoming increasingly involved in taking the fight to the opponent's bay. The Bayern Munich winger forced Edouard Mendy into a sharp save after a surging run through the middle. The pressure was mounting. Mbappe had a penalty appeal waved away and later saw another effort gathered by Mendy, but the breakthrough felt inevitable.

It finally arrived in the 66th minute. Released inside the right channel, Mbappe guided a precise finish beyond Mendy to break a deadlock that was making the French increasingly agitated.

Senegal thought it had found an immediate response when Jackson rifled a finish into the top corner, but the offside flag intervened.

Adrien Rabiot threaded a pass into the path of Bradley Barcola, and the substitute lifted a composed finish past an advancing Mendy to double the advantage.

Senegal finally found a way back when persistent pressure produced a goal from Ibrahim Mbaye. But before the West Africans could fully entertain the thoughts of a comeback, Mbappe scored again to deliver the final flourish. Collecting possession outside the area, he unleashed a right-footer which curved beyond Mendy and into the top corner.

THE RESULTS

Group I: France 3 (Mbappe 66, 90+6, Barcola 82) bt Senegal 1 (Mbaye 90+5); Iraq 1 (Hussein 39) lost to Norway 4 (Haaland 29, 43, Ostigard 76, Hussein 90+6-og).
Group J: Argentina 3 (Messi 17, 60, 76) bt Algeria 0; Austria 3 (Schmid 20, al-Arab 76-og, Arnautovic 90+12-pen) bt Jordan 1 (Olwan 50).
Group K: Portugal 1 (Neves 6) drew with DR Congo 1 (Wissa 45+5).

Smriti, Shafali and Shree Charani on song as India makes it two out of two

The openers put on 115 after being put in to bat by the Dutch; the left-arm spinner returns a four-wicket haul to bowl out the minnows for 114

T20 WORLD CUP

P.K. Ajith Kumar
LEEDS

Stroke-filled: Smriti's knock was studded with 11 fours and one maximum. GETTY IMAGES

Strike force: Shree Charani was the most successful Indian bowler much to the delight of Harmanpreet. GETTY IMAGES

The two schoolboys hopped on a train from London early in the morning, got off at Leeds, and then took a bus to Headingley. Oscar and Dylan weren't disappointed, as they got to watch some fascinating cricket at the Women's T20 World Cup.

They must have liked what they saw from one of their favourite teams: India. Harmanpreet Kaur's side scored a facile victory against the Netherlands at Headingley on Wednesday.

Once India posted 209 for five after losing the toss, the only question was about the margin of the victory. India won in the end by 95 runs.

Though the Netherlands got off to a fine start, with openers Heather Siegers and Phebe Molkenboer adding 30 in just four overs, it was always going to be a tough ask for a team of part-timers making their World Cup debut, no matter how spirited they are.

Skipper Babette de Leede fought hard again, and was the only batter who lasted more than 20 balls. For India, the young Shree Charani came up with another fine spell, and finished with four for 19. It hasn't taken her long to look so much at home in international cricket.

There were three wickets for Shafali Verma, who came on to complete the over after Shreyanka Patil had to leave the field, injuring her ankle.

The off-spinner looked in considerable discomfort and there seemed cause for concern for the Indian camp. "Shreyanka was taken for a scan and the BCCI medical team is monitoring her" Shafali said, later. Earlier, the much adored Indian batting blossomed on a hot afternoon.

There were runs for Shafali. And there were more runs for Smriti Mandhana, who made her second successive fifty.

Smriti (74, 47b, 11x4, 1x6) and Shafali (55, 38b, 10x4) got into the act quickly and put on 115 for the first wicket, scoring at about 10 an over.

Both played some fine strokes and India should be hoping for more such stuff from them in the matches to come.

Jemimah Rodrigues disappointed her fans in England – there are quite a few – once more and Yastika Bhatia, who came in for Bharti Fulmali, failed, too. But that trusted firm lower down the order, of Richa Ghosh and Deepti Sharma, ensured India would have more than enough runs on the board.

Like Australia, the Women in Blue have won both their games. Tougher challenges await them, though.

SCOREBOARD

Women's cricket taking off in a big way, says Maroof

P.K. Ajith Kumar
LEEDS

Maroof. P.K. AJITH KUMAR

Maroof Khan has watched some great talents from up close. He grew up in Mumbai playing cricket with the likes of Sachin Tendulkar, after all.

Now his job is to find out the finest talents in women's cricket. In England, that is.

Maroof is working as a scout to select players for the England women's cricket team. "It has been an exciting assignment for me," he told *The Hindu*. "My job is to watch the domestic matches around the country and see the players in action."

Maroof, who is now living at Leeds after travelling to places like Los Angeles, Singapore, Hong Kong and London, is a vastly experienced coach. He has, in fact, been an assistant coach with the England mixed disability team.

He is delighted to be part of women's cricket at a time when it is rapidly increasing in popularity.

"We have seen how women's cricket is taking off in a big way in India with the WPL and the ODI World Cup triumph last year," Maroof said. "In England, there is a lot more awareness about the game. The Hundred, where the men's and women's teams play on the same day, has been a huge boost."

Maroof says the world could soon see some brilliant young players from England. "I have been mighty impressed with some of those players," he said.

"There is no doubt that women's cricket is going to get bigger. The game will definitely benefit with England hosting this World Cup."

He is glad he could reunite with his old friend Amol Muzumdar, the India women's coach. "We had so much talent in Mumbai those days," Maroof said. "Sachin was different, of course. It was a privilege to bowl to him, and I remember thousands coming to watch him just train".

Australia has it easy against Bangladesh

P.K. Ajith Kumar
LEEDS

The Australian women haven't won a cricket World Cup for three years. That ought to sound a bit strange still.

It is a bit like saying Meryl Streep hasn't come up with a sensational performance for a while. Her brilliance is taken for granted. Like the success of Australia in women's cricket.

Such is the sheer talent and depth in the women's game Down Under. Of late, other teams have caught up with them in international cricket. But Australia looks the side to beat at the T20 Women's World Cup.

After crushing South Africa in the opening match by 65 runs, Sophie Molineux's women were expected to have it easy against Bangladesh in their Group A clash. It surely was. Australia came up with a clinical show to restrict Bangladesh to 77 for eight and then chased down the modest target with nine wickets to spare.

The scores: Group A:
Bangladesh 77/8 in 20 overs (Nigar Sultana 27) lost to Australia 78/1 in 9.3 overs (Georgia Voll 45 n.o.).
Toss: Australia; **PoM:** Perry.
On Tuesday: Group B: Ireland 118/9 in 20 overs (Orla Prendergast 26) lost to England 119/6 in 17.3 overs (Nat Sciver-Brunt 48, Heather Knight 26).
Toss: England; **PoM:** Ecclestone.

Gill and Kishan make merry for India

AFGHANISTAN IN INDIA

N. Sudarshan
LUCKNOW

Unstoppable: Gill and Kishan combined for a match-defining 224-run third-wicket partnership. SHASHI SHEKHAR KASHYAP

India came out largely unscathed from the cauldron that the Ekana Cricket Stadium was on Wednesday as it beat Afghanistan by 170 runs in the second ODI to take an unassailable 2-0 series lead.

As afternoon temperatures soared into the high 30s, players baked in the largely airless arena. With just 13,300 fans turning up at the 50,000-seater, there was also a severe lack of energy.

But India, guided by splendid centuries from captain Shubman Gill and Ishan Kishan, mastered the elements, racking up a mammoth 402 after being asked to bat first. Afghanistan, in reply, was bowled out for 232, with Darwish Rasooli retiring hurt.

Rahmanullah Gurbaz and Sediqullah Atal got starts, scoring 41 and 42, respectively. Rahmat Shah made 79 (89b, 8x4). However, seldom did they display the necessary urgency. It also did not help that Afghanistan missed Mohammad Nabi and Azmatullah Omarzai because of injuries.

For the host, Prince Yadav made his debut while Kuldeep Yadav and Yashasvi Jaiswal got opportunities. Out went Harsh Dubey, Prasidh Krishna, and an injured Nitish Kumar, leaving the side with just five specialist bowlers.

But Gill and Kishan did the heavy-lifting by batting admirably under the unrelenting, energy-sapping sun, combining for a massive, match-defining 224-run partnership for the third wicket.

Gill conjured his ninth ODI century (154, 110b, 22x4, 2x6) while Kishan notched up his second (125, 79b, 14x4, 7x6), more than three-and-a-half years after his first (210 versus Bangladesh at Chattogram).

The skipper oozed class, as always, and was particularly impressive with his driving. Kishan stood out for his acceleration and six hitting. When the latter walked in, Gill was already on 42 from 31 balls. That both batters crossed 100 in the same over – 33rd of the innings – told the story.

Kishan reached his half-century off 52 balls but accumulated the next 50 runs from just 19 deliveries. He appeared unstoppable even after going past the treasured milestone, clubbing left-arm spinner Nangeyalia Kharote (four for 76) for back-to-back one-handed sixes. A third attempt, however, led to his downfall.

The scoring rate dipped after Kishan's dismissal, with Shreyas Iyer (26, 24b, 1x4, 1x6) and Washington Sundar (19, 19b, 1x4) unable to kick on.

After having got to 300 in 35.5 overs, India seemed set to breach its record ODI total of 418 for five (against West Indies in Indore in 2011).

But it took until the last over of the innings to touch 400.

In the end, though, the late-innings tardiness – rather lethargy – did not matter, for Afghanistan's hopes had long evaporated into thin air.

Manpreet scales a new peak

Press Trust of India
ROTTERDAM

Manpreet Singh, with his 413th appearance, became India's most-capped hockey player during the FIH Pro League match against Germany here on Wednesday.

The 33-year-old midfield star surpassed former captain and current Hockey India president Dilip Tirkey, who represented the country 412 times. In recognition of his achievement, Hockey India announced a cash reward of ₹10 lakh for Manpreet.

The day was made more special as India defeated Germany 3-1 through goals from Mandeep Singh (seventh minute), Shilanand Lakra (13th) and Nilakanta Sharma (35th).

Raphael Hartkopf (45th) scored for Germany.

Kiwis fight back on day 1

The scores: New Zealand 291/7 in 77 overs (Daryl Mitchell 44, Tom Blundell 51, Glenn Phillips 49 batting) vs. England.
Toss: England.

South Africa and Czechia can't slip up

FIFA WORLD CUP

Ayon Sengupta
ATLANTA

Schick. AP

South Africa's return to the World Cup after a 16-year absence has so far resembled much of its footballing history – spirited, organised and competitive, but ultimately punished by fine margins.

A 0-2 defeat to host Mexico in the opening match has left *Bafana Bafana* with little room for error as it prepares to face Czechia here in a contest that could shape Group A's destiny.

For Czechia, the equation is no different. In a 1-2 loss to South Korea, Ivan Hasek's side produced enough attacking moments to suggest it can still emerge from one of the tournament's most evenly balanced groups. With Mexico and South Korea already holding an advantage, neither team can afford another defeat.

South Africa coach Hugo Broos has built his side around defensive discipline and fast transitions. Against Mexico, *Bafana Bafana* spent long periods without possession but remained compact, frustrating the home team at times. The midfield led by Teboho Mokoena will again be tasked with shielding the back four while launching counters through the pace of Oswin Appollis and Elias Mokwana.

Czechia, meanwhile, prefers a more direct and physical approach. Hasek's side is comfortable playing through wide areas and delivering early crosses into the penalty area. Much of its attacking threat revolves around the movement and finishing of Bayer Leverkusen's Patrik Schick, whose aerial presence gives Czechia an easy outlet.

This will be the first senior international meeting between the two nations. South Africa's finest moment remains hosting the tournament in 2010, while Czechia's modern football identity is shaped by its memorable run to the semi-finals of Euro 2004 and its appearances at the 2006 World Cup.

Ronwen Williams, South Africa's top performer against Mexico, will inevitably have a major role to play in goal, but South Africa's greater concern will be preventing Czechia from creating the chances that allow Schick to become decisive.

At the other end, Appollis carries South Africa's hopes of providing the attacking spark that was missing in the opening game.

With Mexico facing South Korea later in the day, the stakes could hardly be higher. For both South Africa and Czechia, this is already beginning to feel like a knockout disguised as a group-stage game.

India-A routs Afghanistan-A, all but confirms final berth

Tilak & Co. win by 101 runs, which takes the side to the top of the points table on Net Run Rate; the 104-run fourth-wicket association between the skipper and Kushagra proves decisive

TRI-SERIES

Shayan Acharya
DAMBULLA

India-A all but sealed a place in the tri-nation series final with a commanding 101-run win over Afghanistan-A at the Rangiri International Stadium on Wednesday, thanks to a composed knock from Kumar Kushagra and a disciplined bowling effort.

Asked to bat, India-A recovered from a wobble to post 319 for nine. Half-centuries from Priyansh Arya (58, 42b, 9x4, 1x6), skipper Tilak Varma (59, 75b, 5x4) and Kushagra (58, 67b, 5x4) formed the backbone of the innings, with the 104-run fourth-wicket stand between Tilak and Kushagra proving decisive.

The changes to the XI paid off immediately. Priyansh, drafted in for Prabhsimran Singh, continued his impressive run at the top, while Kushagra justified his inclusion ahead of Ayush Badoni.

Calm and composed: Kushagra, Tilak and Priyansh notched up stylish half-centuries. SLC

Vaibhav Sooryavanshi (38) once again got a start but failed to convert it despite surviving a couple of chances. Ruturaj Gaikwad looked fluent in his 30 before edging Abdollah Ahmadzai behind. When wickets fell in quick succession, Kushagra remained calm and assured, rebuilding the innings alongside Tilak.

The pair wrestled back control before Vipraj Nigam added late impetus with a brisk 30 off 20 balls to take India-A past 300.

The run chase began brightly. Hassan Eisakhil attacked Anshul Kamboj and Yash Thakur before mistiming a pull to Ruturaj at short mid-wicket. Khalid Taniwal and Imran Mir also got starts but failed to capitalise.

The chase remained alive through an 87-run fourth-wicket partnership between Bahir Shah and Faisal Shinozada. Just when Afghanistan-A threatened to mount a challenge, India-A struck back.

Anukul Roy tightened the screws in the middle overs, while Vipraj delivered key breakthroughs. The turning point came when Bahir departed soon after reaching a hard-fought fifty.

From there, Afghanistan-A unravelled as left-arm spinner Nishant Sindhu cleaned up the tail with four wickets, bowling out the side for 218.

The win lifted India-A to the top of the table, ahead of Sri Lanka-A on Net Run Rate, leaving it on the verge of a place in the final.

The scores: India-A 319/9 in 50 overs (Priyansh 58, Tilak 59, Kushagra 58) bt Afghanistan-A 218 in 36.5 overs (Shinozada 46, Bahir 57, Sindhu 4/31).
Toss: Afghanistan-A.
PoM: Sindhu.

Sooryavanshi, Halambage and Tilak face fines

Shayan Acharya
DAMBULLA

Vaibhav Sooryavanshi and Sri Lanka-A's Vishen Halambage have each been recommended fines amounting to 50% of their match fees, while India-A captain Tilak faces a proposed 30% sanction following incidents during Monday's India A-Sri Lanka-A match.

Match referee Pradeep Jeyapragash has also recommended a 20% fine for Sri Lanka-A wicketkeeper-batter Niroshan Dickwella.

The sanctions come in the aftermath of a tense finish to the contest. Sooryavanshi was involved in a heated exchange with Halambage and a few Sri Lankan players after the match, bringing an ugly end to what had otherwise been a gripping encounter.

Sources claimed that a few Sri Lankan players had been sledging Sooryavanshi and some of his India-A teammates since the start of the tournament, often taunting them about their IPL performances.

Unlike senior international cricket, disciplinary sanctions in A-team matches are not automatically enforced by the ICC. The match referee's recommendations have instead been forwarded to BCCI and Sri Lanka Cricket, with the two boards now responsible for deciding whether to ratify and impose proposed penalties.

While there was no formal hearing, the match referee imposed the sanctions based on the reports of the on-field umpires.

Glory beckons: Scheffler will target his first Major of the year. AP

Scheffler seeks career Slam as Europeans eye Major treble

US OPEN GOLF

Agence France-Presse
SOUTHAMPTON

While top-ranked Scottie Scheffler chases a career Grand Slam at this week's US Open, European golfers can achieve an unprecedented treble if one of them wins the title at Shinnecock.

The year's third Major begins on Thursday over the windy 7,440-yard (6,800m) Long Island layout, where lightning-fast greens and thick rough add to the challenge.

"A lot of it just comes down to execution, but I think patience is a large part of it as well," said Scheffler.

Elite company

Much of the focus is upon the American, who could become only the seventh player to complete the career Slam with a victory on Sunday, which is his 30th birthday.

Scheffler would join Tiger Woods, Rory McIlroy, Jack Nicklaus, Ben Hogan, Gary Player and Gene Sarazen as the only players to achieve the feat. Player is the only one to have completed the career Slam by winning a US Open.

"Would it be a dream to win the US Open? Of course," Scheffler said. "But at the end of the day, the Grand Slam has never been a motivating factor for me. I always just wanted to be the best version of myself and that got me this far."

Golfers from the United Kingdom have won the first two Majors of the year, second-ranked McIlroy of Northern Ireland defending his Masters crown completing his career Slam last year and England's Aaron Rai taking the PGA Championship.

It's a feat not seen in the four-Major era since the Masters began in 1934, and another European victory would match the continent's best run of three Majors in a year since 2014, when McIlroy won the PGA and British Open after Germany's Martin Kaymer captured the US Open.

"A historic start to the Major season for golfers from that part of the world, and I would say this is more a UK/European style of test than certainly the first two Majors," McIlroy said. "So it certainly wouldn't surprise me to see a few players from Europe and the UK in contention on Sunday."

Scheffler's only win this year came in the California desert in January, but he reeled off three runner-up efforts in a row including the Masters.

"I feel like I've been close most of the year. I just haven't been as sharp as I needed," Scheffler said. "Margins are so small in this game, to be winning a lot of tournaments you've got to just be really sharp."

McIlroy is wary of Shinnecock luring players into mistakes. "This course demands so much patience and it can lure you into doing things you shouldn't do," he said. "If everything is going the way everyone wants it in terms of weather, setup, it's the best championship test in the country."

India looks to continue its winning run against Uruguay

The team has scored all five goals in its two matches through penalty corners and chief coach Marijne would expect his strikers to up their game and find the target from field efforts

FIH NATIONS CUP

Press Trust of India
AUCKLAND

With a semifinal spot already sealed, a relaxed Indian women's hockey team would look to end the pool engagements undefeated against a lower-ranked Uruguay in the FIH Nations Cup here on Thursday.

India tops Pool A with six points from two wins in two games and is determined to win the tournament to get its place back in next season's elite FIH Pro League.

The Salima Tete-led India will start as favourites against world no. 17 Uruguay, which lost both its opening two matches.

India scored all five goals in its two matches through penalty corners.

Focused: India is determined to triumph in the tournament to get its place back in next season's elite FIH Pro League. X@THEHOCKEYINDIA

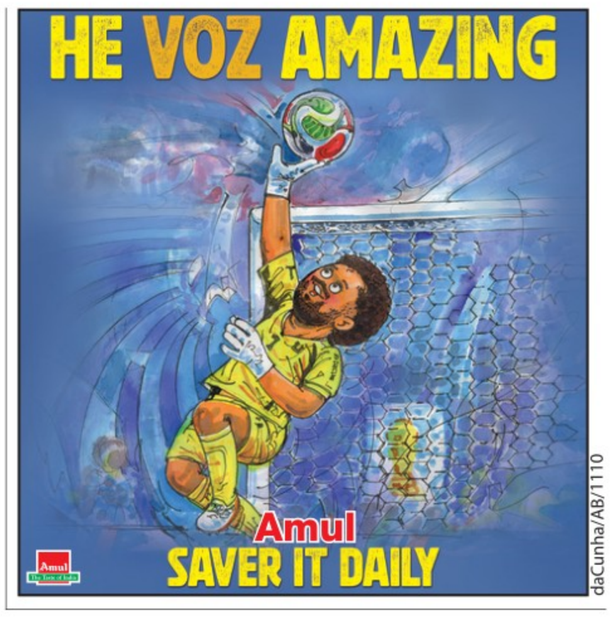
Deepika is joint second in the scorers list with two strikes, while Navneet Kaurn Salima and Lalremsiami found the net once each.

Going into the business end of the tournament, chief coach Sjoerd Marijne would expect his strikers to find the net from field efforts and Uruguay provides them the best opportunity to do that.

Having conceded three goals in two matches, the Indian defence, though, needs to tighten up a bit.

"In tournaments like this, small moments often make the biggest difference. We need to remain disciplined and make the most of our opportunities," said Marijne.

"The objective is not only to achieve good results but also to continue building a strong foundation for the future," he said.



Srihari breaks his own 50m backstroke record

Sports Bureau

Srihari Nataraj broke his seven-year-old men's 50m backstroke record on his way to retain the title at the National aquatics in Ahmedabad on Wednesday.

The 25-year-old Srihari performed better than his 2019 National mark of 25.58 in the morning heats by clocking 25.21. In the evening session, he recorded 25.32 in the final to claim

Srihari.

gold. Saanvi Deshwal lowered the women's 200m medley mark with 2:19.15. She erased Hashika Ramachandra's three-year-old record of 2:21.15. Karnataka swimmers won the 4x100m freestyle mixed relay crown with a new record.

Srihari breached the qualification marks for the Commonwealth Games and the Asian Games.

Saanvi also clocked the best Indian time.

The results (winners only):
Men: 50m freestyle: Jashua Thomas (TN) 23.24; **50m backstroke:** Srihari Nataraj (Kar) 25.32; **100m breaststroke:** Danush Suresh (TN) 1:02.19;
4x200m freestyle relay: Karnataka (Dharshan S., Akash Mani, Aneesh S. Gowda, Dhakshan S.) 7:38.71. **Women: 200m freestyle:** Dhinidhi Desinghu (Kar) 2:03.07; **50m backstroke:** Suvana C. Baskar (Kar) 29.85;
200m medley: Saanvi Deshwal (Mah) 2:19.15 (NMR, Old 2:21.15, Hashika Ramachandra, 2023);
4x100m freestyle mixed relay: Karnataka (Akash Mani, Aneesh S. Gowda, Nina Venkatesh, Tanishi Gupta) 3:37.68 (NMR, Old 3:41.18, Karnataka, 2025).

Anmol, Rakshitha and Shriyanshi in pre-quarterfinals

BADMINTON

Press Trust of India
MACAU

Anmol Kharb led the charge in the women's singles with a straight-game win as three Indians progressed to the pre-quarterfinals of the Macau Open Super 300 badminton tournament, here on Wednesday.

Anmol brushed aside Indonesia's Mutiara Ayu Puspitasari 21-13, 21-16 in just 42 minutes and will next face Malaysia's Goh Jin Wei.

Rakshitha Sree Ramraj defeated Malaysia's Kisona Selvaduray 21-16, 24-22 and will meet South Korea's Kim Min Sun in the pre-quarterfinals.

Seventh seed Shriyanshi Valishetty downed countrymate Tasnim Mir 21-18, 19-21, 21-15 and will play South Korea's Kim Min Ji.

In men's singles, Rounak Chouhan rallied from a game down to beat Chinese Taipei's Wu Zhe Ying 18-21, 21-15, 21-19 in an hour and five minutes.

Other results: Men: Rounak Chouhan bt Wu Zhe Ying (Tpe) 18-21, 21-15, 21-19; Huang Ping-Hsien (Tpe) bt S. Sankar Muthusamy Subramanian 11-21, 21-18, 21-16.
Women: Han Qian Xi (Chn) bt Shreya Lele 21-12, 21-15; Kim Min Ji (Kor) bt Aakarshi Kashyap 21-17, 18-21, 21-17.
Mixed doubles: Ishaan Bhatnagar & Shruti Mishra bt Calvin Devereux & Desiree Toepffer (Ger) 21-4, 21-6; Low Han Chen & Chan Wen Tse (Mas) bt Mohit Jaglan & Lakshita Jaglan 21-9, 21-12; Song Hyun Cho & Jeong Na Eun (Kor) bt Dhruv Rawat & K. Maneesha 24-22, 21-18; Supak Jomkoh & Ornnicha Jongsathapornparn bt Sathwik Reddy & Radhika Sharma 21-10, 21-19; Zhu Yi Jun & Li Qian (Chn) bt Rohith Mohankumar & Riduvarshini Ramasamy 21-9, 21-11.
